the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 4.5 million women employed in the public sector in 1995, compared with 3.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1995, 85% of the public sector workforce were women, compared with 75% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time and permanent. In 1995, 65% of the public sector workforce were employed on full-time contracts, compared with 55% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state, such as those in the health service and the education system.

Finally, the public sector has become an important employer of women because it has a high proportion of jobs that are well-paid. In 1995, the average salary of a public sector employee was £18,000, compared with £15,000 in 1980. This is due to the fact that the public sector has a high proportion of jobs that are in the higher grades of the public sector pay scale, such as those in the senior management and professional grades.

The public sector has also become an important employer of women because it has a high proportion of jobs that are flexible. In 1995, 15% of the public sector workforce were employed on flexible contracts, compared with 5% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are part-time or have flexible hours, such as those in the health service and the education system.

The public sector has also become an important employer of women because it has a high proportion of jobs that are secure. In 1995, 95% of the public sector workforce were employed on secure contracts, compared with 85% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state, such as those in the health service and the education system.

The public sector has also become an important employer of women because it has a high proportion of jobs that are well-located. In 1995, 65% of the public sector workforce were employed in the London region, compared with 55% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are in the central business district of London, such as those in the financial services and the legal services sectors.

The public sector has also become an important employer of women because it has a high proportion of jobs that are well-qualified. In 1995, 65% of the public sector workforce were employed in jobs that required a degree or higher qualification, compared with 55% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are in the higher grades of the public sector pay scale, such as those in the senior management and professional grades.

“History
Matters”

has
long
been
the
motto
of
the

New
-
York
Historical
Society,
New
York's
first
museum
and
distinguished
research
library,
founded

in
1804.
How
true
this
motto
rings
with
the
launch
of
the
British
Library's

magnificent
exhibition,
*Harry
Potter:
A
History
of
Magic,*
at
New-York
Historical
in
October
2018.

At
once
drawing
on
the
global
phenomenon
of
J.K.
Rowling's
Harry
Potter
novels
and

the
traditions
of
folklore
and
magic
that
underpin
them,
the
exhibition
shows,
above
all,

how
art,
artifacts,
and
documents
of
the
past
were
indispensable
to
one
of
our

contemporary
era's
most
creative
minds.

The
exhibition
also
underscores
the
importance
of
institutions
such

as
the

F
O
R
E
W
O
R
D
7

British
Library
and
New-York
Historical,
each
a
great

repository
of
documents
and
ephemera
whose
value
and
interest
go
well
beyond
the
merely

antiquarian.
Rare
books,
manuscripts,
and
magical
objects
from
our
two
institutions,
as
well
as

from
US
Harry
Potter
publisher
Scholastic
and
other
collections,
breathe
new
life
into
the

annals
of
the
distant
past
as
they
illuminate
the
fascinating
and
more
recent
chapter

begun
with
J.K.
Rowling's
books.
The
exhibition's
opening
at
New-York
Historical
marks
the
20th

anniversary
of
the
US
publication
of
*Harry
Potter
and
the
Sorcerer's
Stone,*
a
book

that
introduced
an
entire
generation
of
Americans
(including
my
son,
Malcolm)
to
the
pleasures

of
reading.
Among
the
great
strengths
of
the
exhibition,
and
offering
its
own
particular

delights,
is
the
chance
for
these
first

-

generation
Harry
Potter
readers—and
indeed
all

of
the
visitors
to
the
show—to
experience
a
new
and
perhaps
unexpected
lens
through

which
to
understand
Harry
Potter's
world.

At
New-York
Historical,
we
are
glad
to
be

able
to
showcase
in
New
York
some
treasures
from
our
library
and
museum
which

were
not
on
view
in
London
last
year,
including
John
James
Audubon's
original
watercolor

of
the
Snowy
Owl
(recalling
Harry's
pet
owl,
Hedwig);
an
original
printing
of
Cotton

Mather's
The
Wonders
of
the
Invisible
World,
the
minister's
defense
of
his
role
in

the
infamous
Salem
witch
trials;
and
a
manuscript
notebook
from
the
1720s
with
an

unidentified
navigator's
notations
charting
the
nighttime
sky,
including
the
constellations
that

F
O
R
E
W
O
R
D
8

inspired
the
name
of
Sirius
Black
and
other

Harry
Potter
characters.

At
the
same
time,
we
could
not
be
more
thrilled
than

to
display
the
tremendous
materials
that
were
a
part
of
the
British
Library
exhibition

in
2017
and
are
on
loan
to
us.
It
is
through
exhibitions
such
as

*Harry
Potter:
A
History
of
Magic*
that
great
collections
such
as
those
that
reside

at
the
British
Library
and
New-York
Historical
are
able
to
enjoy
a
broad
appeal.

Still,
this
can
only
happen
successfully
when
these
collections
are
treated
with
the
utmost

respect,
artistry,
and
intellect
by
talented
and
highly
skilled
women
and
men.

We
are

grateful
to
our
colleagues
at
the
British
Library,
above
all
to
Roly
Keating,
Jamie

Andrews,
Shona
Connechen,
and
exhibition
curators
Julian
Harrison,
Alexander
Lock,
Tanya
Kirk,
and
Joanna

Norledge
for
their
generous
collaboration
with
us;
as
well
as
Ellie
Berger,
Emily
Clement,

Arthur
Levine,
David
Saylor,
Rachel
Coun,
Lizette
Serrano,
Charisse
Meloto,
and
Kris
Moran
at

Scholastic
who
worked
to
bring
this
exhibition
and
book
to
splendid
fruition.
We
are

also
indebted
to
the
local
institutions
whose
loans
have
greatly
enhanced
the
New
York

presentation:
American
Museum
of
Natural
History,
Beinecke
Rare
Book
&
Manuscript
Library
at
Yale

University,
Brooklyn
Museum,
The
Explorers
Club,
Metropolitan
Museum
of
Art,
and
New
York
Botanical

Garden.

At

New-York

Historical,

Margi

Hofer,

Gerhard

Schlanzky,

Cristian

Petru

Panaite,

Jennifer

Schantz,

Emily

Croll,
Ines
Aslan,
and
many
other
colleagues
have
contributed
in
ways

F
O
R

too

numerous

to

denominate.

Cristian

Petru

Panaite

and

Margi
Hofer,
along
with
Rebecca
Klassen,
Marilyn
Kushner,
Nicole
Mahoney,
Roberta
Olson,
and
Edward

O'Reilly,
made
important
contributions
to
this
volume,
as
did
New-York
Historical
trustee
Agnes
Hsu-Tang.

I
always
reserve
my
greatest
gratitude
for
New-York
Historical's
dedicated
and
generous
Trustees,
led

by
Chair
Pam
Schafler.
Many
thanks
to
all!

Harrison**

*British
Library,
Lead*

Curator

*Harry
Potter:*

A

History

Of

Magic

I

INTRODUCTION

J.K.
Rowling's
Harry
Potter
novels
are
a
global
phenomenon.
The
stories
have
sold
millions

of
copies
worldwide,
have
been
translated
into
dozens
of
languages,
and
inspired
countless
readers,

young
and
old.

But
how
many
of
those
readers
have
paused
to
reflect
on

the
magical
traditions
that
lie
at
the
heart
of
Harry
Potter's
world?
*Harry
Potter:*

A
History
of
Magic
is
the
first
major
exhibition
to
explore
this
rich
and

diverse
aspect
of
J.K.
Rowling's
stories.
From
ancient
amulets
to
medieval
mandrakes,
from
unicorns

(they
really
did
exist)
to
bubbling
cauldrons,
there
are
often
historical
and
mythological
antecedents

for
the
characters
and
scenes
in
the
Harry
Potter
series.
The
exhibition
strives
to

tell
some
of
these
stories
and
to
celebrate
the
inspiration
behind
J.K.
Rowling's
own

spellbinding
creations.

The
exhibition
features
many
precious
artifacts
relating
to
the
Harry
Potter
books

and
magic
through
the
ages.

First
and
foremost
are
items
associated
with
J.K.
Rowling.

These
include
fascinating
early
drafts
of
*Harry
Potter
and
the
Sorcerer's
Stone
and
Harry*

Potter

12

I
N
T
R
O
D
U
C
T
I
O
N

and

the

Deathly

Hallows;

original

drawings

by
the
author;
and
intricately
worked-out
plot
plans
for
*Harry
Potter
and
the
Order*

*of
the
Phoenix.*

Each
and
every
one
of
these
treasures
bears
testament
to
the

author's
creativity
and
craftsmanship,
and
to
the
enduring
appeal
of
the
world
she
invented.

We
are
also
delighted
to
showcase
some
of
the
original
artwork
of
the
artists

Jim
Kay,
Mary
GrandPré,
Brian
Selznick,
and
Olivia
Lomenech
Gill.

Jim
Kay
has
been

commissioned
to
create
fully
illustrated
editions
of
the
Harry
Potter
novels,
the
first
three

of
which
have
already
been
published
to
widespread
international
acclaim.

Mary
GrandPré
is
the

illustrator
of
the
iconic
original
American
book
jackets,
giving
US
readers
their
first
look

at
Harry.
Brian
Selznick
has
designed
brand

-

new
covers
for
the
books
in

celebration
of
the
20th
anniversary
of
*Harry
Potter
and
the
Sorcerer's
Stone*
in
the

United
States,
while
Olivia
Lomenech
Gill
is
the
artist
of
the
illustrated
edition
of

*Fantastic
Beasts
and
Where
to
Find
Them.*

We
are
extremely
grateful
to
all
four

for
their
generous
involvement
and
support.

13

It

is

an

equal

pleasure

to

present

items

from

the

British

Library's

own

unrivaled
collections,
many
of
which
have
never
previously
been
considered
in
this
wider,
magical

context.

On

display

are

Greek

papyri,

Ethiopian

talismans,

Chinese

herbals,

French

phoenixes,

and

Thai

horoscopes.

Harry

Potter

fans

can

pore

over

Leonardo

da

Vinci's

notebook,

marvel

I

N

T

RODUCION

14
at
the
Dunhuang
Star
Atlas,
and
gaze
in
amazement
at
the
alchemist
in

the
Splendor
Solis.

Visitors
to
New
York
will
also
be
able
to
see
a

number
of
astonishing
artifacts
from
the
New-York
Historical
Society,
foremost
among
which
is
the

original
watercolor
of
the
Snowy
Owl
for
Audubon's
Birds
of
America,
made
in
1829.

To
complement
these
objects,
we
are
also
thrilled
to
have
secured
some
amazing
loans

from
a
number
of
institutions
and
private
individuals.

*Harry
Potter:*

*A
History
of
Magic*

is
framed
around
some
of
the
subjects
studied
at
Hogwarts
School
of
Witchcraft
and

Wizardry.
There
is
Potions
(and
its
more
advanced
cousin,
Alchemy),
Herbology,
Charms,
Astronomy,
Divination,

Defense
Against
the
Dark
Arts,
and
Care
of
Magical
Creatures.
Focusing
on
each
of

these
subjects
has
enabled
the
exhibition
curators
to
delve
deeper
into
the
theme
of

enchantment
through
the
ages.

Potion-making,
fortune-telling,
harvesting
herbs
and
spells
to
make
you
invisible

all
make
an
appearance.

In
the
process,
we
have
uncovered
intriguing
facts
about
many

of
the
exhibits.

Did
you
know,
for
example,
that
Leonardo
da
Vinci
believed
that

the
Sun
rotated
around
the
Earth?
Were
you
aware
that
the
“Abracadabra”
charm
first

originated
as
a
cure
for
malaria?

How
many
people
knew
that
some
unicorns
had

two
horns?
Some
of
these
facts,
quite
frankly,
border
on
the
absurd—according
to
The

*Old
Egyptian
Fortune-Teller's
Last
Legacy,
which
we
examine
in
Divination,
“a
mole
on
the*

buttock
denotes
honor
to
a
man
and
riches
to
a
woman.”

15

I
N
T
R
O
D
U
C
T
I
O
N

The
Harry
Potter
stories
are
rooted

in
centuries
of
popular
tradition.
Predicting
the
future,
for
instance,
has
a
long
history.

One
of
the
oldest
items
in
the
exhibition
is
a
Chinese
oracle
bone,
on

loan
from
the
Metropolitan
Museum
of
Art.

These
ancient
bones
can
date
back
as

far
as
1600
B.C.E.,
and
were
used
for
a
divination
ritual
at
the

16

court

of

the

Shang

Dynasty.

Such

artifacts

were

known

historically

as

“dragon

bones,”

emphasizing
their
magical
qualities.

The
ancient
art
of
alchemy
is
at
the
heart
of

the
first
story,
*Harry
Potter
and
the
Sorcerer's
Stone.*

In
that
book,
the
mysterious

Stone
in
question
had
been
taken
in
secret
to
Hogwarts
School,
where
it
was

being
guarded
by
a
monstrous
three-headed
dog
named
Fluffy
and
a
series
of
protective

spells
placed
upon
it
by
the
teachers.

It
was
Hermione
Granger
who
was
the

first
to
realize
the
significance
of
a
certain
Nicolas
Flamel.
Having
spent
several
frustrating

weeks
with
Harry
and
Ron
Weasley
in
the
library,
she
suddenly
pulled
out
an

old
book
that
she
had
put
aside
for
a
bit
of
light
reading.
“Nicolas

*Flamel,”
she
whispered
dramatically,
“is
the
only
known
maker
of
the
Sorcerer's
Stone!”*

According

to
this
ancient
tome,
Flamel
was
a
noted
alchemist
and
opera-lover,
aged
665,
who

was
living
quietly
in
Devon
with
his
wife,
Perenelle.
What
readers
of
the
Harry

Potter
stories
may
not
have
realized
is
that
Flamel
was
a
real
person,
a

wealthy
landlord
who
lived
in
medieval
Paris,
where
he
died
in
1418.
One
of

the
star
items
in
the
exhibition
is
the
actual
headstone
that
marked
the
real

Flamel's
tomb,
on
loan
from
the
Musée
national
du
Moyen
Âge
in
Paris.
Firenze

the
centaur
was
another
to
play
a
significant
part
in
*Harry
Potter
and
the*

*Sorcerer's
Stone,*
saving
Harry
from
danger
in
the
Forbidden
Forest
before
going
on
to

INTRODUCTION

17

teach

Divination

at

Hogwarts

in

the

later

books.

In

Greek

mythology,

Chiron

was

the
greatest
of
all
centaurs,
renowned
as
a
physician
and
astrologer.
According
to
a

medieval
herbal
in
our
exhibition,
the
plants
known
as
Centauria
major
and
Centauria
minor

(greater
and
lesser
centaury)
were
named
after
Chiron.
He
is
shown
in
that
manuscript

handing
over
these
plants
to
Asclepius,
the
god
of
medicine
and
healing.
Centaury
was

renowned
as
a
remedy
for
snakebite.

Fans
of
Harry
Potter
will
also
be
familiar

with
Sirius
Black,
Harry's
godfather.

Many
of
J.K.

Rowling's
characters
are
named
after
stars

and
constellations,
and
our
exhibition
features
a
medieval
illustration
of
the
constellation
Canis
Major,

in
which
is
found
the
Dog
Star,
also
known
as
Sirius,
the
brightest
star

in
the
night
sky.
Witches
and
wizards
have
long
been
associated
with
cauldrons
and

broomsticks.
Included
in
the
exhibition
is
the
first
printed
image
of
witches
with
a

cauldron,
found
in
a
book
published
in
Germany
in
1489.

This
illustration
shows
two

elderly
women
placing
a
snake
and
a
cockerel
into
a
large
cauldron,
in
a

bid
to
summon
up
a
hailstorm.
Popular
perceptions
of
witches
as
ugly,
haggard,
and

demonic
can
ultimately
be
traced
to
this
highly
influential
publication.
One
of
the
weirdest

objects
on
display
is
a
real
witch's
cauldron
owned
by
the
Museum
of
Witchcraft

and
Magic
in
Boscastle,
England.
The
cauldron
in
question
reportedly
exploded
when
a
group

of
witches
were
brewing
a
potion
on
the
beach
(think
Neville
Longbottom);
the
inside

is
now
coated
with
a
thick,
tarry
residue.

18

Every
witch
or
wizard,
so
we
have
always
been
led
to
believe,
should

be
able
to
fly
on
a
broomstick.

As
Kennilworthy
Whisp
noted
in
*Quidditch
Through*

the
Ages,
“No
Muggle
illustration
of
a
witch
is
complete
without
a
broom.”
We

are
very
happy
to
be
showing
in
our
exhibition
a
traditional
witch's
broomstick
with

an
elaborately
colored
handle.

Its
former
owner,
Olga
Hunt
of
Manaton
in
Devon,
used

this
broomstick
for
magical
purposes—on
a
Full
Moon
she
is
said
to
have
leaped

around
Haytor
Rocks
on
Dartmoor,
much
to
the
alarm
of
courting
couples
and
campers.

There
is
also
a
little
book
entitled
*The
History
of
the
Lancashire
Witches,*
describing

that
English
county
as
“famous
for
witches
and
the
very
strange
pranks
they
have

played.”

Alongside

a

picture

of

a

jolly

witch

mounting

a

broomstick,

the

anonymous

author

declares,
“Lancashire
witches
chiefly
divert
themselves
in
merriment
and
sport”
and
are
“more
sociable

than
any
others.”

Harry
Potter
fans
will
be
familiar
with
the
hazardous
properties
of

mandrakes.
According
to
medieval
herbals,
mandrakes
could
cure
headaches,
earache,
and
insanity,
but
their

roots
grew
in
human
form
and
would
shriek
when
torn.

A
15th-century
British
Library

manuscript
shows
the
approved
way
to
harvest
that
plant,
by
attaching
one
end
of

a
cord
to
the
plant
and
the
other
to
a
dog.
The
dog
would

be
encouraged
to
move
forward
by
sounding
a
horn
or
enticing
it
with
meat,

dragging
the
mandrake
with
it.

There
were
a
number
of
comparable
drawings
that

I
N

T R O D U C T I O N

20

we

could

have

shown

alongside

this

manuscript,

but

we

plumped

eventually

for

a

14th-century
illustrated
herbal,
containing
an
Arabic
translation
of
the
writings
of
Pedanius
Dioscorides,
a

physician
in
the
Roman
army.

Dioscorides
was
one
of
the
first
to
distinguish
between

the
male
and
female
mandrake
(or
maybe
we
should
rename
them
the
“mandrake”
and

the
“womandrake”).

Sadly
for
the
romanticists
among
us,
modern
science
now
dictates
that
this

identification
is
incorrect—there
is
more
than
one
mandrake
species
native
to
the
Mediterranean,
rather

than
two
separate
sexes
of
the
same
plant.
This
exhibition
is
alive
with
tales

of
human
enterprise
and
endeavor.
Elizabeth
Blackwell
illustrated,
engraved,
and
hand-colored
her
*Curious
Herbal*

to
raise
funds
to
have
her
husband,
Alexander,
released
from
a
debtors'
prison.
Alexander

Blackwell
assisted
by
identifying
the
plants
she
had
drawn
at
Chelsea
Physic
Garden
in

London,
until
such
time
as
she
had
absolved
the
debt.

Once
released
he
repaid

his
wife's
kindness
by
leaving
for
Sweden,
entering
the
service
of
King
Frederick
I,

and
getting
himself
executed
for
his
involvement
in
a
political
conspiracy.
The
poignant
copy

of
A
*Curious
Herbal*
on
display
in
*Harry
Potter:*
A
*History
of
Magic*
has

been
annotated
in
Elizabeth
Blackwell's
own
hand.

Some
magical
advice
dispensed
over
the
centuries

now
seems
rather
quaint
in
a
modern
context.
Quintus
Serenus
Sammonicus,
physician
to
the

Emperor
Caracalla,
recommended
that
the
“Abracadabra”

I
N
T
R
O
D
U
C
T
I
O
N

21

charm
should
be
worn
as
an
amulet
around
the
neck,
fixed
with
either

flax,
coral
stones,
or
the
fat
of
a
lion.

An
Ethiopian
charm
for
changing

oneself
into
various
animals,
and
for
which
there
is
no
counter-charm,
reads
as
follows:

*With
red
ink,
write
these
secret
names
on
a
piece
of
white
silk.
To*

*transform
yourself
into
a
lion,
tie
the
silk
to
your
head;
to
become
a*

*python,
tie
it
on
your
arm;
to
turn
into
an
eagle,
tie
it
on*

*your
shoulder.*

Magical
creatures
abound
in
the
Harry
Potter
novels.

Many
of
these
fantastic

beasts
are
J.K.
Rowling's
own
creations,
but
others
have
illustrious
precedents.
Did
you
know

that
the
French
author
Guy
de
la
Garde
devoted
an
entire
study
to
the

phoenix,
entitled
L'Histoire
et
description
du
Phoenix?

The
British
Library's
copy
of
this
book

is
printed
on
vellum
and
contains
a
hand-colored
picture
of
a
phoenix
emerging
from

a
burning
tree.

A
13th-century
bestiary
also
describes
the
“Fenix”
in
great
detail.
According

to
that
manuscript,
this
mythical
bird
is
so
called
because
its
color
is
“Phoenician

purple,”

it

is

native

to

Arabia,

and

it

can

live

for

500

years.

In

old
age,
the
phoenix
is
said
to
create
its
own
funeral
pyre
from
branches

and
leaves,
before
fanning
the
flames
with
its
own
wings,
in
order
to
be

consumed
by
the
fire.

After
the
ninth
day,
it
rises
again
from
the
ashes.

In
the
second
task
of
the
Triwizard
Tournament,
relayed
in
*Harry
Potter
and
the*

*Goblet
of
Fire,*

Harry

I
N
T
R
O
D
U
C
T
I
O
N

23

encountered

a

choir

of

merpeople

in

the

black

lake

at

Hogwarts.

Merpeople

were

also
once
intended
to
feature
at
the
beginning
of
*Harry
Potter
and
the
Chamber*

of
Secrets,
before
the
author
had
a
change
of
mind.

In
a
draft
chapter

subsequently
rewritten

by

J.K.

Rowling,

the

Ford

Anglia

flown

by

Ron

and

Harry

originally

crashed
into
the
lake
rather
than
into
the
Whomping
Willow,
leading
them
to
see

their
first
mermaid:

*Her
lower
body
was
a
great,
scaly
fishtail
the
color
of*

*gun-metal;
ropes
of
shells
and
pebbles
hung
about
her
neck;
her
skin
was
a*

*pale,
silver
y
grey
and
her
eyes,
flashing
in
the
headlights,
looked
dark
and*

threatening.

This
description,
although
never
published,
echoes
historical
accounts
of
mermaids
and
mermen,
creatures

that
were
renowned,
somewhat
sinisterly,
for
luring
people
into
the
sea.

On
loan
from

the
Horniman
Museum
in
London
is
a
specimen
of
a
“real”
merman,
with
large

staring
eyes
and
protruding
teeth.

In
actual
fact
it
is
a
fake.

Scientific
analysis

shows
that
its
head
was
made
by
wrapping
bundles
of
fiber
around
a
stick

of
wood,
coated
with
clay
and
then
covered
with
papier

-

mâché;
the
jaws

and
tail
were
taken
from
a
fish.

No
exhibition
about
the
world
of
Harry

Potter
would
be
complete
without
mentioning
the
most
magical
of
mythical
creatures,
the
unicorn.

Unicorns

—

and

unicorn

blood—played

a

key

part

in

Voldemort's

continued

survival

in

Harry

*Potter
and
the
Sorcerer's*

I

Stone.

The
blood,
hair,
and
horn
of
the
unicorn
have
long
been
supposed

to
have
medicinal
properties,
according
to
medieval
folklore.

In
mythology,
the
creature
came
in

all
shapes
and
sizes.

A
poem
by
the
Byzantine
writer
Manuel
Philes
described
the

unicorn

as

a

wild

beast

with

the

tail

of

a

boar

and

a

lion's

mouth,
while
Pierre
Pomet's
*Histoire
générale
des
Drogues*
illustrated
five
species,
including
one,
somewhat

ironically,
with
two
horns,
known
as
the
pirassoipi.
When
I
discover
a
beautifully
imagined

basilisk
that
has
been
hidden
for
centuries
inside
the
pages
of
a
bestiary,
carefully

unfurl
an
illuminated
scroll
that
promises
to
reveal
the
secrets
of
the
Philosopher's
Stone,

or
breathe
in
the
earthy
pages
of
a
centuries-old
herbal,
my
connection
to
our

magical
past
becomes
tangible
and
real.

Now
I
invite
you
to
share
in
this

rare
enchantment.
Many
treasures
await—whether
you
are
curled
up
on
the
sofa
with
this

book
upon
your
lap
or
exploring
the
exhibition
at
the
New-York
Historical
Society.
As

you
gaze
at
the
astonishing
collection
of
artifacts
in
*Harry
Potter:
A
History
of*

Magic,
we
hope
you
will
be
spellbound
too.

P.S.

You

were

wondering,

of

course,

how

to

make

yourself

invisible.

According

to

one
17th-century
manuscript
entitled
*The
Book
of
King
Solomon
Called
The
Key
of
Knowledge,*

you
simply
have
to
recite
the
following
words.

Go
ahead
and
try,
but
please

don't
blame
us
if
the
charm
doesn't
work!

Stabbon,

In
this

preparatory
sketch

by
Jim
Kay,
Harry
Potter
is
shown
with
his
glasses
taped
up
at
the

bridge
and
dark
hair
that
just
never
would
lie
flat.

He
looks
askance
to

the
side
with
a
cheeky
glint
in
his
eyes,
reminiscent
of
his
father's
mischievous

nature.

At
this
stage,
no
color
has
been
added
to
the
image
because
Kay

often
digitally
layers
color
over
the
original
drawing—we
cannot
see
the
green
color
of

Harry's
eyes,
a
reminder
of
his
mother,
Lily.

Harry
Potter's
youth
and
unworldliness
at

the
beginning
of
the
story
is
captured
perfectly
in
this
image,
but
it
also

looks
like
he
may
be
the
possessor
of
a
wonderful
secret.

Kay's
sketch
invites

us
to
reflect
on
the
development
of
Harry's
character
throughout
the
books,
from
the

wide-eyed
child
to
the
brave
young
man
who
stands
up
against
Lord
Voldemort.

32

*“Jim
Kay's
portrait
brings
to
life
a
young
boy
who
seems
both*

*innocent
and
fragile.*

*His
large,
expressive
eyes,
however,
suggest
a
depth
of
character*

*hidden
beneath
the
surface.*

*We
get
the
feeling
that
there
is
a
lot*

*more
about
Harry
Potter
for
us
to
discover*

Synopsis

Harry Potter lives with his aunt, uncle and cousin because his parents died in a car-crash - or so he has always been told. The Dursleys don't like Harry asking questions; in fact, they don't seem to like anything about him, especially the very odd things that keep happening around him (which Harry himself can't explain).

The Dursleys' greatest fear is that Harry will discover the truth about himself, so when letters start arriving for him near his eleventh birthday, he isn't allowed to read them. However, the Dursleys aren't dealing with an ordinary postman, and at midnight on Harry's birthday the gigantic Rubeus Hagrid breaks down the door to make sure Harry gets to read his post at last. Ignoring the horrified Dursleys, Hagrid informs Harry that he is a wizard, and the letter he gives Harry explains that he is expected at Hogwarts School of Witchcraft and Wizardry in a month's time.

To the Dursleys' fury, Hagrid also reveals the truth about Harry's past. Harry did not receive the scar on his forehead in a car-crash; it is really the mark of the great dark sorcerer Voldemort, who killed Harry's mother and father but mysteriously couldn't kill him, even though he was a baby at the time. Harry is famous among the witches and wizards who live in secret all over the country because Harry's miraculous survival marked Voldemort's downfall.

So Harry, who has never had friends or family worth the name, sets off for a new life in the wizarding world. He takes a trip to London with Hagrid to buy his Hogwarts equipment (robes, wand, cauldron, beginners' draft and potion kit) and shortly afterwards, sets off for Hogwarts from Kings Cross Station (platform nine and three quarters) to follow in his parents' footsteps.

Harry makes friends with Ronald Weasley (sixth in his family to go to Hogwarts and tired of having to use second-hand spellbooks) and Hermione Granger (cleverest girl in the year and the only person in the class to know all the uses of dragon's blood). Together, they have their first lessons in magic - astronomy up on the tallest tower at two in the morning, herbology out in the greenhouses where the

33

THE
JOURNEY

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 1999). The number of people aged 85 and over has increased by 0.5 million.

There is a growing awareness of the need to address the needs of older people in the community. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles:

- Older people should be able to live independently and actively in the community.
- Older people should be able to access the services and facilities they need.
- Older people should be able to participate in the decisions that affect their lives.
- Older people should be able to live in a safe and secure environment.

The strategy also sets out a number of key objectives, including:

- To improve the health and well-being of older people.
- To improve the housing and living conditions of older people.
- To improve the transport and travel facilities for older people.
- To improve the social and cultural life of older people.

The strategy also sets out a number of key actions, including:

- To improve the health and well-being of older people by promoting healthy living and preventing illness.
- To improve the housing and living conditions of older people by providing affordable and accessible housing.
- To improve the transport and travel facilities for older people by providing accessible and reliable transport.
- To improve the social and cultural life of older people by providing opportunities for social and cultural activities.

The strategy also sets out a number of key targets, including:

- To reduce the number of older people who are in poor health.
- To reduce the number of older people who are in poor housing.
- To reduce the number of older people who are in poor transport.
- To reduce the number of older people who are in poor social and cultural life.

The strategy also sets out a number of key indicators, including:

- The number of older people who are in poor health.
- The number of older people who are in poor housing.
- The number of older people who are in poor transport.
- The number of older people who are in poor social and cultural life.

mandrakes and wolfsbane are kept, potions down in the dungeons with the loathsome Severus Snape. Harry, Ron and Hermione discover the school's secret passageways, learn how to deal with Peeves the poltergeist and how to tackle an angry mountain troll: best of all, Harry becomes a star player at Quidditch (wizard football played on broomsticks).

What interests Harry and his friends most, though, is why the corridor on the third floor is so heavily guarded. Following up a clue dropped by Hagrid (who, when he is not delivering letters, is Hogwarts' gamekeeper), they discover that the only Philosopher's Stone in existence is being kept at Hogwarts, a stone with powers to give limitless wealth and eternal life. Harry, Ron and Hermione seem to be the only people who have realised that Snape the potions master is planning to steal the stone - and what terrible things it could do in the wrong hands. For the Philosopher's Stone is all that is needed to bring Voldemort back to full strength and power... it seems Harry has come to Hogwarts to meet his parents' killer face to face - with no idea how he survived last time...

THE
AUTHOR'S

SYNOPSIS

This
is
the
original

synopsis
of
the
first
Harry
Potter
book,
typed
to
accompany
the
opening
chapters
of

*Harry
Potter
and
the
Philosopher's
Stone*
(later
published
as
*Harry
Potter
and
the
Sorcerer's*

Stone
in
the
US)
and
circulated
among
prospective
agents
and
publishers.
With
folded
corners,

tea
stains,
and
crumpled
grip
marks
at
the
bottom,
it
is
a
document
that

has
clearly
been
read
and
handled
a
great
deal.
From
the
very
beginning,
the

lessons
at
Hogwarts
were
part
of
what
makes
Harry
Potter's
world
so
captivating.
In

just
a
few
short
lines,
J.K.

Rowling
makes
learning
magic
sound
like
amazing
fun.

Who
wouldn't
want
to
study
Astronomy
“in
the
tallest
tower
at
two
in
the

morning”
and
Herbology
in
the
greenhouses
“where
the
mandrake
and
wolfsbane
are
kept”?

”

Prior
to
being
accepted
for
publication
in
the
UK

by
Bloomsbury,
the
manuscript
of
*Harry
Potter
and
the
Philosopher's
Stone*
was
famously
offered

to
some
eight
publishers,
all
of
whom
rejected
it.

Nigel
Newton,
founder
and
Chief

Executive
of
Bloomsbury,
took
the
manuscript
home
and
gave
it
to
his
eight-year-old
daughter,

Alice.

Alice

read

the

chapters,

which

went

as

far

as

Diagon

Alley,

and

then

gave
her
verdict,
as
preserved
in
this
charming
note.

For
long
after
she
pestered

her
father
to
bring
home
the
remainder
of
the
manuscript.
Alice's
intervention
was
crucial:

At
the
following
day's
acquisitions
meeting,
Newton
approved
editor
Barry
Cunningham's
proposal
that
The

*Philosopher's
Stone*

be
published
by
Bloomsbury,
leading
to
what
is
widely
regarded
as
the

most
successful
venture
in
children's
publishing
history.

Made
several
years
before
the
publication
of
*The
Philosopher's
Stone,*

this
early
drawing
by
J.K.
Rowling
makes
it
instantly
clear
that
Harry
does
not

belong
in
the
Dursley
family.
The
boy's
baggy
T-shirt
emphasizes
his
frailty
in
comparison

to
his
sturdier
relatives.

Dudley
Dursley
has
been
drawn
with
his
arms
folded
in

a
permanent
sulk
and
a
large
piggy
nose
that
makes
him
appear
particularly
beastly.

Uncle
Vernon
stands
glaring
behind,
while
Aunt
Petunia
protectively
clasps
her
son's
shoulder.
Despite

the
misery
he
experienced
living
at
Privet
Drive,
Harry
is
the
only
person
who

seems
able
to
raise
a
smile.

ARTHUR A. LEVINE BOOKS
AN IMPRINT OF SCHOLASTIC PRESS

December 19, 1997

J.K. Rowling
[REDACTED]
[REDACTED]
[REDACTED]

Dear Joanne,

Greetings from the United States. I hope this letter finds you well, and intact after the holidays! I am looking forward (with some trepidation) to cooking Christmas dinner for 22 people, so the "intact" part is by no means assured for me! And since I'm Jewish, I then have Hanukkah *and* New Years to contend with. It's a lot of celebrating.

But speaking of celebrating: I hope you got the flowers and card I sent about the Smarties Prize. Everyone here was so pleased to hear that you'd won. I hope you've been able to savor the accolades!

We are gearing up for the American publication of your book. I'm scribbling away at catalog copy. We've hired a magnificent artist named Mary Grandpre to do the jacket and small spot illustrations for the chapter openings. The production department has gotten involved, and will be getting special uncoated paper for the jacket to give it a lovely, classic look (and which will make the art and the gold-stamped type we're planning, show up beautifully.) I can't wait to see it come together and to show it to you!

The marketing department is also coming up with plans for the promotion of the book, and they will eventually be in touch with you about your availability for interviews, your willingness to travel, etc.

I am also going over the manuscript to see if there are any places where an American audience might need a word or two of "translation" or explanation. Mostly my attitude about such things is to leave the text as/is unless I think there is a chance for complete incomprehension, or worse, a word that means something quite different in our versions of English (for instance, a "jumper" in the U.S. is a one-piece skirt-and-bib-with-suspenders that only a small girl would wear.) You should receive that manuscript with my questions early in the new year. (Don't worry - there won't be much to do!)

The one question I'd like to pose to you right now, Joanne, is how wedded you are to the title. When I edited the first installment of Philip Pullman's trilogy in the U.S. we changed the title to *THE GOLDEN COMPASS* (it was "Northern Lights" in the U.K.) which had a better reception here. Similarly, I'd like to propose an alternative title for the

[REDACTED]
[REDACTED]

first Harry Potter in the U.S. I like the sound of HARRY POTTER AND THE PHILOSOPHER'S STONE, but those who have heard it so far have found themselves misled into thinking the book will have an obscure, "philosophical" overtone. Chalk it up to idiot Americans, but I think we'd be better off *here* with a title that was a bit more playful (and easier to design)

What do you think of HARRY POTTER AND THE SCHOOL OF MAGIC. I think it has a nice ring to it; it evokes all the fun to come at Hogwarts without giving too much away, and it's a bit of a play on the sense of the word "school" (i.e. both an institution of learning, and a...philosophy as it were!)

Would you mull it over and give me your thoughts? I'll be looking forward to hearing from you, Joanne. I can't tell you how thrilled we are about HARRY.

All the best,

A handwritten signature, likely of J.K. Rowling, consisting of a large, stylized 'J' followed by 'K' and 'R'.

In
December
1997,

seven
months
prior
to
the
publication
of
the
first
Harry
Potter
book
in
America,

Scholastic
editor
Arthur
Levine
wrote
to
the
then
relatively
unknown
British
author
J.K.
Rowling

to
suggest
an
alternative
title.

Concerned
that
the
*Philosopher's
Stone*
title
didn't
perfectly
reflect

the
humor
and
the
wide
range
of
magic
in
the
book
(which
contained
far

more
than
alchemy),
Levine
suggested
changing
the
title
to
a
more
comprehensive
and
playful

one:

*Harry
Potter
and
the
School
of
Magic.*

The
choice
did
not
feel
right

to
the
thirty-two-year-old
author
who
countered
with
*Harry
Potter
and
the
Sorcerer's
Stone,*
a

title
that
would
launch
Potter
mania
in
the
United
States.
The
question
of
changing

the
title
was
resolved
relatively
quickly—in
the
letter
from
Rowling
to
Levine
written
about

a
month
later,
the
*Sorcerer's
Stone*
title
is
already
in
place.
Levine's
School
of

Magic
title
idea
did
not
disappear
altogether.

The
French
edition
of
*The
Philosopher's
Stone,*

for
example,
was
renamed
*Harry
Potter
à
L'école
des
Sorcières.*

Bloomsbury

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major employer of women. In 1980, women made up 40% of the public sector workforce, and by 1995, this figure had risen to 50%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of women in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people with disabilities. In 1980, people with disabilities made up 1% of the public sector workforce, and by 1995, this figure had risen to 3%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people with disabilities in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people from ethnic minorities. In 1980, people from ethnic minorities made up 2% of the public sector workforce, and by 1995, this figure had risen to 5%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people from ethnic minorities in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people from the lower social classes. In 1980, people from the lower social classes made up 10% of the public sector workforce, and by 1995, this figure had risen to 20%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people from the lower social classes in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people from the lower income groups. In 1980, people from the lower income groups made up 10% of the public sector workforce, and by 1995, this figure had risen to 20%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people from the lower income groups in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people from the lower education levels. In 1980, people from the lower education levels made up 10% of the public sector workforce, and by 1995, this figure had risen to 20%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people from the lower education levels in the workforce, and the increasing demand for public services.

The public sector has also become a major employer of people from the lower health status. In 1980, people from the lower health status made up 10% of the public sector workforce, and by 1995, this figure had risen to 20%. This increase has been driven by a number of factors, including the growth of the public sector, the increasing participation of people from the lower health status in the workforce, and the increasing demand for public services.

Forbidden Forest is massive, stretches out to sight.
 Southern approach over lake (castle stands on high cliff above lake/loch) - station's on other side)

To reach the school by stagecoach, go right round lake to front entrance at North.

Giant squid in lake.

Seats all around Quidditch pitch - 3 long poles with hoops on at either end.

There can be other trees/bushes dotted around lawns but Whomping Willows must stand out.

This
annotated
sketch
by
J.K.
Rowling

shows
the
layout
of
Hogwarts
School
of
Witchcraft
and
Wizardry,
complete
with
the
giant

squid
that
lives
in
the
lake.

In
an
accompanying
note
addressed
to
her
editor,

J.K.
Rowling
stated,
“This
is
the
layout
as
I've
always
imagined
it.”
The
sketch

provides
a
vital
stepping-stone
between
the
author's
imagination
and
the
world
she
has
brought

to
life
for
so
many
readers.

Note
how
the
author
insists
that
the
“Whomping

Willow
must
stand
out,”
recognizing
its
significance
in
*The
Chamber
of
Secrets
and
The*

*Prisoner
of
Azkaban.*

This
portrait
of
Professor

Albus
Percival
Wulfric
Brian
Dumbledore
shows
him
gazing
intently
toward
the
right
with
bright

blue
eyes.

A
gargoyle
vase
sits
on
the
table
containing
the
dried
branch
of

the
plant
of
Lunaria
annua
or
“honesty,”
known
for
its
translucent
seedpods.
There
is

also
a
small
flask,
containing
what
might
well
be
dragon's
blood,
referring
to
the

wizard's
achievement
of
discovering
all
twelve
uses
of
the
magical
substance.

Dumbledore's
favorite
sweets,

lemon
drops,
feature
as
one
of
the
passwords
to
his
office.
His
knitting
lies

to
one
side,
the
orange
wool
curling
across
the
table.

Jim
Kay's
portrait
captures

the
complexity
of
Dumbledore's
personality—the
powerful
and
serious
wizard
with
a
penchant
for
sweets

and
knitting.

Professor
Minerva
McGonagall
is

Deputy
Headmistress,
Head
of
Gryffindor
House,
and
Transfiguration
teacher
at
Hogwarts.
Dressed
in
dark

green
with
her
hair
drawn
back
in
a
severe
bun,
this
portrait
captures
her

intelligence
and
no-nonsense
attitude.

Her
glasses
sit
low
on
her
nose,
ideal
for
peering

piercingly
at
students.
She
is
named
“Minerva”
after
the
Roman
goddess
of
wisdom—her
surname

echoes
the
notoriously
bad
Scottish
poet,
William
McGonagall.
Giving
such
a
highly
capable
and

intelligent
character
the
surname
of
a
hopelessly
awful
poet
is
an
example
of
the

humor
and
wit
employed
throughout
the
world
of
Harry
Potter.

R

D

In
the
final
Harry
Potter
novel,
Dumbledore
bequeaths
his
own
copy

of
The
Tales
of
Beedle
the
Bard,
written
in
runes,
to
Hermione
Granger.
It

contains
several
bedtime
stories
told
widely
in
the
magical
world,
equivalent
to
Muggle
fairy

tales
such
as
those
by
Hans
Christian
Andersen
or
the
Brothers
Grimm.
One
particular

story,
“The
Tale
of
the
Three
Brothers,”
plays
a
vital
role
in
helping
Harry,

Hermione,
and
Ron
uncover
three
legendary
magical
objects
known
as
the
Deathly
Hallows—the
Elder

Wand,
the
Resurrection
Stone,
and
the
Invisibility
Cloak.

This
copy
of
*Beedle
the
Bard*

was
handwritten
and
illustrated
by
J.K.
Rowling
and
embellished
with
rhodochrosite
stones,
associated
with

love
and
balance.

It
was
originally
gifted
to
Barry
Cunningham,
who
accepted
the
first

Harry
Potter
book
for
publication
in
the
UK
by
Bloomsbury.

N S M A S T E R

This
formal
portrait
by

Jim
Kay
captures
the
sneering
Professor
Snape
that
Harry
so
mistrusts
in
the
first

book,
but
the
objects
scattered
in
front
of
him
hint
at
his
complex
character

and
his
role
in
the
stories.

①

②

③

④

60

1

The
bottled
mole
signifies
his
role
as
a
spy
for
the
Order
of

the
Phoenix.

2

L
ilies
of
the
valley
by
his
hands
represent
his
enduring
love

for
Harry's
mother,
Lily.

3

S
cissors
refer
to
Sectumsempra,
the
Dark
Magic
spell
Snape

had
invented,
and
might
also
refer
to
the
two
halves
of
his
identity
as
a

double
agent.

4

A
snake
pattern
decorates
his
shirt,
while
a
snake
clasp
pins
his

cloak
at
the
neck.
His
green
cravat
and
the
tabletop
echo
the
color
of
his

house,
Slytherin.
J.K.
Rowling
has
explained
elsewhere
that,
in
the
novels,
Dark
Magic
is
often

represented
by
the
color
green.

Cauldrons
are
one
of
the
most
ancient
and
widely
recognized

symbols
of
magic
in
Western
culture.
Indeed,
to
be
a
strioportius
(witch's
cauldron
carrier)

was
a
punishable
offense
in
6th-century
Salic
law.

All
first-year
students
at
Hogwarts
were

required
to
pack
their
own
cauldron
when
attending
school.
This
enchanted
cooking
pot
is

coated
in
a
black,
tarry
substance.
It
exploded
when
some
Cornish
witches
were
concocting

a
powerful
portion
by
the
sea.
The
group
had
gathered
to
invoke
a
spirit.

One
account
describes
how,
when
“it
was
realized
that
the
volume
of
the
smoke

was
reaching
unprecedented
proportions

.

.

.

they
lost
their
nerve
and
panicked
and

fled
the
spot
as
best
they
could.”

As

early

as

1500

B.C.E.,

the

ancient

Egyptians

recognized

that

glass
was
an
excellent
vessel
for
storing
chemical
substances—it
is
nonabsorbent
and
will
not

adulterate
the
contents.
These
glass
apothecary
jars
used
this
ancient
technology
to
store
a

selection
of
medicinal
ingredients.

Although
the
association
of
cauldrons
with
witches
dates
back
to
at
least
the

6th
century,
this
motif
did
not
gain
widespread
acceptance
until

*On
Witches
and
Female*

Fortune-Tellers

was
published
in
1489.

Ulrich
Molitor's
book
is
the
earliest
illustrated
treatise
on

witchcraft
and
contains
the
first
printed
depiction
of
witches
with
a
cauldron.
This
page

shows
two
elderly
women
placing
a
snake
and
a
rooster
into
a
flaming
pot

in
an
attempt
to
summon
a
hailstorm.
The
book
was
so
widely
reproduced
that

it
helped
to
consolidate
modern
impressions
of
how
witches
were
supposed
to
behave.

OPTIONAL CLASSES

This
medieval
book,
*Ortus
Sanitatis*
("The
Garden
of
Health"),
is
the
first
printed
encyclopedia

of
natural
history,
featuring
sections
devoted
to
plants,
animals,
birds,
fish,
and
stones.
In

this
hand-colored
woodcut
engraving
we
see
a
Potions
master
instructing
a
group
of
students.

He
is
shown
wearing
an
ermine-lined
gray
cloak,
clutching
a
stick
in
his
left

hand,
with
his
assistant
before
him
holding
open
a
book
of
recipes.
It
is

questionable
how
much
attention
the
students
are
paying
to
their
teacher.

Throughout
history,
the
blood,

hair,
and
horns
of
unicorns
were
believed
to
possess
powerful
medicinal
properties.
Because
of

their
rarity,
they
commanded
very
high
prices.

In
*The
Sorcerer's
Stone,*
Voldemort
survives
on

unicorn
blood,
and
potions
are
made
from
“silver
unicorn
horns”
that
in
Diagon
Alley

cost
“twenty-one
Galleons.”

This
18th-century
sign
from
an
apothecary's
shop
features
a
very
handsome

unicorn.

The
expertly
carved
sign
shows
the
prosperity
of
the
apothecary
and
his
ability

to
acquire
precious
and
exotic
cures.
Although
the
ivory
horn
looks
like
it
belongs

to
a
genuine
unicorn,
this
example
is
actually
made
from
a
narwhal's
tusk.
Known

as
the
“unicorn
of
the
sea,”
narwhal
tusks
were
often
sold
and
marketed
in

this
way.

The
mortar
and
pestle,
a
bowl
of
wood
or
metal

with
a
club-shaped
instrument
for
grinding
ingredients
into
a
fine
powder,
was
an
essential

tool
of
apothecaries
and
alchemists.

Hogwarts
students
used
mortars
and
pestles
to
prepare
ingredients

for
potions.
Typical
of
sets
used
in
the
US
during
the
19th
century,
this

mortar
and
pestle
is
made
of
lathe-turned
wood
and
was
used
by
members
of

the
Babcock
family
of
Rhode
Island,
most
likely
for
grinding
herbs
and
spices.
The

metal
herb
grinder
offered
an
even
more
efficient
method:
grasping
the
wooden
handle
with

two
hands
and
rolling
the
heavy,
sharp-edged
cast-iron
wheel
produced
pulverized
potion
ingredients
with

minimal
effort.

This
boat-shaped
device
may
have
been
cast
in
the
New
Jersey
iron

foundry
of
Philadelphia
pharmacist
and
entrepreneur
Clayton
Brown
Rogers.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The number of people in the public sector who are employed in the health sector has increased by 1.2 million, from 1.3 million in 1980 to 2.5 million in 1995.

There are a number of reasons why the public sector has grown so rapidly. One of the main reasons is the increasing demand for health services. The population of the UK is ageing, and this has led to an increase in the number of people who are in need of health services. Another reason is the increasing demand for social services. The number of people who are in need of social services has increased, and this has led to an increase in the number of people who are employed in the public sector.

These
two
pages
show
annotations
by
J.K.
Rowling
and
her
editor
on
a
typed

draft
of
*Harry
Potter
and
the
Half-Blood
Prince.*

The
action
on
the
first
page

takes
place
in
Professor
Slughorn's
class.

The
wizard
presents
a
series
of
potions,
which

Hermione,
naturally,
is
able
to
identify.

The
added
text
marked
by
an
asterisk
reveals

the
smells
that
Hermione
finds
attractive,
including
the
scent
of
“new
parchment.”
The
second

page
is
the
draft
of
a
scene
in
which
Harry
consults
the
Half-Blood
Prince's

copy
of
*Advanced
Potion-Making*
to
find
out
how
to
brew
more
Felix
Felicis.

'It's Veritaserum, a colourless, odourless potion that forces the drinker to tell the truth,' said Hermione.

'Very good, very good!' said Slughorn, beaming at her. 'Now, this one here is pretty well-known... featured in a few Ministry leaflets lately, too... who can -?'

Hermione's hand was fastest once more.

'It's Polyjuice Potion, sir,' she said.

Harry, too, had recognised the slow-bubbling, mud-like substance in the second cauldron, but did not resent Hermione getting the credit for answering the question; she, after all, was the one who had succeeded in making it, back in their second year.

'Excellent, excellent! Now, this one here... yes, my dear?' said Slughorn, now looking slightly bemused, as Hermione's hand punched the air again.

'It's Amortentia!'

'It is indeed. It seems almost foolish to ask,' said Slughorn, who was looking mightily impressed, 'but I assume you know what it does?'

'It's the most powerful love potion in the world!' said Hermione.

'Quite right! You recognised it, I suppose, by its distinctive mother-of-pearl sheen?'

'And the steam rising in characteristic spirals,' said Hermione. *

'May I ask your name, my dear?' said Slughorn, ~~but he was~~ ignoring these signs of embarrassment.

'Hermione Granger, sir.'

'Granger? Granger? Can you possibly be related to Hector Dagworth-Granger, who founded the Most Extraordinary Society of Potioneers?'

'No, I don't think so, sir. I'm Muggle-born, you see.'

* 'and it's supposed to smell differently to each of us, according to what attracts us, and I can smell freshly-mown grass and new parchment and -'
But she turned slightly pink and did not complete her sentence
Harry took

T
H
E
B
E
Z
O
A
R
G
O

A
T
In
his
very
first
Potions
lesson,
Professor
Snape
asked
Harry
Potter,

“where
would
you
look
if
I
told
you
to
find
me
a
bezoar?”
Bezoars

are
a
mass
of
undigested
fiber
formed
in
the
stomach
of
animals,
and
were

once
believed
to
be
an
antidote
to
poison.
They
have
been
found
in
the

guts
of
cows
and
even
elephants,
but
mostly
they
come
from
the
“bezoar
goat.”

Bezoars
were
first
introduced
into
medieval
Europe
by
Arab
physicians.
Although
doubts
were
sometimes

cast
over
their
properties,
the
demand
continued
well
into
the
18th
century.
Wealthy
collectors

spent
considerable
sums
to
acquire
the
best
“stones,”
which
were
kept
in
elaborate
cases.

According
to
A
Compleat
History
of
Druggs,
first
published
in
French
in
1694,
the

medicinal
strength
of
the
bezoar
depended
on
the
animal
that
produced
it.

“Bezoar
Stones

taken
from
Cows,”
for
instance,
“have
nothing
near
the
good
Qualities”
of
the
true

bezoar
goat.
On
the
other
hand,
a
mere
two
grains
of
“the
Bezoar
that

is
found
in
Apes”
will
have
a
far
greater
effect
than
that
of
a

mere

goat.

In

The

Half-Blood

Prince,

Harry

put

his

learning

to

good

effect.

In

his
copy
of
*Advanced
Potion-Making*,
Harry
had
noticed
the
instruction,
“Just
shove
a
bezoar

down
their
throats.”

He
did
exactly
that
when
Ron
Weasley
drank
some
poisoned
mead,

thereby
saving
his
friend's
life.

The
Ripley
Scroll

is

the

name

given

to

a

mystical
alchemical

treatise
that
features
a
series
of
verses
about
the
Elixir
of
Life.
The
scroll

takes
its
name
from
George
Ripley,
a
canon
at
Bridlington
Priory
in
Yorkshire
and

a
skilled
alchemist.
Ripley
had
reportedly
studied
alchemy
in
Italy
and
at
the
University

of
Louvain
in
modern-day
Belgium.
He
subsequently
wrote
a
book
on
how
to
make

the
Philosopher's
Stone,
known
as
*The
Compound
of
Alchymy.*

This
manuscript
is
based
on

Ripley's
teachings,
and
stretches
almost
six
meters
in
length.
It
features
beautiful
illustrations
of

dragons,
toads,

Perhaps

the

most

beautiful

of

all

illuminated

manuscripts

about

alchemy,

this

book
contains
the
work
known
as
*Splendor
Solis*
or
“Splendor
of
the
Sun.”
The

authorship
is
unknown,
but
it
has
often
been
attributed
in
error
to
Salomon
Trismosin,

a
man
who
claimed
to
have
used
the
Philosopher's
Stone
to
conquer
old
age.

This
page
shows
an
alchemist
holding
a
flask
filled
with
a
golden
liquid.
A

black
scroll
emerges
out
of
the
flask,
inscribed
with
the
words
“*Eamus
quesitum
quatuor*

*elementorum
naturas,”*

Latin

for

“Let

us

ask

the

four

elements

of

nature.”

“The

splendid

gold
border
on
this
page
is
equally
as
impressive
as
the
portrait
in

*the
center.
The
frame
has
been
painstakingly
decorated
with
pictures
of
flowers,
birds,*

*and
animals—among
them
a
peacock,
a
stag,
and
an
owl.”*

Abû
al-Qâsim
Muhammad

ibn
Ahmad
al-‘Irâqî
was
an
author
of
books
on
alchemy
and
magic,
and
lived
in

Egypt
in
the
13th
century.

His
*Book
of
the
Seven
Climes*

is
the
earliest

known
study
focused
wholly
on
alchemical
illustrations.
This
picture
was
supposedly
taken
from
a

“Hidden
Book”
attributed
to
Hermes
Trismegistus,
a
legendary
sage-king
of
ancient
Egypt,
believed
to

have
mastered
the
secrets
of
alchemy
and
recorded
them
in
hieroglyphs
on
the
walls

of
tombs.

Al

-

‘Irâqî

gave

each

element

an

alchemical

interpretation,

but

in

fact

this
illustration
holds
no
such
meaning!
Unbeknownst
to
al-‘Irâqî,
the
picture
actually
depicts
an

ancient
monument
erected
in
memory
of
King
Amenemhat
II,
who
ruled
Egypt
around
1922–1878

T
In
The
Sorcerer's
Stone,
Harry,
Hermione,
and
Ron
spent
considerable
time
in
the

library
at
Hogwarts
trying
to
identify
a
certain
Nicolas
Flamel.
Eventually,
Hermione
pulled
out

an
old
book
she
had
put
aside
for
a
bit
of
light
reading.
““Nicolas

Flamel,'
she
whispered
dramatically,
'is
the
only
known
maker
of
the
Sorcerer's
Stone!'"

According

to
Hermione's
book,
Flamel
was
a
noted
alchemist
and
opera-lover,
aged
665,
who
lived

quietly
in
Devon
with
his
wife,
Perenelle.
Eventually,
he
agreed
with
his
friend
Albus

Dumbledore
that
the
Sorcerer's
Stone
should
be
destroyed.
Flamel
and
his
wife
had
“enough

Elixir
stored
to
set
their
affairs
in
order”
before
finally
being
laid
to
rest.

In
reality,
Flamel
spent
his
life
in
medieval
Paris
and
was
a
landlord,
sometimes

said
(incorrectly)
to
have
been
involved
in
the
book
trade.

The
watercolor
illustration
pictured

shows
a
memorial
to
the
Holy
Innocents
commissioned
by
Nicolas
and
Perenelle,
with
the

Flamels
praying
at
the
top
beside
two
saints.

At
his
reputed
death
in
1418,

he
was
buried
in
the
church
of
Saint-Jacques-de-la-Bouch
in
Paris,
his
grave
marked
by

a
small
tombstone
showing
Christ
flanked
by
Saints
Peter
and
Paul,
along
with
the

Sun
and
the
Moon,
and
the
deceased
lying
below
the
main
inscription,
carved
in

French.

88

Flamel's
reputation
as
an
alchemist
derives
ultimately
from
posthumous
accounts
of
his
life.

According
to
these
16th-
and
17th-century
legends,
Flamel
had
a
prophetic
dream
that
led

him
to
discover
a
rare
manuscript
revealing
the
true
composition
of
the
Philosopher's
Stone

(known
as
the
Sorcerer's
Stone
in
the
American
editions
of
the
Harry
Potter
novels).

First
published
in
Germany
in
1735,
the
Uraltes
Chymisches
Werck
("Age-Old
Chemical
Work"),
reputedly

by
the
rabbi
Abraham
Eleazar,
claimed
to
be
a
translation
of
this
lost
text.

In
the
picture
that
follows,
a
serpent
and
a
crowned
dragon
form
a
circle,

head-to-tail.

This

is

a

common

alchemical

illustration,

which

symbolizes

the

unification

of

materia

(primary

matter)
with
spiritus
universalis
(the
universal
spirit).
This
unification
was
considered
essential
in
the

creation
of
the
Stone.

“Nicolas

Flamel

is

a

fascinating

character—an

intersection

in

history

*between
myth,
legend,
and
the
magic
of
Harry
Potter.
Almost
ever
ything
we*

P O T I O N S A N D A L C H E M Y

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. This will put pressure on the environment and on the world's food supply.

One way to meet this demand is to increase the amount of food that is produced. This can be done by using more land for agriculture.

Another way to meet this demand is to increase the efficiency of food production. This can be done by using better farming techniques.

Both of these methods have their own problems. Increasing the amount of land used for agriculture can lead to deforestation and loss of biodiversity.

Increasing the efficiency of food production can lead to the use of more pesticides and fertilizers, which can harm the environment.

One solution is to use sustainable farming techniques. These techniques use natural resources in a way that does not harm the environment.

Sustainable farming techniques can help to meet the world's growing demand for food while also protecting the environment.

There are many other ways to meet the world's growing demand for food. It is important to find a solution that works for everyone.

One way to do this is to work together. Governments, farmers, and consumers all have a role to play in finding a solution.

By working together, we can find a way to meet the world's growing demand for food while also protecting the environment.

This is the only way to ensure that everyone has enough to eat in the future.

It is our responsibility to make sure that the world's food supply is sustainable for the future.

We must take action now to protect the world's food supply for the future.

Let's work together to make sure that everyone has enough to eat in the future.

It is our responsibility to make sure that the world's food supply is sustainable for the future.

We must take action now to protect the world's food supply for the future.

Let's work together to make sure that everyone has enough to eat in the future.

It is our responsibility to make sure that the world's food supply is sustainable for the future.

We must take action now to protect the world's food supply for the future.

Let's work together to make sure that everyone has enough to eat in the future.

It is our responsibility to make sure that the world's food supply is sustainable for the future.

We must take action now to protect the world's food supply for the future.

Let's work together to make sure that everyone has enough to eat in the future.

It is our responsibility to make sure that the world's food supply is sustainable for the future.

We must take action now to protect the world's food supply for the future.

Let's work together to make sure that everyone has enough to eat in the future.

OPTIONALS AND ALCHEMY

93

A

L

L

I

S

L

O

S

T

In

this

satirical
engraving,
the
seated
alchemist
uses
tongs
to
grasp
a
crucible
in
one
hand

while
with
the
other
he
drops
a
coin
(his
last?)
into
another
vessel.
Behind

him,
his
wife
searches
for
a
coin
in
her
empty
purse,
while
their
three

unruly
children
scramble
in
an
empty
larder
above
and
a
fool
fans
the
flames

in
a
brazier.

At
the
right,
a
heavily
robed
scholar
reads
instructions
from
a

manual
inscribed
Alghe-Mist,
a
pun
in
Flemish
on
the
word
“alchemist”,
meaning
“all
is

lost.”

Through

the

window

is

a

vignette

showing

the

destitute

alchemist,

his

wife,

and

their
three
children
entering
the
poorhouse.
Philip
Galle
based
this
engraving
on
a
1558

drawing
by
Pieter
Bruegel.
In
Bruegel's
day,
alchemy
was
a
recurrent
theme
in
Dutch

and
Flemish
genre
painting.
The
print's
Latin
inscription
is
probably
an
impossible
riddle
just

like
the
quest
for
the
Philosopher's
Stone.

In

Greek
mythology,
Cerberus
is

a
monstrous
three

-

headed

dog
that
guards
the
gates
of
the
Underworld
and
prevents
dead
souls
from
escaping.

Cerberus
is
primarily
known
for
his
capture
by
Hercules.
Descending
into
Hades
and
capturing

the
mythical
canine
is
the
final
and
most
daunting
of
Hercules's
twelve
Labors.
In

Sadeler's
engraving,
the
strongman
Hercules
wears
his
characteristic
lion-skin,
the
prize
he
garnered
from

his
first
Labor,
the
slaying
of
the
Nemean
Lion.
Holding
a
club
in
one

hand
and
three
chains
leashing
the
trio
of
snarling
heads
in
the
other,
he

drags
Cerberus
away
from
the
licking
flames
at
the
entrance
to
Hades.
After
his

harrowing
of
Hell,
Hercules
delivers
the
horrific
hound
to
Eurystheus,
king
of
Argos
and

supervisor
of
his
twelve
Labors,
after
which
he
returns
the
monster
to
the
Underworld.

97
SEEING
GUFF

Y
In
this
original
drawing
by
J.K.
Rowling,
Neville,
Ron,
Harry,
Hermione,
and
“Gary”

(later
renamed
Dean
and
cut
from
this
scene)
are
faced
with
a
terrifying,
huge

three-headed
dog.
Each
student
has
a
detail
appropriate
to
their
character—note
Neville's
bunny
pajamas,

Ron's
freckles,
and
Hermione's
large
front
teeth.

This
early
drawing
shows
us
how
the

characters
might
have
appeared
in
the
author's
mind.

Originally
designed
to
be
part
of

Chapter
Seven,
“Draco's
Duel,”
this
scene
eventually
became
Chapter
Nine
and
was
renamed
“The

Midnight
Duel.”
Only
Hermione
has
the
composure
to
spot
that
“Fluffy”
is
guarding
a

trapdoor,
leading
Harry
to
realize
that
they
have
found
the
hiding
place
of
Hagrid's

mysterious
package
from
Gringotts
vault
713.

QUIRREL AND

T
H
E
S
O
R
C
E
R
E
R

!

S
S
T
O
N
E

This
handwritten
draft
of
“The

Man
with
Two
Faces”,
Chapter
Seventeen
of
*The
Sorcerer's
Stone*,
shows
J.K.
Rowling's
writing

in
ballpoint
pen
on
unlined
paper.
While
you
can
see
some
small
deletions
in

the
text,
much
of
the
dialogue
in
this
early
draft
remains
the
same
as

the
published
text.

On
discovering
that
Professor
Quirrell
was
behind
the
attempts
to
steal

the
Sorcerer's
Stone,
not
Snape
as
he
had
suspected,
Harry
is
given
this
defiant

line:

“You

haven't

got

the

stone

yet

[

...

]

Dumbledore

will

be

here

soon.

He'll
stop
you.”

This
and
Quirrell's
next
line
were
cut
during
the
editorial

process,
in
which
the
confrontation
was
reorganized.

In
the
published
version,
Quirrell
discloses
that

he
had
let
the
troll
into
the
school
immediately
after
he
had
bound
Harry

in
ropes.

“J.K.

Rowling

has

expressed

how

much

she

loves

writing

dialogue,

and

*this
draft
shows
how
small
changes
in
dialogue
can
have
a
powerful
effect*

*on
characterization.”*

Chapter Seventeen
The Man with Two Faces.

It was Quirrell.

"You!" said Harry.

Quirrell smiled, and his face wasn't twitching at all.

"Me," he said calmly.

"But I thought - Snape -"

"Severus?" Quirrell laughed and it wasn't his usual quivering treble either, but cold and sharp. "Yes, Severus does seem the type, doesn't he? So useful to have him swooping around like an overgrown bat. Next to him, who would suspect me? P - p - poor st - st - stuttering ~~the~~ P - P - Professor Quirrell."

"But he tried to kill me -"

"No, no, no," said Quirrell. "I was trying to kill you. Your friend Miss Granger accidentally knocked me over as she rushed to set fire to Snape. It broke my eye contact with you. Another ~~few~~ few seconds and I'd have got you off that broom. I'd have maraped it before her if Snape hadn't been muttering a counter-curse, trying to save you."

"He was trying to save me?"

"Of course," said Quirrell coolly. "Why do you think he wanted to referee your next match? He was trying to make sure I didn't do it again. Funny, really... he needn't have bothered. I couldn't do anything with Dumbledore watching. All the other teachers thought Snape was trying to ~~stop~~ stop Gryffindor winning, he did make a fool of himself... ~~and he needn't have bothered~~ ^{after all that} and what a waste of time, when ~~he said~~ I'm going to kill you ~~tonight~~ tonight."

Quirrell snapped his fingers. Ropes sprang out of thin air and wrapped themselves tightly around Harry.

"Now, you wait there, Potter, while I examine this interesting mirror -"

It was only then that Harry realised what was standing behind Quirrell. It was the Mirror of Erised.

"You haven't got the stone yet -" said Harry desperately. "Dumbledore will be here soon, he'll stop you -"

"For someone who's about to die, you're very talkative, Potter," said Quirrell, feeling his way around the Mirror's frame. "This mirror is the key to finding the stone, it won't take me long - and Dumbledore's in London, I'll be ~~long~~ gone far away by the time he gets here -"

All Harry could think of ~~was~~ was to keep Quirrell talking.

"~~But~~ That troll at Halloween -"

"Yes, I let it in. I was hoping ~~some~~ some foolhardy student would get themselves killed by it, to give me time to ~~get to~~ the Stone. Unfortunately, Snape found out. I think ~~see~~ see what your guardship

Rowling

!

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has become a major employer in the UK, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a key factor in the overall growth of the economy. that ghost with his head ~~to go off~~ the loose head tipped him off. Snape came straight to the third floor corridor to head me off ... and you didn't get killed by the troll! That was why I tried to finish you at the Quidditch match - but blow me if I didn't fail again."

Quirrell rapped the Mirror of Erised impatiently.

"Draughts trip ... trust Dumbledore to come up with something like this ..." He stared ^{with} into the mirror. "I see the stone," he said. "I'm presenting it to my Master ... but where is it?"

He went back to feeling his way around the mirror.

B A ~~sudden thought struck~~ Harry's mind was racing. ^{at his} "What I want more than anything else in the world is to know," he thought, "Is to find the stone before Quirrell does. So if I look in the mirror, I should see myself finding it - which means I'll see where it's hidden. But how can I look without him realising what I'm up to? I've got to play for time..."

"I saw you and Snape in the forest," he blurted out.

"Yes," said Quirrell idly, walking around the mirror to look at his back. "He was ~~into~~ me. Trying to find out how far I'd got. He suspected me all along. Tried to fight me - as though he could scare me, ^{they had} ~~with the~~ Lord Voldemort ~~backed me~~ on my side."

"But Snape always seemed to hate me so much -"

"Oh, he does," Quirrell said casually. "Heavens, yes."

"He was at ~~that~~ Hogwarts with your father, didn't you know? They loathed each other. But he ~~didn't~~ didn't want you dead."

"And that warning burned into my bed -"

"Yes, that was me," said Quirrell, now ~~feeling~~ feeling the mirror's claimed feet. "I heard you and Weasley in my class, talking about Philosopher's Stones. I ~~thought~~ thought you might try and interfere. ~~See~~ Pit! you didn't heed my warning, is it? Curiosity has led you to your doom, Potter."

"But I heard you a few days ago, ~~sobbing~~ sobbing - I thought Snape was threatening you -"

For the first time, a spasm of fear flitted across Quirrell's face.

"Sometimes -" he said, "I find it hard to follow my Master's instructions - he is a great man and I am weak -"

"You mean he was there in the classroom with you?" Harry gasped.

"He is with me wherever I go," said Quirrell softly.

"I met ~~him~~ with him when I ^{travelled} ~~travelling~~ round the world, a ^{ridiculous ideas} ~~foolish~~ foolish young man, full of ~~ideas~~ about good and evil. Lord Voldemort showed me how wrong I was. There is no good and evil. There is only power, and those too weak to seek it ... Since then, I have served him faithfully, though I have let him down many times. He has ^{had to be} ~~been~~ very hard on me." Quirrell shuddered suddenly. "He does not forgive mistakes easily. When I failed to steal the stone from

classes
at
Hogwarts

took
place
in
the
greenhouses
on
the
castle
grounds.
This
is
a
meticulous
drawing

by
Jim
Kay
of
one
of
the
Herbology
greenhouses,
showing
the
structural
sections
and

glass
panels.
The
artist
once
worked
at
Kew
Gardens
in
London,
where
the
Palm

House,
the
Temperate
House,
and
the
Alpine
House
proved
good
sources
of
inspiration
for

these
drawings.
They
are
excellent
examples
of
specialized
greenhouses
designed
to
provide
varying
environments

for
plants.

*“The
greenhouses
in
Kay's
vision
are
clearly
designed
around
the
plants’*

*needs—some
hang,
some
will
creep
up
walls,
some
will
grow
in
water,
others*

*spread
out
in
the
shade.”*

J.K.

Rowling

J.K.
Rowling's
early
drawing
of
Professor
Sprout,
made
eight
years
before
the
publication

of
*Harry
Potter
and
the
Sorcerer's
Stone,*
shows
the
character
surrounded
by
the
plants

studied
in
her
Herbology
class.

At
Hogwarts,
Herbology
included
the
study
of
normal
plants

as
well
as
magical
ones.

Are
the
tendrils
spreading
from
one
of
the
pots

actually
sneaky
Venomous
Tentacula,
looking
for
something
to
chew
on?

Professor
Sprout
herself
is

pictured
in
her
witch's
hat,
with
a
spider
hanging
from
its
tip,
handy
for

keeping
her
greenhouses
free
from
plant-eating
insects.

R
B
A
L

When
seeking
inspiration
for
naming
her
herbs
and

potions,
J.K.
Rowling
used
the
herbal
of
the
apothecary
Nicholas
Culpeper.
The
book
was

first
published
in
1652

as
*The
English
Physician.*

It
has
subsequently
appeared
in
over

a
hundred
editions,
and
was
the
first
medical
book
to
be
published
in
North

America.
Culpeper's
herbal
provides
a
comprehensive
list
of
native
medicinal
herbs,
indexed
against
specific

illnesses,
and
prescribes
the
most
effective
forms
of
treatment
and
when
to
take
them.

Culpeper
was
an
unlicensed
apothecary,
disliked
by
the
medical
profession,
who
jealously
guarded
their

monopoly
to
practice
medicine
in
London.
He
came
into
conflict
with
the
College
of

Physicians,
and
in
1642
was
apparently
tried,
but
acquitted,
for
practicing
witchcraft.

Herbology
is

a
mandatory
subject
taken
by
all
students

at
Hogwarts,
reflecting
the
importance
of
plants
to
magic,
medicine,
and
herbal
lore.
These

gardening
implements,
made
from
bone
and
antler,
were
used
by
practitioners
of
magic
specifically

for
sowing
and
harvesting
plants.

It
was
essential
that
these
tools
were
formed
entirely

from
natural
resources
so
they
did
not
corrupt
the
plants
being
harvested.
The
materials

also
had
symbolic
importance.

Tools
shaped
from
antlers,
which
rise
upward
above
the
head,

were
considered
to
connect
the
Earth
with
the
higher
spirit
world.
As
antlers
are

shed
and
regrown
annually,
they
symbolize
the
magic
of
regeneration
and
renewal.

*“Tools
like*

*these
have
been
used
for
thousands
of
years.*

*Many
plants
are
harvested
not*

*only
for
their
medicinal
qualities,
but
for
their
alleged
supernatural
powers—in
such
cases,*

*the
rituals
involved
in
gathering
them
are
extremely
important.”*

REMEDY FOR SIN

A
K
E
B
I
T
E

What
was
one
of
the

most
effective
remedies
for
snakebite?

This
12th-century
manuscript
advises
the
afflicted
to
seek
out

two
plants
known
as
Centauria
major
and
Centauria
minor.

The
“greater”
and
“lesser”
centaury

were
named
after
the
ancient
Greek
centaur
Chiron.

In
Greek
mythology,
Chiron
was
renowned

as
a
physician,
astrologer,
and
oracle.

Among
his
pupils
was
Asclepius,
the
god
of

medicine
and
healing,
who
had
been
rescued
as
a
baby
and
was
taken
to

Chiron

to

be

reared.

In

this

pen

and

ink

drawing,

Chiron

is

shown

handing

over
the
two
plants
to
the
toga-wearing
Asclepius.

A
snake
can
be
seen
slithering

away
from
under
their
feet.

Y
D
R
A
G
O
N

A
N
D
S
E
R
P
E
N
T

During
the

Middle
Ages,
many
scholars
compiled
manuscripts
for
their
own
practical
use,
recording
and
illustrating

the
properties
of
individual
plants.

This
magnificently
decorated
herbal
was
made
in
Lombardy,
northern

Italy,
around
the
year
1440.

It
was
most
probably
compiled
for
a
wealthy
landowner.

Each
page
has
been
filled
with
lifelike
drawings
of
plants
and
short
notes
explaining

their
names.

On
the
second
page
we
can
see
snakeroot.
The
author
has
recorded

some
of
the
species'
Latin
names
beside
it—“*Dragontea*,”
“*serpentaria*,”
and
“*viperina*”
reveal
the
plant's

ability
to
cure
snakebite.

A
hissing
green
serpent
can
also
be
seen
curling
around

the
plant's
root.

A
snarling
dragon
called
in
Latin
“*Draco
magnus*”
is
perched
to

its
left,
painted
with
a
forked
tongue
and
an
elaborately
knotted
tail.

*“The
term*

*‘snakeroot’
is
applied
today
to
various
plants
with
medicinal
qualities,
such
as
plantain.*

*A
poultice
of
plantain
applied
to
a
wound
is
widely
believed
to
accelerate*

*the
healing
process.”*

Curious

Herbal

is

a

book

with

a

remarkable

history.

This
work
was
illustrated,
engraved,
and
hand-colored
by
Elizabeth
Blackwell
in
order
to
raise

funds
to
have
her
husband,
Alexander,
released
from
a
debtors'
prison.
The
book
was

issued
in
weekly
parts
between
1737
and
1739,
and
contained
images
of
500
of

“the
most
useful
plants,
which
are
now
used
in
the
practice
of
physick.”
Elizabeth

made
her
drawings
at
Chelsea
Physic
Garden
in
London
and
then
took
her
drawings

to
Alexander
in
prison,
where
he
identified
the
plants
in
question.
Although
the
venture

raised
enough
income
to
secure
Alexander's
release,
he
eventually
left
for
Sweden,
where
he

was
executed
for
treason,
having
become
involved
in
a
political
conspiracy.
Elizabeth
died
alone

in
England
in
1758.

GERARD
'
SHER

B

A

L

John

Gerard

was

an

English

herbalist,

whose

most

famous

work

was
entitled
*The
Herball
or
Generall
Historie
of
Plantes.*

Gerard
maintained
his
own
garden

in
Holborn,
London.
He
cultivated
all
manner
of
plants
there,
including
exotic
specimens
such

as
the
recently
discovered
potato.

*The
Herball*
contains
more
than
1,800
woodcut
illustrations.
Only

sixteen
of
these
were
actually
original
to
Gerard's
work,
the
remainder
having
been
taken

(without
acknowledgment)
from
a
book
printed
in
Germany
six
years
previously.
The
final
woodcut

in
the
book
illustrates
“the
tree
bearing
geese”—a
tree
that
supposedly
grew
goose
embryos

inside

its

fruit.

Gerard

claimed

to

have

seen

one

of

these

in

Lancashire,

England.

For
hundreds
of
years,
apothecaries,
professors,

and
ardent
students
of
botany
have
diligently
pressed
and
preserved
plants
in
so-called
“dried

gardens”

or

horti

sicci.

This

practice

allowed

for

the

plants

to

be

studied

and

researched
regardless
of
the
change
of
seasons
or
garden
accessibility.
Around
the
turn
of

the
18th
century—with
new
plant
classification
systems
shaking
scientific
circles—loose-leaf
pages
became
the
preferred

method
of
preserving
plants
and
recording
their
data,
and
allowed
for
rearrangement
and
easy

comparison.

The

pressed

plant

on

the

next

page

seems

to

be

Adonis

vernalis,

or

fake
hellebore.
Though
the
plant
contains
toxic
substances,
the
aboveground
parts
of
the
plant

have
been
used
in
folk
medicinal
remedies
for
fever
and
intestinal
worms.

In
the

magical
world
of
Harry
Potter,
hellebore
is
a
primary
ingredient
in
the
Draught
of

Peace.

Commissioned

in

1611

by

Johann

Konrad

von

Gemmingen,

Prince

Bishop

of
Eichstätt
in
Bavaria,
the
Hortus
Eystettensis
is
a
magnificent
catalog
of
the
plants

grown
in
the
bishop's
palace
garden.
The
book
was
produced
by
Basilus
Besler,
a

botanist
from
Nuremberg,
who
supervised
both
the
garden
and
the
artists
who
drew
the

plants.
This
book
was
a
major
undertaking,
with
the
flowers
having
to
be
illustrated

as
they
bloomed
throughout
the
seasons.

It
contains
367
engravings
and
was
printed
on

the
largest
paper
then
available.

Harry
Potter
may
have
forgotten
the
hellebore
in
his

Draught
of
Peace,
but
it
was
well
known
to
Besler,
who
cultivated
several
varieties

of
the
plant
in
the
garden.

One,
Helleborus
niger
(black
hellebore),
had
been
used

as
a
medicine
since
antiquity,
although
today
it
is
considered
a
poison.

筠筍

筠筍開實本草始著錄湖南山中有之雲南圖尤多根大者
重十餘斤形如芋而扁發芽宛似笋箨漸長色黑黃斑駁如葉
梢開三杈杈上分枝舒葉如芥菜葉春初忽有抽莖上作一長
苞小者如錐大者如巨燭而擢上色黑紫深皺內空穉似鋪粉
絮蓋其花也花下有附如斜旗形外版內赤說狀可駭旬餘即
萎湘中曰鬼芋一曰屠芋滇曰鬼廟又曰軟菜秋冬間採根拭
去粗皮磨研成漿煮之用火已攪和不令成餅俟熟用石灰水
熬之待凝盡成塊味甘滑其芽又名鬼喜五六月間以竹竿拍

THE
TEMPLE
OF

F
L
O
R
A

Described
as

a
“visually
magnificent
failure,”
this
elaborate

book
on
botany
nearly
bankrupted
its
author,
the
physician
and
botanist,
Robert
John
Thornton.

Using
a
range
of
modern
printing
techniques,
Thornton
employed
teams
of
master
engravers
and

colorists
to
reproduce
highly
dramatized
paintings
of
flora
from
across
the
world.
Thornton's
timing

was
unfortunate,
however:

War
with
France
brought
higher
taxes
and
meant
that
the
target

audience
(the
wealthy)
had
less
disposable
income
for
such
an
expensive
book.
Despite
being

granted
a
license
from
Parliament
to
hold
a
fund-raising
lottery,
Thornton
never
recovered
his

investment.

A MANDRAKE ROOT
(ENGLAND, 16TH OR
17TH CENTURY)
Science Museum

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.1 million (Office of National Statistics 1999). The number of people aged 85 and over has increased by 0.5 million.

There is a growing awareness of the need to develop services to meet the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the community; and older people should be able to access the services they need.

The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the community; and older people should be able to access the services they need. The strategy is based on the following principles: older people should be able to live independently, safely and comfortably; older people should be able to participate in the community; and older people should be able to access the services they need.

A
M
A
N
D
R
A
K
E
R
O

O

T

Harry

and

his

friends

first

came

face-to-face

with

a

mandrake

in

Greenhouse
Three,
which
contained
the
most
“interesting
and
dangerous
plants”
at
Hogwarts.
As
Hermione

Granger
immediately
knew,
“Mandrake,
or
Mandragora,
is
a
powerful
restorative
[
...
]
used

to
return
people
who
have
been
transfigured
or
cursed,
to
their
original
state
[

...

]

The
cry
of
the
Mandrake
is
fatal
to
anyone
who
hears
it.”

While
the
mandrakes
encountered
by
Harry,
Hermione,
and
Ron
are
still
young,
this
specimen

has
the
appearance
of
a
bearded
old
man.

The
resemblance
of
mandrakes
to
the

human
form
has
influenced
many
cultures
over
the
centuries.
In
reality,
the
mandrake's
root

and
leaves
are
poisonous,
and
it
can
induce
hallucinations.

According
to
medieval
herbals,

mandrakes
were
said
to
cure
headaches,
earache,
gout,
and
insanity,
among
other
ailments.
Harvesting

them,
however,
has
long
been
deemed
an
extremely
hazardous
business.

The
best
way
to

obtain
the
plant
safely
was
to
unearth
its
roots
with
an
ivory
stake,
attaching

one
end
of
a
cord
to
the
mandrake
and
the
other
to
a
dog.

The
dog
could
be
encouraged
to
move
forward
by
blowing
a
horn,
dragging
the

mandrake
with
it.

The
sound
of
the
horn
would
also
serve
to
drown
out

the
plant's
terrible
shriek.

“A
macabre
feature
of
the
mandrake
in
the
foreground

*of
this
image
is
the
two
severed
hands
growing
out
of
its
stems.*

*These
symbolize
the
plant's
use
as
an
anesthetic
during
amputations.”*

This
illuminated
manuscript
contains
an
Arabic
version
of
Books
Three
and

Four
of
De
materia
medica
("On
medical
material"),
originally
written
in
Greek
by
Pedanius

Dioscorides.
Dioscorides
was
a
botanist
and
pharmacologist,
working
as
a
physician
in
the
Roman

army.

The
manuscript
contains
no
fewer
than
287
color
illustrations
of
plants,
together
with

spaces
left
blank
for
a
further
52
drawings.
Dioscorides
was
one
of
the
first

authors
to
distinguish
between
the
male
and
female
mandrake,
as
shown
here.
One
should

almost
refer
to
them
as
the
“mandrake”
and
“womandrake.”
However,
this
identification
is
miselading;

Dioscorides
had
actually
identified
two
different
species
of
mandrake
native
to
the
Mediterranean.

مكون له ساق **وَالصَّنْفُ** الآخر يُعرف بالذكر وهو
 أبيض ويبقأ له مورنون وله ورق أبيض الملتص بكبار عراض
 شبيه بورق المسلق في شكله ولعاجه أضعف من ليلج الصنف
 الأول ولونه شبيه بلون الغفران طيب الرائحة مع ثقل ويأكله
 الرعاة فيعرض لهم من ذلك شيء يسير من السبات وله أصل شبيه
 بأصل الصنف الأول إلا أنه أكبر من الصنف الأول وأبيض منه
 وهذا الصنف ليس له ساق وقد يستخرج عصارة فصار هذا
 الصنف وهو طري أن يذق العشر ويصير تحت شيء ثقيل
 ويسقى أن سحق العصارة وحرر بعد أن شق وترفع في إناء من خرف

Die von erster Künstlerhand geschaffenen Gnomen-Figuren, auf deren Modellirung und Bemalung die allergrösste Sorgfalt verwandt ist, sind ein origineller und überraschender Schmuck für Gärten und besonders für Gartenanlagen und für Gebüsch in der Nähe der Sitzplätze. Es ist namentlich Wert darauf gelegt, dass unschöne oder gar hässliche Gesichtsförmungen vermieden wurden, damit diese Figuren einen ihrer hauptsächlichsten Bestimmungszwecke: den Kindern Freude zu machen, nicht verfehlen. Die Bemalung kann ganz nach Wunsch erfolgen, vorausgesetzt, dass die erforderliche Zeit dafür gewährt wird. Die gewünschten Tönungen beliebe man genau anzugeben. Kleine Abweichungen in den Farbentönen sind nicht immer zu vermeiden.

GNOME
SEGALOR

E

While

de-gnoming

may

have

been

a

chore

for

the

Weasleys,

gnoming—or

beautifying

gardens

with
gnome
sculptures—has
been
a
popular
hobby
for
families
since
the
1870s
when
August

Heissner
and
Philipp
Griebel
began
mass-producing
garden
gnomes
in
their
workshops
in
Gräfenroda,
Germany.

This
1897
catalog
of
the
Ludwig
Möller
Garden
Company
illustrates
a
selection
of
gnomes

designed
for
garden
beds
and
shrubberies
near
outdoor
seating
areas.
Unlike
the
gnomes
resembling

“fat
little
Father
Christmases”
that
Ron
notes
are
all
the
rage
among
Muggles,
the

Thuringian
retailers
emphasize
that
“care
has
been
taken
to
avoid
unattractive
or
even
ugly

facial
expressions
so
that
these
figures
could
not
fail
to
achieve
one
of
their

most
important
purposes:
delighting
children.”

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation 1999). The prevalence of mental health problems has increased in the general population, and the incidence of mental health problems has increased in the prison population.

There is a growing awareness of the need to address the mental health needs of prisoners. The Department of Health (1999) has published a strategy for mental health services, which includes a commitment to improve the mental health of prisoners. The Department of Health (1999) has also published a strategy for mental health services, which includes a commitment to improve the mental health of prisoners.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has become an important employer of people with mental health problems.

There is a growing awareness of the need to improve the mental health of people in the public sector. The Department of Health (1999) has published a strategy for mental health care, which includes a commitment to improve the mental health of people in the public sector. The strategy states that 'the mental health of people in the public sector is a priority for the Department of Health' and that 'the Department will work to ensure that people in the public sector have access to the same high quality mental health services as the general population'.

The Department of Health has also published a number of guidelines for the management of mental health problems in the public sector. These guidelines are designed to help public sector employers to identify and manage mental health problems in their workforce. The guidelines state that 'public sector employers should have a policy on mental health problems in the workplace' and that 'public sector employers should ensure that people with mental health problems are able to continue to work, where possible, and that they are given the same opportunities as other employees'.

The guidelines also state that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for training and development' and that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for promotion and career advancement'.

The guidelines also state that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for flexible working arrangements' and that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for part-time working'.

The guidelines also state that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for job sharing' and that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for secondment'.

The guidelines also state that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for sabbatical leave' and that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for study leave'.

The guidelines also state that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for unpaid leave' and that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for unpaid leave'.

The guidelines also state that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for unpaid leave' and that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for unpaid leave'.

The guidelines also state that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for unpaid leave' and that 'public sector employers should ensure that people with mental health problems are given the same opportunities as other employees for unpaid leave'.

This
drawing
reveals,
in

six
stages,
how
the
entrance
arch
to
Diagon
Alley
appears
when
tapped
three
times

by
Hagrid's
umbrella
at
the
beginning
of
*The
Sorcerer's
Stone.*

This
fully
worked-out
visualization

shows
how
J.K.
Rowling
rooted
the
magic
in
the
book
as
closely
as
possible

to
real-world
logic.
The
concept
of
bricks
reorganizing
themselves
into
an
archway
is
far

more
plausible
than
an
opening
simply
appearing
out
of

146

the

blue.

These

imaginative

touches,

and

the

serious

considerations

that

have

gone

in

to
explaining
magical
processes,
underline
what
makes
J.K.
Rowling's
world
so
vivid
and
real

to
so
many
readers.

J.K.

Rowling
spent
five
years
planning

out
Harry
Potter's
world
and
his
story.
She
decided
that
Hogwarts
would
have
four

school
houses—Gryffindor,
Ravenclaw,
Hufflepuff,
and
Slytherin—with
distinct
qualities
attributed
to
each.
After
that,
she

had
to
work
out
how
the
students
would
be
sorted
into
the
houses.
These

notes
show
the
author
listing
some
possible
ways.

The
note
“statues”
represents
her
idea

that
four
statues
of
the
founders
in
the
Entrance
Hall
might
come
alive
and

select
students
from
the
group
in
front
of
them
(an
idea
Rowling
later
modified

for
the
Sorting
Ceremony
at
the
North
American
school
of
magic,
Ilvermorny,
as
she

wrote
on
Pottermore).
Other
ideas
included
a
ghost
court,
a
riddle,
or
prefects
choosing

students.

The
Sorting
Hat
is
also
shown
here,
complete
with
rips,
patches,
and
a

grinning
mouth.

Argus

Filch,
the
caretaker
at
Hogwarts,
often
came
close
to
discovering
Harry
Potter
on
his

nighttime
adventures
around
the
school.

Harry
only
escaped
detection
thanks
to
his
Invisibility
Cloak,

which
once
belonged
to
his
father,
James
Potter.
The
lamp
held
by
Filch
while

he
was
patrolling
the
school
corridors,
shown
here
in
a
sketch
by
J.K.
Rowling,

enabled
him
to
spot
any
students
wandering
the
castle
when
they
should
have
been

tucked
up
in
bed.

This
drawing
shows
Filch
with
several
worry
lines
on
his

forehead,
perhaps
caused
by
years
of
chasing
after
misbehaving
pupils.

“Argus”

or

“Argos”

is

a
name
from
Greek
mythology
for

a
many-eyed
or
one-hundred-eyed
giant
whose
epithet,
“Panoptes,”

means

“all-seeing.”

For
those
who
won't

inherit
an
Invisibility
Cloak,
other
methods
of
disappearing
must
be
found
instead.

*The
Key*

of
Knowledge
was
an
instructional
text
on
magic
that
was
spuriously
attributed
to
King

Solomon.
Here
it
cites
a
charm
to
achieve
invisibility.
The
method
proposed
varies
from

manuscript
to
manuscript,
because
the
book
was
widely
shared,
copied,
and
recopied
by
students

of
magic.
This
manuscript
once
belonged
to
the
English
poet
Gabriel
Harvey.
Care
should

be
taken
when
reciting
this
spell,
however—*The*
Key
of
Knowledge
does
not
include
a

charm
to
make
yourself
reappear
again!

C
H
A
R
M
M
S

doest extalt all thynges of maner, w^{ch} youist unto men ther names,
and to stones and feawles ther vertut and power: I beseege thee O
Goly father for thy only sonne sake, I praye **Thesus christ**, w^{ch} dyest
and raiſest frome without end, that thou wilt graunt me to haue
the vertut of this experiment. **So be yt, Amen.** .f.

Afterward assume the place wth fute, plumes, as shalbe appoynted
in that chapter; & write yt also wth watter; and yf yt be neede
fary to make a rymle, let fute an one be made as ys appoynted, as
touching the same. If any other Certimonyes be required in this ex-
periment doe them. As an all this be synnyſſed, say thy conuicia-
tion, w^{ch} thy det doth, trudge the, and the end therof sayt. .H

Patex notex, Rexax, Terson, Syletem. I aduise you by this
Goly name **Joth, he, Van,** w^{ch} is wrytten in the letters that
by this p^{re}ſente book ys for you may see the truthe; **Ja, Ja, Ja,**
ya, yah, cause thes p^{re}ſent to haue vs our d^{re}ſyrs. I conuise you
afterward p^{re}ſent, by all that is afore sayd, and by hym to w^{ch} out
all truthe doe obey, that ymmediatly you haue vs the tyme
that we require; or els hym that tote yt awayt. .H yf to doe this
experiment, yt be requiſite, to write letters and figures, they are
to be wrytten, as ys p^{re}ſcribed in the ſecond booke; note that the
w^{ch} at ſome meane, experiments for theſe are made or done, requiſite
yt ys, that ther be other experiments beſides this, as ys afore sayd.

Howe experiments to be inuifible muſt bee prepared, Cap. 7.

Yf thou wilt haue an experiment to be inuifible, yf yt be re-
quyred to write thy experiment, then write yt all in ouerghen part-
es of pen and ynte, as shalbe appoynted in the chap-
ter of pen and ynte, yf fundamēt a conuiciaſion be requyred,
then beſore thy conuiciaſion ſay, priuily, as followeth.

**Stabban, Afen, Gabellum, Saneney, Noty, Enobal, Labon-
rem, Balametem, Balnen, Ty Ammel, Milligaly, Jume-
nel, Hearma, Hamorache, yſa, Seva, Senay, Himm,
Barucatha, Acararas, Taracub, Bucarat, Caramy,**
by theſe many wyth you ſtart towardes man kinde, make me to be
inuifible; afterward make y^e conuiciaſions, and yf you muſt make
a rymle, make fute, an one as is appoynted in the chapter of
making a rymle: yf you muſt wryte any figures, and letters,
wryte fute, as are p^{re}ſcribed in the chapter, as touching conuiciaſion,
note, or figures, yf you muſt wryte w^{ch} any, l^{re}de, yf
fute, as is also ſpecified appoynted, when this is p^{re}ſented
yf you muſt yf any conuiciaſion in the end of yt, ſayt as followeth.

Few
charmed
objects

are
more
closely
associated
with
the
Western
image
of
the
witch
than
the
broomstick.

Although
the
tradition
has
ancient
roots
in
pagan
fertility
rights,
the
connection
between
witchcraft

and
broomsticks
developed
significantly
in
the
art
and
popular
superstitions
that
fed
the
witch

hysteria
of
16th-
and
17th-century
Europe.
This
colorful
broomstick
was
once
owned
by
a

Devonshire
woman
named
Olga
Hunt.
When
there
was
a
full
moon,
Olga
could
be

spotted
with
her
broomstick
leaping
around
Haytor
Rocks
on
Dartmoor,
much
to
the
alarm

of
courting
couples
and
campers!

These
two
draft
sketches
show
how
Jim
Kay
created
some
of
his
illustrations,

using
a
detailed
pencil
sketch
that
was
then
digitally
colored
in
or
overlaid
with

a
watercolor
painting.
Here
you
can
see
him
experimenting
with
the
design
and
colors

of
the
winged
keys,
capturing
the
“whirl
of
rainbow
feathers”
described
in
*The
Sorcerer's*

Stone.

The
keys
have
been
charmed
by
Professor
Filius
Flitwick
as
one
of
the

protections
put
in
place
by
the
Hogwarts
teachers
to
guard
the
Sorcerer's
Stone.
Harry

used
his
broomstick

-

flying
skills

to

capture
the

one

that

would

The
world
of
magic
was
new
and
complicated
for
Harry
when

he
arrived
at
Hogwarts,
but
in
his
very
first
flying
lesson,
having
never
previously

touched
a
broom,
he
flew
so
naturally
that
Professor
McGonagall
instantly
whisked
him
away

to
meet
the
Gryffindor
Quidditch
team
captain.
Harry
became
the
youngest
Seeker
in
a

century
to
play
in
a
Hogwarts
Quidditch
game.
In
this
painting
by
Jim
Kay,

Harry
is
shown
with
his
cape
billowing
and
his
hands
firmly
clasped
around
his

broomstick,
while
a
rain-blurred
Draco
Malfoy
heads
toward
him
in
the
background.

In
1621,
Anne
Fairfax,
the
younger
daughter
of
Edward
Fairfax
of
Fewston,
Yorkshire,

died
suddenly.

Two
of
her
sisters,
together
with
a
friend,
accused
some
local
women

of
practicing
witchcraft.

The
women
were
taken
to
trial,
but
the
case
collapsed
when

the
friend
confessed
that
the
whole
thing
had
been
a
hoax.
Edward
Fairfax,
however,

remained
resolute
in
his
belief
that
Anne's
death
was
caused
by
witches.
This
manuscript

sets
out
his
case
for
the
prosecution.

A
later
illustrator
has
added
drawings
of

the
“witches”
and
their
familiar—demons
or
spirits,
often
in
the
form
of
an
animal,

that
accompany
and
obey
witches.

One
witch,
“Margaret
Wait
the
elder”
is
described
as

a
widow
whose
“husband
died
by
the
hand
of
the
executioner.
Her
familiar
is

a
deformed
thing
with
many
feet,
rough
with
hair,
the
bigness
of
a
cat,

and
the
name
of
it
is
unknown.”

As
the

anonymous

author
of
this
book
noted,
the
English
county
of
Lancashire
is
“famous
for
witches

and
the
very
strange
pranks
they
have
played.”

Lancashire's
popular
association
with
witchery
stems

from
the
famous
Pendle
trials
of
1612,
when
some
nineteen
people
were
accused
of

practicing
witchcraft.

While

the

story

of

the

Pendle

witch

craze

is

an

unhappy

one

—

the
majority
of
the
accused
were
hanged—the
author
of
this
text
was
eager

to
portray
Lancashire
witches
in
a
more
positive
light.
The
book
is
illustrated
with

simple
woodcuts,
including
this
picture
of
a
jolly
witch
mounting
a
broomstick.

*“The
text*

*accompanying
this
illustration
states,
‘Lancashire
witches
chiefly
divert
themselves
in
merriment
and
sport.’*

*Perhaps
it
is
little
wonder,
then,
that
Quidditch
Through
the
Ages
cites
the*

*first
known
account
of
a
Quidditch
match
in
1385,
as
'a
game
in*

Lancashire.'”

Like
the
Pendle

witch
trials
in
Lancashire,
England,
in
1612,
the
Salem
witch
crisis
eighty
years
later

depended
largely
on
local
feuds,
religious
strife,
and
long-held
cultural
beliefs
about
women
and

gender.

In

Puritan

New

England,

many

leaders

used

accusations

of

witchcraft

as

a

way

to
control
“disruptive”
female
behavior.
Cotton
Mather,
a
Congregational
minister
in
Boston
and
staunch

defender
of
Puritan
orthodoxy,
wrote
*The
Wonders
of
the
Invisible
World:
Being
an
Account*

*of
the
Trials
of
Several
Witches,
Lately
Executed
in
New-England
in
1693
as*

his
justification
for
the
Salem
witchcraft
crisis
and
executions.
While
Mather
attacked
witches
as

the
embodiment
of
evil
and
defended
the
court's
verdicts,
he
also
voiced
his
great

discomfort
with
the
court's
admission
of
spectral
evidence
(testimony
from
dreams,
ghosts,
and
visions).

Mather
called
on
the
court
to
admit
only
testimony
from
human
witnesses,
rather
than

spectral
testimony,
in
the
persecution
of
witches.

Only
humans,
he
argued,
should
“turn
the

scale”
of
justice
in
court.

ancient
Greek
handbook

for
magic.
As
well
as
containing
charms
to
discover
thieves
and
to
reveal
the

secret
thoughts
of
men,
the
handbook
describes
how
to
prepare
a
magical
ring.
The

owner
was
advised
to
inscribe
the
ring
with
a
charm,
according
to
the
following

formula:

“May
something
never
happen
as
long
as
this
remains
buried.”

It
was
intended

that
the
ring
be
hidden
in
the
ground,
in
order
to
prevent
something
from

happening.

By

inscribing

and

burying

the

ring,

the

owner

could

specify,

for

example,

that

they
did
not
want
a
rival
to
be
lucky
in
love.

With
the
exception

of
one
added
word,
the
inscription
reads
the
same
in
either
direction.
This
is

a
well-known
characteristic
of
magical
charms.

The
“Abracadabra”
spell
has
been
used
by
generations
of
magicians
to
conjure
rabbits
out

of
hats.

In
ancient
times,
however,
the
same
word
was
held
to
be
a

charm
with
healing
powers.
Its
first
documented
use
appears
in
the
Liber
Medicinalis
or

“Book
of
Medicine”
written
by
Quintus
Serenus
Sammonicus
in
the
2nd
century
C.E.
Serenus

was
a
physician
to
the
Emperor
Caracalla,
prescribing
the
charm
“Abracadabra”
as
a
cure

for
malaria.
Sufferers
were
instructed
to
write
out
the
word
again
and
again,
leaving

out
one
letter
each
time.

This
would
produce
a
“cone-shaped”
text.

The
charm
was

then
worn
as
an
amulet
around
the
neck
in
order
to
drive
out
the

fever.

*“The
Abracadabra
text
is
outlined
in
red
ink
in
the
margin
of*

*this
manuscript.
Serenus
further
recommended
that
flax,
the
fat
of
the
lion,
or*

*coral
stones
could
be
used
to
fix
the
charm
around
one's
neck.”*

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1995, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1995, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time. In 1995, 68% of the public sector workforce were employed full-time, compared with 58% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state, such as those in the health and education sectors.

Finally, the public sector has become an important employer of women because it has a high proportion of jobs that are well-paid. In 1995, the average salary of a public sector employee was £18,000, compared with £15,000 in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are in the higher grades of the public sector pay scale, such as those in the senior management and professional grades.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In
Ethiopia,
magical
practitioners
commonly
make
collections
of
charms,

spells,
and
the
names
of
plants
and
their
properties,
which
are
then
copied
into

handbooks
like
this
one.
This
page
has
been
removed
from
a
magical
recipe
book.

It
contains
charms
for
reversing
spells
and
for
binding
demons.
One
charm
in
particular

supplies
the
formula
for
changing
yourself
into
a
lion
or
another
beast:
“With
red

ink,
write
these
secret
names
on
a
piece
of
white
silk.

To
transform
yourself

into
a
lion,
tie
the
silk
to
your
head;
to
become
a
python,
tie

it
on
your
arm;
to
turn
into
an
eagle,
tie
it
on
your
shoulder.”

[illegible]

potions
and
charms
are
still
widely
used
across
the
world.

Sometimes
this
type
of

magic
even
appeared
at
Hogwarts—from
Professor
Slughorn
brewing
Amortentia
in
class
to
Ron
Weasley

accidentally
ingesting
Romilda
Vane's
love
potion.
Made
in
the
Netherlands,
the
love
charm
shown

here
is
rich
in
symbolism
that
imbued
the
object
with
magical
power.
Painted
onto

an
oyster
shell
to
ensure
fertility,
the
charm
was
produced
for
a
couple
whose

first
initials
were
J
and
R.
Red
thread
binds
the
letters
together
while
a

pair
of
touching
hearts
represent
their
love.

Above
these
letters
are
the
couple's
star

signs—"

for

Taurus

and

!

for

Gemini.

*"The
effectiveness
of
this
love
charm*

*remains
unknown.*

As

*Slughorn
declared*

in

his

Potions

class,

‘It

is

impossible

to

*manufacture
or
imitate
love.'”*

Of The Constellations

Another Company of Stars that encompass the pole of γ Ecliptic @ lie disposed in various places, the antients formed an Image or Constellation called γ Dragon (see Fig 3) wreathing @ twisting it self betwixt the two Stars, it is a Noble Constellation, having Stars in every one of γ 12 Signs @ the pole of γ Ecliptic is in the very middle of it, (at p) it hath one Star of γ Second Magnitude, (at s) being γ East but two in γ tail, the Star (at o) is called Rasabon, being a Bright Star in the head of γ Drag-

Draco
the Dragon
Fig. 3.

on, famous for that γ Ingenious m^d Robert Hook fellow of γ Royal Society, made use of this Star to attempt the Proof of the Motion of γ Earth by Observation, in 1674 where he observed (as γ Reverend m^d Flamsteed hath divers times since) a parallax of this Earths annual orb which infallibly proves the motion of the Earth to be true, according to γ Doctrine of Copernicus.

Behind the neck of the Dragon, the antients formed another Constellation of Stars into γ Image of a Swan (see Fig 4) the Star near the Tail (at m) is of γ 2 Magnitude, & is called Aludif or Aludid; @ near the Star in its Breast, where γ Letter (n) is placed; a New Star appeared in the year 1601, @ after some time disappeared, in the year 1658 it appeared again, @ likewise in the year 1670, and so it continued appearing and disappearing several times, it was a star of the third Magnitude, and at this time wholly Disappears.

Cygnus
the Swan
Fig. 4.

The Stars in this (as in γ other Constellations) are easily known & distinguished, if you observe about 10: parts of γ Head, Neck, Breast Wings Tail &c, they are placed.

And this was γ method made use of by γ antients, to distinguish @ Name γ greatest part of γ visible Stars in γ Firmament, by forming

In
this
handwritten
note,
which
was

made
as
she
was
writing
*The
Sorcerer's
Stone,*
J.K.
Rowling
has
listed
the
subjects

taught
at
Hogwarts
alongside
the
prospective
names
of
their
teachers.
Here
you
get
a

glimpse
of
some
of
the
revisions
and
choices
J.K.
Rowling
made
as
she
developed

Harry
Potter's
wizarding
world.

An
early
moniker
for
the
Professor
of
Astronomy
is
recorded

here

as

“Aurelia
Sinistra.”

This

later

developed

into

“Aurora
Sinistra.”

J.K.

Rowling

often

uses

Latin
words
for
her
names
and
spells.
“Aurora,”
which
means
“the
dawn,”
can
also

refer
to
the
natural
phenomenon
that
occurs
near
the
magnetic
poles,
creating
breathtaking
light

displays
in
the
sky.

As
well
as
meaning
“left
-
hand
side,”
“Sinistra”
is

also
the
name
of
a
star
in
the
constellation
of
Ophiuchus,
better
known
as

the
Serpent
Bearer.

*“The
lists
of
Defense
Against
the
Dark
Arts
teachers
include*

*unused
characters
with
unfamiliar
names
like
Enid
Pettigrew,
Oakden
Hernshaw,
and
Mylor
Silvanus,*

*none
of
whom
appear
in
the
published
books.”*

ATLAS OF THE

I
G
H
T
S
K
Y

In

1907,

a

Hungarian-British
archaeologist

named
Aurel
Stein
was
searching
for
artifacts
in
the
desert
on
the
southern
Silk

Road.
He
entered
a
cave
in
Dunhuang,
Central
China,
that
had
been
sealed
for

thousands
of
years
and
stumbled
upon
an
amazing
discovery—the
cave
was
a
treasure
trove

containing
40,000
ancient
Buddhist
manuscripts,
paintings,
and
documents.
This
paper
scroll
was
among
them,

the
oldest
preserved
star
atlas
from
any
civilization.

At
the
time
that
the
atlas

was

“

made,

it

was

believed

that

the

movement

of

the

stars

reflected

the
actions
of
the
emperor
and
his
court
on
Earth.

A
solar
eclipse,
for

example,
might
be
interpreted
as
a
sign
of
a
forthcoming
coup.
The
scroll
shows

more
than
1,300
stars
visible
to
the
naked
eye
in
the
Northern
Hemisphere.
It

is
staggering
to
think
that
a
chart
of
such
accuracy
was
created
by
observation

alone—the
Dunhuang
Star
Atlas
is
the
oldest
map
of
the
night
sky,
yet
it

stands
up
well
compared
to
modern
charts
today.

The
wonders
of
the

night
sky
have
inspired
many
of
the
character
names
in
the
Harry
Potter
series.

Hogwarts
alumni
include
Andromeda
Tonks,
Bellatrix
Lestrange,
and
of
course
their
cousin,
Sirius
Black.

This
medieval
manuscript
shows
the
constellation
of
Canis
Major.
The
most
famous
star
in

that
constellation
and
also
the
brightest
light
that
can
be
seen
from
Earth
is

Sirius,
the
Dog
Star.
The
shape
of
the
dog
in
this
manuscript
is
infilled

with
a
pattern
poem
in
Latin,
derived
from
the
writings
of
the
Roman
author

Hyginus.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has also become an important employer of women, with 5.5 million women employed in the public sector in 1999, compared with 4.5 million in 1980.

There are a number of reasons why the public sector has become an important employer of women. One reason is that the public sector has a high proportion of women in its workforce. In 1999, 88% of the public sector workforce were women, compared with 78% in 1980. This is due to a number of factors, including the fact that the public sector has a high proportion of jobs that are traditionally held by women, such as teaching, nursing, and social work.

Another reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are full-time and permanent. In 1999, 68% of the public sector workforce were employed on full-time contracts, compared with 58% in 1980. This is due to the fact that the public sector has a high proportion of jobs that are essential to the functioning of the state, such as those in the health service and the education system.

A third reason why the public sector has become an important employer of women is that it has a high proportion of jobs that are well-paid. In 1999, the average salary of a public sector employee was £21,000, compared with £18,000 in 1980. This is due to the fact that the public sector has a high proportion of jobs that are in the higher grades of the public sector pay scale, such as those in the senior management and professional grades.

There are a number of other factors that have contributed to the public sector becoming an important employer of women. These include the fact that the public sector has a high proportion of jobs that are in the public sector, and the fact that the public sector has a high proportion of jobs that are in the public sector. These factors have all contributed to the public sector becoming an important employer of women.

The public sector has also become an important employer of women because it has a high proportion of jobs that are in the public sector. This is due to the fact that the public sector has a high proportion of jobs that are in the public sector, and the fact that the public sector has a high proportion of jobs that are in the public sector. These factors have all contributed to the public sector becoming an important employer of women.

The public sector has also become an important employer of women because it has a high proportion of jobs that are in the public sector. This is due to the fact that the public sector has a high proportion of jobs that are in the public sector, and the fact that the public sector has a high proportion of jobs that are in the public sector. These factors have all contributed to the public sector becoming an important employer of women.

The public sector has also become an important employer of women because it has a high proportion of jobs that are in the public sector. This is due to the fact that the public sector has a high proportion of jobs that are in the public sector, and the fact that the public sector has a high proportion of jobs that are in the public sector. These factors have all contributed to the public sector becoming an important employer of women.

THE SKIES

Astronomers
of
the
past

used
a
range
of
equipment
to
help
them
plot
the
movement
of
the
stars.

This
exquisite
instrument
made
by
Muhammad
b.

Abi
Bakr
almost
eight
hundred
years
ago

is
called
an
astrolabe.

It
could
be
used
to
create
a
two-dimensional
map
of

the
heavens,
similar
to
the
star
charts
that
Harry
and
his
classmates
were
expected

to
plot
in
their
Astronomy
exams.

An
astrolabe
was
also
able
to
determine
latitude

and
was
employed
in
the
Islamic
world
to
find
the
direction
of
Mecca.
The

back
of
this
astrolabe
has
a
calendar
with
three
apertures
including
one
showing
the

lunar
phase
and
one
the
positions
of
the
Sun
and
Moon
in
the
zodiac.

This
astrolabe
from
Persia
(modern
day
Iran)
is
thought
to
be
one
of
the

oldest
existing
geared
instruments.

Celestial
globes
show
the
position
of
stars
in
the
sky

as
perceived
from
Earth.
The
art
dates
back
thousands
of
years—the
first
celestial
globes

were
created
in
ancient
Greece.
This
example
was
designed
by
a
Franciscan
monk
named

Vincenzo
Coronelli,
considered
to
be
one
of
the
greatest
globe
makers
in
the
world.

Coronelli
often
collaborated
with
Jean
Baptist
Nolin,
engraver
to
the
French
Crown.
Working
with

draft
maps
provided
by
Coronelli,
Nolin
engraved
beautiful
baroque
constellation
figures
of
animals,
men,

and
mythical
creatures
shown
in
constant
dialogue
as
they
move
together
across
the
sky.

This
globe
also
contains
information
about
wind
direction.
Half
of
its
emblem
was
left

empty
so
that
the
makers
could
insert
the
name
of
the
person
to
whom

it
was
to
be
dedicated.

An

orrery

is

a

model

of

the

solar

system.

This
mechanical
marvel
was
made
in
London
by
the
mathematical
instrument
maker,
John
Troughton.

It
displays
the
movement
of
Earth
in
relation
to
the
Moon
and
two
other

planets.
The
model
rests
on
an
octagonal
wooden
base,
above
which
curves
a
series

of
bands
marking
celestial
longitude
and
latitude.
Orreries
have
long
been
used
in
teaching

and
were
even
available
for
purchase
in
Diagon
Alley.

At
Hogwarts,
they
are
not

only
used
for
Astronomy,
but
also
for
“planetary
divination.”
Professor
Sybill
Trelawney's
orrrery
holds

“the
moons
[
...
]
the
nine
planets
and
the
fiery
sun,
all
of

them
hanging
in
thin
air
beneath
the
glass.”

Written
by
the
imperial
astronomer
Johannes
Kepler,
the

Rudolphine

Tables

helped

its

readers

to

locate

the

planets

in

relation

to

the

stars.

It
was
a
massive
achievement,
containing
the
position
of
1,005
stars,
and
is
the

most
accurate
star
catalog
of
the
pre-telescope
era.

The
elaborate
illustrated
frontispiece
of
the

book
shows
a
temple
of
Urania,
the
Muse
of
Astronomy.
The
temple
is
filled

with
great
star-gazers—Hipparchus
of
Nicaea,
Ptolemy,
Nicolaus
Copernicus,
Kepler's
predecessor
Tycho
Brahe,
and
an

unnamed
Chaldean,
an
ancient
people
renowned
for
their
astronomical
skills.

In
a
panel
underneath

the
temple
there
is
also
a
picture
of
Kepler
himself.

*“In
1617,
Kepler's
mother*

*was
suspected
of
witchcraft,
a
crime
punishable
by
death.*

*The
accused
spent
over*

*a
year
in
prison
but
was
eventually
released
when
her
son
intervened.
Kepler*

*was
an
official
astronomer
to
the
Holy
Roman
Emperor—this
family
intrigue
must
have*

*been
ver
y
difficult
for
him.”*

Leonardo
da

Vinci—inventor,
scientist,
artist

—

was
centuries
ahead
of
his
time.
Throughout
his
career,
Leonardo
made
notes
written
in

curious
mirrored
handwriting
that
reads
from
right
to
left.

Some
of
these
pages
were

later
gathered
into
a
notebook
known
as
the
“Codex
Arundel,”
named
after
a
former

owner,
the
Earl
of
Arundel.
The
shaded
diagram
in
the
center
describes
the
reflection

of
light,
according
to
the
alignments
of
the
Sun,
Moon,
and
Earth.
Leonardo's
drawing

shows
the
Sun
and
Moon
revolving
around
the
Earth,
accepting
the
theory
by
the

Greek
astronomer
Ptolemy
that
the
Earth
was
the
center
of
the
universe.
Leonardo
also

believed
that
the
Moon
was
covered
with
water
and
that
its
surface
would
reflect

light
like
a
convex
mirror.

THE POLYMERIZATION OF VINYL MONOMERS

1. The polymerization of vinyl monomers is a process in which the monomers react to form a polymer chain. This process is typically initiated by a free radical, which then propagates the reaction by adding more monomers to the growing chain.

2. The rate of polymerization is influenced by several factors, including the concentration of the monomers, the concentration of the initiator, and the temperature of the reaction.

3. The molecular weight of the resulting polymer is also affected by these factors, with higher monomer concentrations and higher temperatures generally leading to higher molecular weights.

4. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

5. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

6. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

7. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

8. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

9. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

10. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

11. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

12. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

13. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

14. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

15. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

16. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

17. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

18. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

19. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

20. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

21. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

22. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

23. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

24. The polymerization of vinyl monomers is a key process in the production of many plastics and polymers, and understanding the factors that influence it is essential for optimizing the process.

25. The polymerization of vinyl monomers is a complex process, and many factors can influence the rate and molecular weight of the resulting polymer. Understanding these factors is essential for optimizing the process.

Just
the
thing
for
Hogwarts
First
Years,
Urania's
Mir
ror
is
a
set
of

32

star

charts,

printed

on

cardstock

and

sold

for

astronomical

self-instruction.

Each

card

is

pierced
with
holes
that
correspond
to
the
size
of
the
brightest
stars,
giving
a

realistic
impression
of
a
constellation
when
held
up
to
the
light.
The
cards
were

engraved
by
the
mapmaker
Sidney
Hall
and
then
painted
by
hand.
The
images
were

designed
by
an
anonymous
“Lady,”
who
has
since
been
identified
as
the
Reverend
Richard

Bloxam,
an
assistant
master
at
Rugby
School
in
Warwickshire,
England.

It
is
unclear
why

Bloxam
hid
his
connection
with
these
cards.
Perhaps,
like
other
authors,
he
felt
that

his
gender
might
affect
sales
in
a
market
that,
at
the
time,
wanted
to

attract
female
customers.

STARNOTES

Celestial
navigation
is

the
ancient
science
of
finding
your
way
by
the
position
of
the
stars,
Moon,

and
planets.
Out
of
almost
six
thousand
visible
stars,
only
58—the
brightest—are
used
by

navigators
in
their
almanacs.

This
handwritten
notebook,
sometimes
referred
to
as
a
commonplace
book,

has
been
filled
with
information
on
maritime
navigation
gathered
from
a
variety
of
sources.

The
volume
is
wonderfully
illustrated
with
working
dials,
tables,
and
other
drawings
that
are

both
practical
and
eye-catching.

Woodcuts
from

a
1710

issue
of

*The
Ladies'*

Diar

y:

or,
the
Woman's
Almanack
complement
its
section
on
astronomy,
and
include
northern
hemisphere
constellations

Draco
(the
Dragon)
and
Cygnus
(the
Swan).

The
content
of
this
notebook
suggests
that

it
dates
from
the
early
18th
century,
and
though
it
carries
a
bookplate
of

Cary
Christopher
Elwes,
the
son-in-law
of
a
British
rear
admiral,
the
identity
of
its

creator
remains
a
mystery.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1.2 million (Office of National Statistics 1999). The number of people aged 85 and over has increased by 0.5 million.

There is a growing awareness of the need to address the needs of the ageing population. The Department of Health (1999) has published a strategy for ageing, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on the following assumptions: (1) that older people are a valuable resource; (2) that older people have the right to live independently and actively; (3) that older people have the right to access the services and support they need; and (4) that older people should be treated with respect and dignity. The strategy is based on the following objectives: (1) to improve the lives of older people; (2) to ensure that older people have the opportunity to live independently and actively; (3) to ensure that older people have access to the services and support they need; and (4) to ensure that older people are treated with respect and dignity.

The strategy is based on the following principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. Of The Constellations

Another Company of Stars that encompass the pole of γ Cepheick
 @ his disposed in various places, the antients formed an Image
 or Constellation called γ Dragon (see Fig 3) wreathing @ twisting it
 self about the two Boar, it is
 a Noble Constellation, having
 Stars in every one of γ 12 Signs
 @ the pole of γ Cepheick is in the
 very middle of it, (at p) it hath
 one Star of γ Second Magnitude, (at q)
 being γ but but two in γ tail, the
 Star (at o) is called Rasabon, being a
 bright Star in the Head of γ Drag-

on, famous for that γ Ingenious
 and Robert Hook fellow of γ Royal Society, made use of this Star
 to attempt the Proof of the Motion of γ Earth by observation, in
 1674 where he observed as γ Rowland m. Flamsteed hath divers times
 since) a parallax of the Earths Annual orb which infallibly proves
 the Motion of the Earth to be true, according to γ Doctrine of Cop-
 ernicus.

Behind the neck of the Dragon, the antients formed another
 Constellation of Stars into γ Image of a Swan (see Fig 4) the Star near
 the Tail (at m) is of γ 2 Magnitudes,
 it is called Aridof or Aridoo; @ near
 the Star in its Breast, where γ Betor
 (n) is placed; a New Star appeared in
 the year 1601, @ after some time dis-
 appeared, in the year 1658 it appa-
 reed again, @ Aridoo in the year
 1670, and so it continued appar-
 ing and disappearing several tim-
 es, it was a Star of the third Magnitude, and at this time wholly
 Disappears

The Stars in this (as in γ other Constellations) are easily known
 & distinguished, if you observe about 10: parts of γ Head, Neck, Breast,
 Wings Tail &c, they are placed.

And this was γ method made use of by γ antients, to distinguish
 @ Name γ greatest part of γ visable Stars in γ Firmament, by forming
 most of them into Images and Constellations

(15)

9 So many lines, fo many children. 10 Thefe lines denote a melancholly perfon. 11 Signifies good fortune. 12 Denotes a whore. 13 A fufpicious perfon. 14. A revengeful perfon. 15. Let the party take care to avoid deep water.

1 Thefe lines denote good to come. 2 Denotes a thief. 3 Denotes a wife perfon. 4 Denotes good fortune, and prosperity. 5 Denotes an honeft and true perfon. 6 Signifies a wanton perfon. 7 Signifies conftancy and fidelity. 8.

Here

is

the
completed
portrait
of
Professor
Sybill
Trelawney,
Harry
Potter's
Divination
teacher
at
Hogwarts,
wrapped

in
a
shawl
and
dressed
in
her
bangles
and
beads.
To
create
this
image

Jim
Kay
painted
an
initial
version
in
which
Trelawney
was
not
wearing
her
thick

spectacles—the
glasses
and
other
elements
were
designed
separately
and
added
digitally
later.

The
professor's

fervent
upward
gaze
captures
how
swept
up
she
could
become
in
the
theatrics
of

her
subject,
in
her
view
“the
most
difficult
of
all
magical
arts.”

The
red

glow
of
the
Divination
tower
classroom
behind
her
is
visually
evocative
of
a
grand

theater
set.

LEBONES

Oracle
bones
were
used
in

divination
rituals
associated
with
the
cult
of
the
ancestors
in
ancient
China.
Questions
relating

to
subjects
as
mundane
as
a
king's
toothache
to
state
affairs
such
as
royal

pregnancies,
warfare,
agriculture,
and
natural
disasters
would
be
engraved
on
the
bone
before
heated

metal
sticks
were
inserted
into
pre-carved
hollows,
causing
the
bone
to
crack.
The
shaman

then
interpreted
the
patterns
of
the
fractures
to
“receive
the
oracle”
from
the
spirits

of
the
ancestors.
Oracle
bones
are
archaeological
evidence
of
China's
earliest
documented
writing
system,

known

as

jiaguwen.

These

inscriptions

are

irrefutable

historical

records

of

a

highly

advanced

civilization

in
China
by
the
second
millennium
B.C.E.,
known
as
the
Shang
dynasty.
The
oxen

shoulder
blade
on
the
left
has
been
fragmented
and
bears
an
incomplete
inscription,
but

the
first
graph
from
the
top
is
clearly
visible
and
denotes
“divination.”

It
is

believed
that
the
bone
on
the
far
right
dates
to
the
late
Shang
dynasty

based
on
the
ancient
drill
holes
on
the
obverse
side.

Mother

Shipton,

known

as

the

Yorkshire

Prophetess,

is

the

subject

of

this
little
book.
Little
is
known
about
her
life,
and
we
cannot
even
be

sure
that
she
existed.
She
was
supposedly
incredibly
ugly,
and
in
addition
to
her

powers
of
prophecy
she
was
able
to
levitate.
Most
of
the
“strange
prophecies”
in

this
book
relate
to
the
succession
of
the
British
monarchy,
although
Mother
Shipton
also

predicted
the
day
and
time
of
her
own
death,
reputedly
in
1561.
She
appeared

in
various
pamphlets
from
1641
onward,
and
by
the
time
this
book
was
published

in
1797,
she
was
being
portrayed
in
pantomimes
on
the
London
stage.
Today,
the

prophetess
is
best
known
for
her
birthplace,
which
was
said
to
be
near
the

“Dropping
Well”

in
Knaresborough,
Yorkshire.

For
centuries
the
well
was
believed
to
have
magical

properties,
and
the
capacity
to
turn
objects
into
stone.

The
waters
actually
have
a

high
mineral
content,
enabling
them
to
petrify
objects
within
a
few
weeks.

*“Mother
Shipton*

*made
her
most
famous
prophecy
in
1530,
when
she
foretold
that
Cardinal
Wolsey,*

*who
had
been
made
Archbishop
of
York,
would
see
the
city
but
never*

reach

it.

According

to

this

book,

Wolsey

saw

the

city

from

the

top

*of
a
nearby
castle,
but
was
immediately
ar
rested
and
taken
to
London.”*

Divination

with

a

mirror

or

another

reflective

surface

is

an
ancient
practice
known
as
scrying.
The
term
originates
from
the
word
“descry,”
meaning

“to
catch
sight
of.”

Despite
being
carved
in
the
shape
of
an
ugly,
old

hag,
the
design
of
this
mirror
was
very
popular
among
early
20th-century
English
witches,

who
would
have
used
it
for
divination.
This
item
once
belonged
to
the
witch

Cecil
Williamson.

He
warned
that
if
you
gaze
into
it,
“and
suddenly
see
someone

standing
behind
you,
whatever
you
do,
do
not
turn
around.”

The
Mirror
of
Erised

appears
to
act
like
a
scrying
mirror.

It
is
equally
dangerous
too,
as
“It

shows
us
nothing
more
or
less
than
the
deepest,
most
desperate
desire
of
our

hearts.”

Cartomancy
is
a
form
of

divination
that
uses
cards
to
predict
the
future.

Reading
card
decks
for
purposes
of

divination
can
be
traced
at
least
as
far
back
as
the
15th
century
but

tarot
cards,
produced
especially
for
fortune
telling,
became
popular
in
Europe
and
North
America

during
the
18th
century.

The
modern
tarot
deck
contains
78
cards
divided
into
Minor

and
Major
sections.
Each
card
has
a
different
meaning
and
arranged
in
spreads
from

3
to
21
cards
they
tell
the
story
of
a
person's
life.
L'Ermite
or

the
Hermit
represents
soul-searching
and
introspection.

La
Force

or
Fortitude,
portrayed
by
a
woman

subduing

a

lion,

L'EMPEREUR

LE DERVICHE

LE CHEVALIER DE BASTONS

212

represents
inner
strength
and
resilience.
Fifteen
cards
arranged
in
an
upside
down
triangle

create
what
is
known
as
a
Witch's
Spread.
The
power
of
the
message
lies

in
the
diviner
as
Harry
Potter's
teacher,
Professor
Trelawney,
constantly
tells
her
class.

?

In
19th-century
Siam,
people
would
have
consulted
a
divination
specialist
on
matters
of

love
and
relationships.
This
divination
manual
(*phrommachat*
)
contains
horoscopes
based
on
the
Chinese

zodiac,
including
drawings
of
the
animals
of
the
twelve-year
cycle
and
their
reputed
attributes—earth,

wood,
fire,
iron,
and
water.
Each
zodiac
page
is
followed
by
a
series
of

paintings,
which
symbolize
the
fate
of
a
person
under
certain
circumstances.
The
unnamed
artist

paid
great
attention
to
every
single
detail:
The
facial
expressions,
hand
gestures
and
body

language
are
beautifully
observed,
along
with
the
elaborate
designs
of
clothes
and
jewelry.
“This

*manuscript
describes
both
lucky
and
unlucky
constellations
for
couples,
taking
into
consideration
their*

*characters
as
well
as
their
horoscopes.
Indeed,
it
would
appear
that
a
hot*

-
*tempered
couple
would
have
a
better
chance
of
living
happily
together
than*

*a
demonic
male
and
an
angelic
female.”*

In
the
late
19th

century,
as
interest
in
crystal
divination
increased,
the
clairvoyant
John
Melville
wrote
this
popular

guide
to
help
those
struggling
with
the
ancient
art.

Melville
recommended
taking
“an
infusion

of
the
herb
Mugwort

.

.

.

or
of
the
herb
Succory

”

,

which,

“if
taken
occasionally
during
the
Moon's
increase

.

.

.

[would]
constitute
an
aid

to
the
attainment
of
the
most
desirable
physical
conditions
of
the
experimenter's
body.”
It

is
unclear
how
far
Melville's
instructions
helped
those
not
gifted
with
Second
Sight.
“

Since
ancient
times,
certain
stones
and
gems
have
been

prized
for
their
magical
qualities.

In

The

Magic

of

Jewels

&

Charms,

George

Kunz,

chief
gemologist
for
Tiffany
&
Co.,
chronicles
the
folklore
of
gemstones
across
time
and

place,
from
the
magical
stones
used
in
rain

-

making
rites
by
Central
African

tribes
to
the
feldspar
and
quartz
beach
pebbles
kept
by
Native
Americans
as
talismans.

Kunz's
writings
also
explore
the
tradition
of
crystal
gazing,
the
natural
sources
for
rock

crystal,
and
techniques
for
making
crystal
balls.

Japanese
artisans
transformed
rough
masses
of
crystal

into
perfect
spheres
by
painstakingly
chipping
them
with
small
steel
hammers
and
then
grinding

them
to
a
fine
polish,
while
in
Europe
and
the
US,
workmen
relied
almost

exclusively
on
huge
mechanized
grindstones
to
shape
the
balls.

SCRYSTALBA

L

L

Ron,
Hermione,
and
Harry's
Divination
lessons
took
place
in
a
heavily

scented
classroom,
filled
with
a
“sickly
sort
of
perfume.”
“Smelly
Nelly,”
the
20th

-

century
English
witch
who
owned
this
black
crystal
ball,
also
had
a
taste
for

strong
aromas.

One
witness
who
saw
her
using
it
reported
how,
“You
caught
her

scent
a
mile
off
downwind.”

Smelly
Nelly
believed
that
the
fragrance
appealed
to
the

spirits
who
helped
her
to
divine
the
future.
Known
as
a
Moon
crystal,
this

black
globe
had
to
be
consulted
at
night,
so
that
the
seer
could
read

the
Moon's
reflection
in
the
glass.

Making

a

prediction

based

on

the

shape

and

lines

of
the
hand
is
known
as
palmistry
or
chiromancy.
This
medieval
manuscript
contains
a

collection
of
prophecies
and
treatises
on
fortune-telling.
Every
hand
contains
three
natural
lines,
forming

a
“triangle.”

These
diagrams
show

a
left
and

a
right
hand,
onto
which
are

mapped
the
natural
lines
and
other
secondary
lines.

On
the
right
hand,
a
vertical

stroke
running
down
the
palm
reads,
“this
line
represents
love.”

A
vertical
line
running

between
the
middle
and
index
finger
has
a
less
fortunate
meaning:
“This
line
signifies

a
bloody
death
and
if
the
line
reaches
unto
the
middle
of
the
finger

it
signifies
a
sudden
death.”

This
ceramic
palmistry
hand
would

have
been
used
for
teaching.
It
shows
the
various
lines
and
mounts
on
the

palm
and
wrist,
along
with
some
of
their
significant
meanings.
Hands
like
this
were

first
manufactured
in
Britain
in
the
1880s,
following
the
growing
popularity
of
palmistry
inspired

by
the
celebrated
astrologer
William
John
Warner,
also
known
as
Cheiro
or
Count
Louis

Hamon.

This
fascinating
18th-century
pamphlet

explores,
and
perhaps
exploits,
Egypt's
mystical
reputation.
Supposedly
a
collection
of
Egyptian
divination
techniques,

it
was
compiled
by
an
anonymous
British
writer.

*The
Old
Egyptian
Fortune-Teller's
Last
Legacy*

was
printed
cheaply
and
then
sold
to
the
lower
middle
classes.
In
addition
to

palmistry,
it
explains
how
to
prick
an
image
with
a
pin
to
decide
whom

to
marry
and
how
to
divine
the
future
by
interpreting
the
moles
on
your

face
and
body.
Even
the
position
and
number
of
your
wrinkles
are
deemed
to

hold
secrets
to
the
future.

INATION

The Signification of LINES and other
Marks in the HANDS.

A Star in this place signifies riches and honour. 2 The party will live an chace. 3 Denotes increase of goods and substance. 4 Signifies a trully and faithful person. 5 Predicts a woman to be a strumpet. 6 So many straight lines, so many sons, so many crooked lines, so many daughters. 7 These points denote a whore-matter. 8 Denotes a sharp wit.

(15)

9 So many lines, so many children. 10 These lines denote a melancholly person. 11 Signifies good fortune. 12 Denotes a whore. 13 A suspicious person. 14 A revengeful person. 15. Let the party take care to avoid deep water.

These lines denote good to come. 1 Denotes a thief. 2 Denotes a wife person. 3 Denotes good fortune and prosperity. 4 Denotes an honest and true person. 5 Signifies a woman person. 6 Signifies constancy and integrity.

From
the
late
18th
to
the

early
20th
centuries,
doll
owners
sometimes
converted
their
little
charges
into
fortune-tellers.
They
were

a
party
novelty
and
a
money

-
making
feature
at
charity
bazaars
and
local

fairs,
where
the
curious
paid
to
take
their
turn.
Plucking
one
of
the
skirt's

folded
paper
leaves
yields
a
flowery
fortune

relating
to
love,
friendship,
and
personality,
such
as
“beware
the
man
that
flatters

you.”

A
few
of
the
handwritten
messages
in
this
example
come
from
the
Oraculum,

an
oracle
papyrus
that
Napoleon
Bonaparte
purportedly
discovered
in
Egypt.
Though
undoubtedly
a
hoax,

English-language
publishers
reprinted
it
through
the
19th
century.

A
range
of
doll
bodies,
from

porcelain
to
papier-mâché,
found
themselves
transformed
into
fortune-tellers.
This
type,
known
as
a
“peg

wooden,”
hails
from
the
historic
wood-carving
center
of
Val
Gardena
(Grödentel)
in
the
South

Tyrol
region,
then
part
of
Austria
and
today
in
Northern
Italy.

This

detailed

manual

on

tea

leaf

divination

was

written

by

an

unnamed
author,
described
on
the
cover
as
“a
Highland
Seer.”

It
provides
instructions
not

only
on
interpreting
the
various
shapes
made
by
the
leaves,
but
also
on
the

ideal
size
and
shape
of
cup
and
the
type
of
tea
to
use.

“In

*this
book,
the
position
of
each
tea
leaf
symbol
is
also
significant.
The*

author
advises
that
the
nearer
an
image
appears
to
the
handle
of
the

*cup,
the
sooner
the
predicted
event
will
occur.”*

You will attend an important meeting.

You will have a lot of trouble.

You will be in an accident.

You will be much loved.

You will make a profitable contract.

You will be very happy when married.

You will be highly honoured.

You will meet a stranger. *Beware!*

You will have a loss.

Good fortune.

You will have a large family.

You will make an enemy.

If you ask a favour now it will be granted.

You will be interested in the Navy.

You will be prosperous and happy.

You have found a new love.

You will have bad news.

You will attend a wedding.

You will make a good bargain.

You will meet your beloved soon.

she

“raised

the

fortunate

cup

reader

to

the

dignity

of

a

Mandarin”

(a

significant
promotion!).

Most

of

the

pamphlet
comprises

a

handy

guide

to

decoding

a

range

of
shapes
formed
by
leaves
in
the
bottom
of
the
cup.
Many
of
the

predictions
are
quite
general;
others
are
bizarrely
specific.
Number
44,
for
instance,
indicates,
“You

will
be
interested
in
the
Navy.”

Readers
struggling
with
this
volume
might
sympathize
with

Harry
Potter,
who
could
only
see
“A
load
of
soggy
brown
stuff.”

*“Some
of*

*the
shapes
in
this
book
are
remarkably
difficult
to
tell
apart.*

Numbers

38

*and
42
are
tantalizingly
similar,
but
while
the
first
means
'You
will
meet*

*a
stranger,'
the
other
warns
that
'You
will
make
an
enemy.'"*

This
original
drawing
by
J.K.
Rowling
depicts
the
black
night

when
Harry
Potter
was
delivered
to
the
Dursleys.
With
only
the
Moon
and
stars

to
light
the
way,
since
Dumbledore
had
put
out
the
streetlamps
with
his
Deluminator,

Privet
Drive
is
not
visible.

The
giant
Hagrid,
still
wearing
his
motorcycle
goggles,
stoops

down
to
show
baby
Harry
Potter
to
Dumbledore
and
Minerva
McGonagall.
Harry
is
the

central
focus
of
this
image,
wrapped
in
a
white
blanket,
shining
as
brightly
as

the
Moon.

As
the
group
contemplates
the
baby,
Dumbledore's
forehead
is
creased
with
concern.

Professor
McGonagall
clasps
her
hands
together,
her
hair
drawn
back
in
a
tight
bun.

This
quiet,
dark
moment
was
the
beginning
of
Harry's
story,
fresh
from
his
first

encounter
with
Lord
Voldemort.

This

portrait

shows

Professor

Lupin,

Harry

Potter's

Defense

Against

the

Dark
Arts
teacher.
Remus
Lupin
only
taught
Harry
during
his
third
year
at
Hogwarts,

resigning
after
Snape
informed
the
students'
parents
about
the
professor's
“furry
little
problem.”
Lupin,

of
course,
was
a
werewolf.
Lupin's
lessons
offered
instruction
on
shape-shifting
Boggarts
and
demonic

Grindylows,
and
it
was
he
who
taught
Harry
to
cast
a
Patronus
for
the

first
time.

In
this
portrait,
Lupin
stands
with
his
hands
in
his
pockets,
averting

his
gaze
from
the
reader.

The
dark
rings
under
his
eyes
and
graying
hair

perhaps
make
him
look
older
than
he
really
is.

The
professor
stands
in
his

office,
a
bookcase
behind
him
loaded
with
bottles,
books,
and
bones.

A
poster
of

the
Full
Moon
hangs
on
the
shelves,
representing
the
thing
he
fears
the
most.

Johann
Geiler

von
Kaysersberg
was

a
theologian
who
preached
at
Strasbourg
Cathedral
in
France.
In
1508,
he
gave
a

series
of
sermons
for
Lent,
which
were
transcribed
and
decorated
with
woodcut
illustrations.
The

collection
was
later
posthumously
published
as
*Die
Emeis
(The
Ants)*.

On
the
third
Sunday

of
Lent
("Oculi"),
Geiler
delivered
a
sermon
on
werewolves.
While
Professor
Snape
may
not

have
wished
“to
fathom
the
way
a
werewolf's
mind
works,”
Geiler
listed
seven
reasons

why
such
beasts
could
attack—including
hunger,
savageness,
old
age,
and
madness.

He
also
advised

that
the
likelihood
of
being
bitten
was
affected
by
a
werewolf's
age
and
its

experience
of
eating
human
flesh.

Snakes

have

long

been

considered

magical

creatures

with

great

symbolic
power.

The
ability
of
snakes
to
shed
and
regrow
their
skin
is
integral

to
their
association
with
renewal,
rebirth,
and
healing.

In
many
cultures,
snakes
also
represent

good
and
evil,
a
dualism
that
has
importance
for
their
connection
with
magic.
As

Professor
Dumbledore
recognized
in
the
Harry
Potter
books,
anyone
who
associates
with
snakes
is

“supposedly
connected
with
the
Dark
Arts,
although
as
we
know,
there
are
Parselmouths
among

the
great
and
the
good
too.”

The
slender,
serpentine
wand
at
left
was
a

tool
for
channeling
magical
forces—its
dark
color
and
snakelike
shape
force
us
to
question

whether

it

was

used

for

good

or

for

evil.

F

F

This

magic

staff

was

carved

from
bog
oak:
timber
that
had
been
buried
for
centuries
in
peat.
The
low

oxygen
levels,
acidity,
and
tannins
of
the
peat
preserved
the
wood,
hardening
and
blackening

it
in
the
process.

It
was
carved
by
the
Neopagan
Stephen
Hobbs
and
given

to
a
Wiccan
priest
named
Stewart
Farrar
during
the
late
20th
century.
The
staff

is
almost
six
feet
long
and
has
been
decorated
with
a
serpent
in
order

to
enhance
its
power.
Not
only
do
snakes
represent
a
capacity
for
change,
renewal,

and
transformation,
but
their
coils
symbolize
the
dual
cycles
of
light
and
dark,
life

and
death,
reason
and
passion,
healing
and
poison,
protection
and
destruction.

This

image

of

a

“wizard”

charming

a

serpent

is

found

in

a
beautifully
illustrated
bestiary.
The
accompanying
text
describes
several
mythological
snakes,
including
the
cerastes

(a
horned
serpent)
and
the
scitalis
(a
creature
with
incredible
markings
on
its
back).

It
then
focuses
on
the
emor
roris,
a
type
of
asp
so
called
because

its
bite
causes
hemorrhages
of
such
disastrous
proportions
a
victim
will
sweat
out
their

own
blood
until
they
die.

Fortunately,
the
manuscript
explains
one
way
to
avoid
such

a
fate.
If
a
conjurer
sings
to
the
asp
in
its
cave
and
lulls

it
to
sleep,
the
snake
charmer
will
then
be
able
to
remove
the
precious

stone
that
grows
on
the
asp's
forehead.
Without
the
stone,
the
snake
is
rendered

powerless.

“The

thick

gold

leaf

in

this

bestiar

y

bathes

the

page

in

light.

The

manuscript

contains

a

further

80

illustrations

of

various

real

and

mythical

*creatures,
such
as
the
phoenix,
the
unicorn,
and
the
centaur.”*

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1999. The public sector has become an important employer of people with mental health problems.

There is a growing awareness of the need to improve the mental health of people in the public sector. The Department of Health (1999) has published a strategy for mental health, which includes a commitment to improve the mental health of people in the public sector. The strategy states that the public sector should be a place where people can work and live without experiencing mental health problems.

The strategy also states that the public sector should be a place where people can get the help they need if they do experience mental health problems. The strategy includes a number of measures to improve the mental health of people in the public sector, including:

- Improving the working conditions of people in the public sector.
- Improving the support available to people in the public sector who experience mental health problems.
- Improving the training and development of people in the public sector.
- Improving the access to mental health services for people in the public sector.

The strategy also includes a number of measures to improve the mental health of people in the public sector, including:

- Improving the working conditions of people in the public sector.
- Improving the support available to people in the public sector who experience mental health problems.

Albertus
Seba
was

a
Dutch
apothecary
and
collector,
based
in
Amsterdam.
From
this
center
of
maritime
trade,

Seba
supplied
drugs
to
the
Russian
Tsar
Peter
the
Great.
He
also
provided
the

port's
ships
with
medicines,
which
he
often
traded
for
exotic
animal
specimens.
After
selling

his
first
collection
of
snakes,
birds,
and
lizards
to
the
Tsar
in
1717,
Seba

began
a
second,
larger
collection,
which
he
kept
in
his
own
house.
In
1731,

he
commissioned
artists
to
draw
every
single
item
in
precise
detail.
This
was
such

a
huge
undertaking
the
project
was
not
completed
until
30
years
after
Seba's
death

and
the
volume
contained
449
illustrated
plates.
Many
of
the
specimens
Seba
collected
were

used
for
medical
research.

He
took
a
keen
interest
in
the
potential
of
snakes

for
lifesaving
cures—his
collection
contained
many
serpents
such
as
this
reticulated
python,
native
to

Southeast Asia.

the 1990s, the number of people in the world who are obese has increased by 100% (World Health Organization 1997).

Obesity is a complex condition, with many causes and consequences. It is a condition that is associated with a number of health problems, including heart disease, diabetes, and high blood pressure. It is also a condition that is associated with a number of social problems, including discrimination and stigma. The causes of obesity are complex, and include a combination of genetic, environmental, and behavioral factors. The consequences of obesity are also complex, and include a number of health and social problems.

These
typed
pages
are

part
of
an
early
draft
of
*Harry
Potter
and
the
Sorcerer's
Stone.*

In
this

scene,
Hagrid
comes
to
the
office
of
Fudge,
a
Muggle
minister,
and
warns
him

about
You-Know-Who
(even
in
this
early
draft
Hagrid
refuses
to
say
the
name).
In

turn,
Fudge
warns
the
public
about
this
“red-eyed
dwarf.”

The
red
eyes
remain
in

the
final
incarnation
of
Lord
Voldemort,
but
the
character
took
time
to
develop
fully

into
the
terrifying
figure
we
now
know
from
the
published
stories.
This
scene
is

reminiscent
of
Cornelius
Fudge
visiting
the
Prime
Minister
of
the
Muggles
in
the
first

chapter
of
*The
Half-Blood
Prince.*

As
J.K.
Rowling
has
said,
“I
often
cut
ideas

and
put
them
into
later
books.
Never
waste
a
good
scene!”
*“While
many
details*

*of
the
world
described
in
this
chapter
are
familiar
from
the
published
books,*

*such
as
the
concept
of
Muggles,
these
scenes
provide
a
very
different*

*account
of
the
beginning
of
the
stor
y.”*

"Oh dear," said Fudge breathlessly, "The thing is, I'd-be-
was planning to retire early. Tomorrow, as a matter of fact. Mrs.
Fudge and I were thinking of moving to Portugal. We have a villa-"

The giant lent forward, his beetle brows low over his glinting
eyes.

"Yeh won' be safe in Portugal if 'e ain' stopped, Fudge."

"Won't I?" said Fudge weakly, "Oh, very well then... what is
it Mr. Dumblething wants?"

"Dumbledore," said the giant. "Three things. First, yeh
gotta put out a message. On television, an' radio, an' in the
newspapers. Warn people not teh give 'im directions. 'Cause
that's 'ow 'e's gettin' us, see? 'E 'as ter be told. Feeds on
betrayal. I don' blame the Muggles, mind, they didn' know what
they were doin'.

"Second, ~~yeh-gotta-make-sure~~ ye're not teh tell anyone abou'
us. If Dumbledore manages ter get rid of 'im, yeh gotta swear
not ter go spreadin' it about what yeh know, abou' us. We keeps
ourselves quiet, see? Let it stay that way.

An' third, yeh gotta give me a drink before I go. I gotta
long journey back."

The giant's face creased into a grin behind his wild beard.

"Oh - yes, of course," said Fudge shakily, "Help yourself -
there's brandy up there - and - not that I suppose it will happen -
I mean, I'm a Muddle - a Muffle - no, a Muggle - but if this
person - this thing - comes looking for me -?"

"Yeh'll be dead," said the giant flatly over the top of a large
glass of brandy. "No-one can survive if 'e attacks them, Ain'
never been a survivor. But like yeh say, yer a Muggle. 'E's
not interested in you."

The giant drained his glass and stood up. He pulled out an
umbrella. It was pink and had flowers on it.

"I'll be off, then," he said.

"Just one thing," said Fudge, watching curiously as the giant
opened the umbrella, "What is this - person's - name."

The giant looked suddenly scared.

"Can' tell yeh that," he said, "We never say it. Never."

He raised the pink umbrella over his head, Fudge blinked -
and the giant was gone.

"Your kind?"

"Yeah... our kind. We're the ones who've bin disappearin'. We're all in hidin' now." But I can't tell yeh much abou' us. Can't 'ave Muggles knowin' our business. But this is gettin' outta hand, an' all you Muggles are gettin' involved - them on the train, fer instance - they shouldn'ta bin hurt like that. That's why Dumbledore sent me. Says it's your business too, now."

"You've come to tell me why all these houses are disappearing?" Fudge said, "And why all these people are being killed?"

"Ah, well now, we're not sure they 'ave bin killed," said the giant. "He's jus' taken them. Needs 'em, see. 'E's picked on the best. Dedalus Diggle, Elsie Bones, Angus an' Elspeth McKinnon ... yeah, 'e wants 'em on 'is side."

"You're talking about this little red-eyed -?"

"Shh!" hissed the giant. "Not so loud! 'E could be 'ere now, fer all we know!"

Fudge ~~shivered~~ and looked wildly around them. "C - could he?"

"S'alright, I don't reckon I was followed," said the giant in a gravelly whisper.

"But who is this person? What is he? One of - um - your kind?"

The giant snorted.

"Was once, I s'pose," he said. "But I don't think 'e's anything yeh could put a name to any more. 'E's not a 'uman. ~~'E's not an animal. -- 'E's not properly~~ Wish 'e was. 'E could be killed if 'e was still 'uman enough."

"He can't be killed?" whispered Fudge in terror.

"Well, we don't think so. But Dumbledore's workin' on it. 'E's gotta be stopped, see?"

"Well, yes of course," said Fudge. "We can't have this sort of thing going on..."

"This is nothin'," said the giant, "'E's just gettin' started. Once 'e's got the power, once 'e's got the followers, no-one'll be safe. Not even Muggles. I 'eard 'e'll keep yeh alive, though. Fer slaves."

Fudge's eyes bulged with terror.

~~"But who is this --- this person?"~~

"This Bumblebore - Dunderbore -"

"Albus Dumbledore," said the the giant severely.

"Yes, yes, him - you say he has a plan?"

"Oh, yeah. So it's not hopeless yet. Reckon Dumbledore's the ~~guy~~ He's still afraid of. But 'e needs your 'elp. I'm 'ere teh

DEFENSE AGAINST THE DARK ARTS

Fudge wondered, of course, if he was going mad. He seriously considered the possibility that the giant had been a hallucination. But the brandy glass the giant had drunk from was real enough, left standing on his desk.

Fudge wouldn't let his secretary remove the glass next day. It reassured him he wasn't a lunatic to do what he knew he had to do. He telephoned all the journalists he knew, and all the television stations, chose his favourite tie and gave a press conference. He told the world there was a ~~maniac madman-about~~ a strange little man going about. A little man with red eyes. he told the public to be very careful not to tell this little man where anyone lived. Once he had given out this strange message, he said "Any questions?" But the room was completely silent. Clearly, they all thought he was off his rocker. Fudge went back to his office and sat staring at the giant's empty brandy glass. ~~This was the end of his career-~~

The very last person he wanted to see was Vernone Dursley. Dursley would be delighted. Dursley would be happily counting the days until he was made Minister, now that Fudge was so clearly nuttier than a bag of salted peanuts.

But Fudge had another surprise in store. Dursley knocked quietly, came into his office, sat opposite him and said flatly,

You've had a visit from One of Them, haven't you?"

~~One-of-~~ Fudge looked at Dursley in amazement.

"You - know?"

"Yes," said Dursley bitterly, "I've known from the start. I - happened to know there were people like that. Of course, I never told anyone.

* * * * *

~~Most-people-~~

Perhaps ~~people-did-~~ most people did think Fudge

Whether or not nearly everyone thought Fudge had gone very strange, the fact was that he seemed to have stopped the odd accidents. Three whole weeks passed, and still the empty brandy glass stood on Fudge's desk to give him courage, and not one bus flew, the houses of Britain stayed where they were, the trains stopped going swimming. Fudge, who hadn't even told Mrs. Fudge about the giant with the pink umbrella, waited and prayed and slept with his fingers crossed. Surely this Dumbledore would send a message if they'd managed to get rid of the red eyed dwarf? Or did this horrible silence mean that the dwarf had in fact got everyone he wanted, that he was even now planning to appear in Fudge's office and vanish him for trying to help the other side - whoever they were?

And then - one Tuesday -

Later that evening, when everyone else had gone home, Dursley sneaked pp to Fudge's office carrying a crib., which he laid on Fudge's desk.

The child was asleep. Fudge peered nervously into the crib. The boy had a cut on his forehead. It was a very strangely shaped cut. It looked like a bolt of lightning.

"Going to leave a scar, I expect," said Fudge.

"Never midd the ruddy scar, what are we going to do with him?" said Bursley.

"Do with him? Why, you 'll have to take him home, of course," said Fudge in surprise. "He's your nephew. His parents have banished. What else can we do? I thought you didn't want anyone to know you had relatives involved in all these odd doings?"

"Take him home!" said Dursley in horror. "My son Didsbury is just this age, I don't want him coming in contact with one of these."

"Very well, then, Bursley, we shall just have to try and fin someone who does want to take him. Of course, it will be difficult to keep the story out of the press. Noeone else has lived after one of these wanishments. There'll be a lot of interest -"

"Oh, very well," snapped Dursley. "I'll take him."

He picked up the crib and stumped angrily from bhe room.

Fudge closed his briefcase. It was time he was getting home too. He had just put his hand on the doorhandle when a ~~few~~ cough behind him made him clap his hand to his heart.

"Don't hurt me! I'm a Muggle! I'm a Mug~~gle~~!"

"I know yeh are," said a ~~few~~, growling voice.

It was the giant.

"You!" said Fudge. "What is it? Oh, Good Lord, don't tell me-" For the giant, he saw, was crying. Sniffing into a large spotted handkerchief.

"It's all over," said the giant.

"Over?" said Fudge faintly, "It didn't work? Hds he killed Dunderbore? Are we all going to be turned into slaves?"

"No, no," sobbed the giant. "He's gone. Everyone's come back. Diggle, the Bones, the McKinnons... they're all back. Safe. Everyone 'e took is back on our side an' He's disappeared 'imself."

"Good Heavens! This is wonderful news! You mean Mr. Dunderbumble's plan worked?"

eyes. "Never 'ad a chance to try it," said the giant, mopping his

Salazar
Slytherin's
monster,
the

giant
basilisk,
is
shown
coiling
past
Harry
in
this
striking
image
from
*The
Chamber*

*of
Secrets.*

The
beast
is
so
huge,
it
is
hard
to
tell
where
its

body
begins
or
ends,
and
the
dark
colors
of
its
scales
are
oppressive
and

intimidating.
Harry
is
clutching
the
ruby-decorated
sword
of
Godric
Gryffindor
in
his
hands,
frozen

in
the
air
mid-swing.

The
bright
white
tip
of
the
sword
mirrors
the
sharp

teeth
of
the
basilisk.

The
monster's
terrible
yellow
eyes
are
streaming
with
blood
after

Fawkes
the
phoenix
has
pierced
them
with
its
beak.
This
is
an

This
Italian

manuscript
contains
245
drawings
of
different
animals,
executed
by
an
individual
known
as
Idonius.

Many
of
these
creatures
are
mythical
in
nature,
including
the
jaculus
(a
flying
serpent),

the
onocentaur
(half
man,
half
donkey),
and
the
basilisk,
shown
here.

The
accompanying
description

is
based
on
the
works
of
Claudius
Aelianus
and
Pliny
the
Elder.
According
to

Aelianus,
the
basilisk
was
only
the
width
of
a
palm,
but
it
could
kill

someone
instantly

This

very

Brief

Description,

comprising
only

a
title

page
and

two
pages

of
text,

was

written

by

Jacobus

Salgado.
Salgado
was
a
refugee
from
Spain
and
a
convert
to
Protestantism,
who
came

to
settle
in
England.
Around
1680,
in
need
of
cash,
Salgado
displayed
a
“basilisk”

given
to
him
by
a
Dutch
doctor
who
had
recently
returned
from
Ethiopia.
The

creature
presumably
had
been
stuffed
or
preserved
in
some
way.
Salgado
wrote
this
pamphlet

to
accompany
the
spectacle,
describing
the
beast
as
yellow,
with
a
crown-like
crest
and

the
body
of
a
rooster
attached
to
a
serpent's
tail.

The
pamphlet
also
spells

out
the
danger
of
the
basilisk's
glare.

Salgado
declares
that

“In
the
time
of

Alexander
the
Great,
there
was
one
of
them
which,
lying
hid
in
a
wall,

killed
a
great
troop
of
his
soldiers
by
the
poisonous
glances
of
his
eyes

upon
them.”

*“Despite
Salgado's
terrifying
description
of
the
basilisk,
the
creature
on
the*

*title
page
looks
rather
harmless,
even
though
it
has
just
killed
the
person*

*in
the
foreground.”*

The

*Historie
of
Foure-Footed
Beastes*

was
the
first
major
book
about
animals
to
be
published

in
English.
It
features
a
variety
of
animals,
from
the
common
(rabbits,
sheep,
goats)

to
the
exotic
(lions,
elephants,
rhinoceroses)
and
the
legendary.
This
chapter
focuses
on
the

sphinx.

The
woodcut
illustration
shows
a
creature
with
a
woman's
head
and
a
lion's

body.

Edward

Topsell

described

the

sphinx

as

“of

a

fierce

but

tameable

nature.”

Less

well
known
is
its
ability
to
store
food
in
its
cheeks
until
it
is

ready
to
eat—just
like
a
hamster!
Sphinxes
are
famous
for
their
enigmatic
powers.
In

*The
Goblet
of
Fire,*
Harry
had
to
answer
the
sphinx's
riddle
to
proceed
through

the
maze
during
the
Triwizard
Tournament.

The

kappa

takes

its
name
from
the
Japanese
words
for
“river”
and
“child.”
These
were
mischievous
creatures,

with
the
power
to
pull
people
into
the
lakes
or
rivers
in
which
they

dwelt.

The
wizarding
world's
famous
Magizoologist
Newt
Scamander
recognized
this
danger,
noting
that
“The

Kappa
feeds
on
human
blood
but
may
be
persuaded
not
to
harm
a
person

if
it
is
thrown
a
cucumber
with
that
person's
name
carved
into
it.”
The

S

This
personally
annotated,
magical
recipe

book
was
made
in
Ethiopia.
Written
in
Ge'ez,
also
known
as
classic
Ethiopic,
it

contains
a
rich
collection
of
protective
amulets,
talismanans,
charms,
and
incantations.
This
manuscript
would

have
belonged
to
an
exorcist
or
a
Däbtära,
a
highly
educated
religious
figure.
Däbtäras

typically
study
for
several
years
or
come
from
families
of
clergy.
On
these
pages

are
talismans
and
geometric
images,
used
for
making
amulet
scrolls,
and
accompanied
by
prayers

for
undoing
spells
and
charms.
Talismanic
drawing
focuses
on
the
image
of
the
eye,

providing
a
defense
against
the
evil
eye
and
the
dark
arts.

*“Since
medieval
times,*

*Däbtäras
have
worked
in
the
courts
or
have
taught
in
small
parish
schools,*

*supplementing
their
income
by
producing
amulet
scrolls
and
practicing
traditional
medicine.
From
the*

*marginal
notes
in
this
recipe
book,
we
can
deduce
with
some
certainty
that*

*it
belonged
to
a
practitioner
of
magic.”*

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become an important employer of people with mental health problems.

There is a growing awareness of the need to improve the mental health of people in the public sector. The Department of Health (1996) has published a strategy for mental health care, which includes a commitment to improve the mental health of people in the public sector. The strategy states that 'the mental health of people in the public sector should be a priority for all public sector employers'.

The strategy also states that 'public sector employers should be encouraged to develop policies and procedures to promote the mental health of their employees'. The strategy also states that 'public sector employers should be encouraged to provide training and support for their employees to help them to manage their mental health'.

The strategy also states that 'public sector employers should be encouraged to provide a range of services to support the mental health of their employees, including counselling, stress management, and employee assistance programmes'. The strategy also states that 'public sector employers should be encouraged to provide a range of services to support the mental health of their employees, including counselling, stress management, and employee assistance programmes'.

The strategy also states that 'public sector employers should be encouraged to provide a range of services to support the mental health of their employees, including counselling, stress management, and employee assistance programmes'. The strategy also states that 'public sector employers should be encouraged to provide a range of services to support the mental health of their employees, including counselling, stress management, and employee assistance programmes'.

The strategy also states that 'public sector employers should be encouraged to provide a range of services to support the mental health of their employees, including counselling, stress management, and employee assistance programmes'. The strategy also states that 'public sector employers should be encouraged to provide a range of services to support the mental health of their employees, including counselling, stress management, and employee assistance programmes'.

CHAPTER 8

**CARE
of MAGICAL**

CREATURES

—

274

H

A

G

R

I

D

Rubeus

Hagrid,

the

half-giant,

introduced

Harry

to
many
of
the
wonderful
creatures
that
stride,
scuttle,
and
soar
around
the
wizarding

world.

Jim

Kay's

artwork

brings

to

life

Hagrid's

mane

of

black

hair

and

“wild,

tangled
beard.”
“Hagrid
is
a
relief
to
draw,”
says
Jim
Kay,
“because
drawing
children

you
can't
put
a
line
wrong,
a
misplaced
scribble
can
age
a
child
by

ten
years.
There
are
no
such
problems
with
Hagrid;
he's
a
mass
of
scribbles

with
eyes.”

In
the
Harry
Potter
books,
the
gamekeeper
was
a
reliable
and
trustworthy

presence,
despite
his
blind
spot
toward
dangerous
beasts.

Hagrid
became
the
professor
for
Care

of
Magical
Creatures
in
Harry's
third
year.

Were
skeletons
of
300-foot-tall
giants
found
on
Mount
Erice
in
Sicily?
While
traveling

in
Italy,
the
German
author
Athanasius
Kircher
became
fascinated
with
the
idea
of
what

might
lie
beneath
the
earth.

He
even
climbed
inside
the
volcano
Mount
Vesuvius,
which

had
last
erupted
seven
years
earlier.
Kircher
claimed
that
an
enormous
skeleton
had
been

discovered
sitting
in
a
Sicilian
cave
in
the
14th
century.

In
Kircher's
Mundus
Subter

raneus

(“The
Underground
World”)

he

shows

the

scale

of

it

in

comparison

to

a

normal
human,
the
Biblical
giant
Goliath,
a
Swiss
giant,
and
a
Mauritanian
giant.

Cap. IV. deretur. Quæ omnia à Volaterrano confir-

Volaterræ mantur.

Atque hæc sunt, quæ de *Gigantibus* eorum-
que immensa vastitate adducenda duximus.
Restat tandem hoc loco, num verè tam pro-
digiosa statura homines unquam in Mundo
fuerint, hoc loco demonstrare.

DISQUISITIO PRIMA.

Num verè Natura tam monstrosæ magni-
tudinis homines, quam *Auctores allegati*
referunt, unquam protulerit.

IN sepulchris locisque subterraneis subin-
de ossa reperiri, quæ ossa *gigantum* esse di-

cuntur, non abnuo; nam ut suprà annotavi-
mus, *Gigantes* vasti corporis homines fuisse,
vel ipsa Sacra Scriptura testatur, *Gen. 7. & lib. 1. Reg. c. 17. Maximiliano Cæsari Anno 1511*, teste *Surio*, *gigantes magnitudinis vir ex Polonia oriundus*, oblati sunt, qui & pro magnitudine corporis, proportionato cibo singulis prandis vitulum & ovem absumebat. Similis nostris temporibus *Ferdinando II.* in comitiis Ratiponensibus, Anno 1623 exhibitus fuit, ut proinde de *inaffitate magnitudinis hominibus* utriusque sexus minime dubitem, cum tales nullum non seculum protulerit.

Sotius.

Gigantis Sceletum

in montib. Elicæ præpè Drepanum
invenit Boccatio Inse aeo cubitum.

Homines autem fuisse unquam, qui 30. 60.
100. 200. cubitos excederent, petægo: &
ut hoc luculentissimis rationibus compro-
bem, primò quid per *cubitum*, *pedem*, *palmum*, notetur, præmittam, ut ex notis men-
suris *cadaverum gigantium* vastitas & in-
credibilis magnitudo clarius innotescat.

Cubitus juxta communem Geometrarum

TOM. II.

æstimationem in se continet pedes duos, &
pes Geometricus palmum Romanum unum
cum dimidio, quæ fere facro cubito respon-
dent; hæc enim tanquam notioribus ad ra-
tionem nostrum de *gigantibus* liquidius
comprobandum præmissis, uti visum fuerit
mensuras quilibet ad suæ nationis proprias
facile applicare poterit.

drawing
by
J.K.
Rowling,
Hagrid
is
shown

taking
Harry
on
his
first
trip
to
his
vault
at
Gringotts,
located
in
the

caverns
deep
beneath
the
wizarding
bank.

Hagrid
covers
his
eyes
with
his
hand
during

the
ride.
Harry,
on
the
other
hand,
keeps
his
eyes
“wide
open”
for
the

whole
journey.
This
image
shows
visually
Hagrid's
discomfort
at
being
cramped
up
inside
the

Gringotts
cart.

J.K.

Rowling
uses

the

giant's
streaming

hair

and

the

torch

flame

bending

in
the
wind
to
convey
a
sense
of
rattling
speed.

This
typed
draft
represents
an
unedited
version
of
Harry

*Potter
and
the
Sorcerer's
Stone.*

As
part
of
the
editorial
process,
a
literary
draft

may
be
amended
in
order
to
improve
the
pacing.
For
a
scene
like
this,

full
of
action
and
drama,
some
passages
were
subsequently
shortened
to
move
the
story

along
more
quickly.
Some
scenes,
in
turn,
may
be
completely
cut,
such
as
the

encounter
with
a
preoccupied
Nearly
Headless
Nick,
and
Hermione
reciting
the
textbook
definition
of

trolls,
both
shown
on

page
167
of
this
draft.

Curator

"Hello, hello," he said absently, "Just pondering a little problem, don't take any notice of me..."

"What's Peeves done this time?" asked Harry.

"No, no, it's not Peeves I'm worried about," said Nearly Headless Nick, looking thoughtfully at Harry. "Tell me, Mr. Potter, if you were

167

worried that someone was up to something they shouldn't be, would you tell someone else, who might be able to stop it, even if you didn't think much of the person who might be able to help?"

"Er - you mean - would I go to Snape about Malfoy, for instance?"

"Something like that, something like that..."

"I don't think Snape would help me, but it'd be worth a try, I suppose," said Harry curiously.

"Yes... yes... thank you, Mr. Potter..."

Nearly Headless Nick glided away. Harry and Ron watched him go, puzzled looks on their faces.

"I suppose you're bound not to make much sense if you've been beheaded," said Ron.

Quirrell was late for class. He rushed in looking pale and anxious and told them to turn to "p-page fifty four" at once, to look at "t-t-trolls."

"N-now, who c-c-can tell me the three types of t-troll? Yes, Miss G-

167

Granger?"

"Mountain-dwelling, river-dwelling and sea-dwelling," said Hermione promptly. "Mountain-dwelling trolls are the biggest, they're pale grey, bald, have skin tougher than a rhinoceros and are stronger than ten men. However, their brains are only the size of a pea, so they're easy to confuse -"

"Very g-good, thank you, Miss Gr -"

"River trolls are light green and have stringy hair -"

"Y-y-yes, thank you, that's excell -"

" - and sea trolls are purplish grey and -"

"Oh, someone shut her up," said Seamus loudly. A few people laughed.

There was a loud clatter as Hermione jumped to her feet, knocking her chair over, and ran out of the room with her face in her hands. A very awkward silence followed.

"Oh d-d-dear," said Professor Quirrell.

*

When Harry woke up next day, the first thing he noticed was a delicious smell in the air.

"It's pumpkin, of course!" said Ron, "Today's Hallowe'en!"

Harry soon realised that Hallowe'en at Hogwarts was a sort of mini-Christmas. When they got down to the Great Hall for breakfast, they found that it had been decorated with thousands of real bats, which were hanging off the ceiling and window-sills, fast asleep. Hagrid was putting hollow pumpkins on all the tables.

"Big feast tonight," he grinned at them, "See yeh there!"

There was a holiday feeling in the air because lessons would be finishing early. No-one was in much of a mood for work, which annoyed Professor McGonagall.

168

"Unless you settle down, you won't be going to the feast at all," she said, a few minutes into Transfiguration. She stared at them until they had all fallen silent. Then she raised her eyebrows.

"And where is Hermione Granger?"

They all looked at each other.

"Miss Patil, have you seen Miss Granger?"

Parvati shook her head.

cupboard doors, but not a hint of a troll did they find.

They'd just decided to try the dungeons when they heard footsteps.

"If it's Snape, he'll send us back - quick, behind here!"

They squeezed into an alcove behind a statue of Godfrey the Gormless.

Sure enough, a moment later they caught a glimpse of Snape's hook nose rushing past. Then they heard him whisper "Alohomora!" and a click.

"Where's he gone?" Ron whispered.

"No idea - quick, before he gets back -"

They dashed down the stairs, three at a time, and rushed headlong into the cold darkness of the dungeons. They passed the room where they usually had Potions and were soon walking through passages they'd never seen before. They slowed down, looking around. The walls were wet and slimey and the air was dank.

"I never realised they were so big," Harry whispered as they turned yet another corner and saw three more passageways to choose from. "It's like Gringotts down here..."

173

Ron sniffed the damp air.

"Can you smell something?"

Harry sniffed too. Ron was right. Above the generally musty smell of the dungeons was another smell, which was rapidly becoming a foul stench, a mixture of old socks and public toilets, the concrete kind that no-one seems to clean.

And then they heard it. A low grunting - heavy breathing - and the shuffling footfalls of gigantic feet.

They froze - they couldn't tell where the sound was coming from amid all the echoes -

Ron suddenly pointed; at the end of one of the passageways.

something huge was moving. It hadn't seen them... it ambled out of sight..

"Merlin's beard," said Ron softly, "It's enormous..."

They looked at each other. Now that they had seen the troll, their ideas of fighting it seemed a bit - stupid. But neither of them wanted to be the one to say this. Harry tried to look brave and unconcerned.

"Did you see if it had a club?" Trolls, he knew, often carried clubs.

Ron shook his head, also trying to look as though he wasn't bothered.

"You know what we should do?" said Harry, "Follow it. Try and lock it in one of the dungeons - trap it, you know..."

If Ron had been hoping Harry was going to say, "Let's go back to the feast", he didn't show it. Locking up the troll was better than trying to fight it.

"Good idea," he said.

They crept down the passageway. The stench grew stronger as they reached the end. Very slowly, they peered around the corner.

174

There it was. It was shuffling away from them. Even from the back, it was a horrible sight. Twelve feet tall, its skin was a dull, granite grey, its great lumpy body like a boulder with its small bald head perched on top like a coconut. It had short legs thick as tree trunks with flat, horny feet. The smell coming from it was incredible. It was holding a huge wooden club, which dragged along the floor because its arms were so long.

They pulled their heads back out of sight.

"Did you see the size of that club?" Ron whispered. Neither of them could have lifted it.

"We'll wait for it to go into one of the chambers and then barricade the door," said Harry. He looked back around the corner.

The troll had stopped next to a doorway and was peering inside. Harry could see its face now; it had tiny red eyes, a great squashed nose and a gaping mouth. It also had long, dangling ears which waggled as it shook its head, making up its tiny mind where to go next. Then it slouched slowly into the chamber.

Harry looked around, searching -

"There!" he whispered to Ron, "See? On the wall there!"

A long, rusty chain was suspended about half way down the passageway. Harry and Ron darted forward and pulled it off its nail. Trying to stop it clinking, they tiptoed towards the open door, praying the troll wasn't about to come out of it -

Harry seized the door handle and pulled it shut: with trembling hands, they looped the chain around the handle, hooked it onto a bolt sticking out of the wall and pulled it tight.

"It'll take it a while to get out of that," Harry panted, as they pulled the chain back across the door and tied it firmly to a torch bracket,

"Come

175

on, let's go and tell them we've caught it!"

Flushed with their victory they started to run back up the passage, but as they reached the corner they heard something that made their hearts stop - a high, petrified scream - and it was coming from the chamber they'd just chained up -

"Oh, no," said Ron, pale as the Bloody Baron.

"There's someone in there!" Harry gasped.

"*Hermione!*" they said together.

It was the last thing they wanted to do, but what choice did they have? Wheeling around they sprinted back to the door and ripped the chain off, fumbling in their panic - Harry pulled the door open - they ran inside.

This

is

a

preparatory

study

of

a

mountain

troll

or,
to
use
the
scientific
name,
*Troglodytarum
alpinum.*

In
J.K.
Rowling's
wizarding
world
trolls

can
grow
to
twelve
feet
tall,
and
are
extremely
strong
and
thick
skinned.
Due

to
the
very
small
size
of
their
brains,
they
are
easily
confused
and
quick

to
flare
into
a
temper.

A
violent
disposition,
alongside
a
taste
for
human
flesh,

meant
that
these
creatures
were
classed
as
dangerous
by
the
Ministry
of
Magic.
This

troll,
covered
in
growths
and
with
a
perplexed
look
in
its
eye,
is
typical

of
its
species.

This
is
the
very
first
handwritten
draft
of
the
scene
in
*Harry
Potter
and*

the
Deathly
Hallows
in
which
Harry,
Ron,
and
Hermione
escape
from
Gringotts
bank
on

the
back
of
a
dragon.
The
first
page
describes
the
dramatic
escape,
and
a

little
arrow
in
the
corner
indicates
that
the
scene
continues
on
the
previous
page.

There
are
many
crossings-out
and
added
sentences
in
both
margins.
The
second
page
describes

Harry
destroying
a
cup,
the
Hufflepuff
Horcrux,
while
his
friends
are
still
in
the

Lestranges'
vault.

This

is

an

event

that

does

not

take

place

in

the

published

text—instead
Hermione
is
the
one
who
destroys
the
cup.

*“When
I’m
planning
I
often*

THE OF MAGICAL CREATURES

295

E
T
H
I
O
P
I
A
N
D
R

A
G
O
N
S
On
May
13,
1572,
the
same
day
that

Pope
Gregory
XIII
was
invested,
a
“monstrous
dragon”
was
found
in
the
countryside
near

Bologna.
Recognized
as
a
bad
omen,
the
dragon's
body
was
sent
for
analysis
to

the
Pope's
cousin,
the
celebrated
naturalist
and
collector
Ulisse
Aldrovandi.
Although
Aldrovandi
quickly
wrote

up
his
findings,
his
work
was
not
published
for
nearly
60
years,
appearing
posthumously

in
1640
as
A
*History
of
Snakes
and
Dragons.*

This
might
have
been
just

the
sort
of
text
Hagrid
needed
when
“looking
up
stuff
about
dragons”
for
hatching

Norbert,
or
when
Harry
was
in
the
library
pulling
down
“every
book
he
could

find
on
dragons”
for
the
Triwizard
Tournament.

S

Jim

Kay's

study

of

dragon

eggs

reflects

the

sheer

variety

of

dragon
species
in
Harry
Potter's
world.

The
artist
painted
the
shape
and
base
colors

of
the
eggs
first,
then
added
and
overlaid
extra
details
and
flecks
of
color

to
the
final
versions.

A
scale
to
indicate
the
size
of
these
eggs
shows

the
smallest
to
be
about
six
inches
high
(about
the
same
size
as
an

ostrich
egg)
and
the
largest
up
to
fifteen
inches.
Some
of
the
eggs
are

simple
and
almost
ordinary
looking,
while
others
unmistakably
belong
in
the
magical
world.
All

of
the
egg
species
would
have
been
familiar,
of
course,
to
Newt
Scamander.

First
year
students
at
Hogwarts
were
allowed
to

bring
an
owl,
cat,
or
a
toad
to
school—each
animal
had
an
historic
magical

significance
as
a
powerful
familiar
of
witches
and
wizards.

In
*The
Sorcerer's
Stone,*
Hagrid

bought
Harry
a
beautiful
female
Snowy
Owl,
whom
the
boy
named
Hedwig.
John
James

Audubon's
iconic
watercolor
contains
a
pair
of
these
enormous
birds.

In
front
is
the

larger
female—26
inches
tall
with
a
wingspan
of
56
inches—
with
salt-and-pepper
plumage,
while

the
smaller
male
gets
paler
with
age.

Audubon's
dazzling
watercolor
is
his
model
for

a
plate
in
*The
Birds
of
America*
(1827

38),
which
was
engraved
by

Robert
Havell
Jr.

The
artist,
who
was
the
first
person
to
portray
all
his

birds
life-size,
painted
the
pair
on
double-elephant-size
paper
(40
inches
high).
The
owl's
hypnotic

eyes—with
yellow
irises
designed
to
gather
maximum
light
in
the
polar
twilight—are
riveted
on

the
beholder.
Audubon
knew
that
visually
stunning
Snowy
Owls
hunt
during
the
day
or

early
evening
rather
than
at
night.
To
make
these
majestic
creatures
stand
out
from

the
white
paper,
he
created
a
dusky
background
with
a
gathering
winter
storm.

These
extraordinary
“portraits”
of
owls
reflect

the
humanistic
culture
of
16th
century
Europe
that
emphasized
learning
through
observation
and
the

quest
for
knowledge.
They
document
one
of
the
most
complex,
early
scientific
efforts
to

catalog
natural
phenomena
taxonomically.

At
the
dawn
of
ornithology,
16th
century
artists
aspired
to

portray
their
birds
life-size,
but
the
largest
paper
available
measured
roughly

11

x

16

inches.
Therefore,
they
could
only
depict
smaller
species
life-size,
as
seen
in
a
trove

of
215
avian
watercolors
at
the
New-York
Historical
Society.
Formerly
mounted
in
albums,
these

exceptional
works
were
gathered
together
in
France
and
later
belonged
to
the
Dukes
of

Devonshire in England.

Conrad
Gessner
was
a
Swiss
naturalist
whose
*Historiae
Animalium*
is
one
of
the
earliest

printed
zoological
texts.

Gessner
used
realistic
woodcuts
to
illustrate
the
animals
being
described,
including

enough
detail
to
aid
identification,
unlike
the
earlier
fable
and
bestiary
collections.
Cats
already

had
a
bad
reputation—here
they
are
said
to
possess
“a
cunning
character.”
Edward
Topsell,

the
first
English
translator
of
Gessner's
work,
noted,
“The
familiar
of
witches
do
most

ordinarily
appear
in
the
shape
of
cats,
which
is
an
argument
that
the
beast

is
dangerous
to
soul
and
body.”

Elsewhere,
Gessner
asserted
that,
“men
have
been
known

to
lose
their
strength,
perspire
violently,
and
even
faint
at
the
sight
of
a

cat.”

Toads
have

long
featured
in
magical
folklore,
their
properties
ranging
from
predicting
the
weather
to
bringing

good
luck.

When
Johann
Baptist
von
Spix,
the
German
biologist,
visited
Brazil
he
described

this
species
of
toad,
Bufo
agua,
also
known
as
the
cane
toad
or
giant

marine
toad.

The
cane
is
the
world's
largest
toad,
recognizable
for
its
unwebbed
hands

and
feet,
its
brown-colored
iris,
and
the
venom
glands
dotted
across
the
surface
of

its
skin,
which
produce
a
toxic,
milky
secretion.

Unfortunately,
it
is
dangerous
to
many

animals,
such
as
dogs.

At
Hogwarts,
Neville
Longbottom's
pet
toad
Trevor
seemed
much
more

benign.

the 1990s, the number of people with a mental health problem has increased by 50% (Mental Health Foundation 1999). The prevalence of mental health problems has increased in the general population, and the incidence of mental health problems has increased in the prison population.

There is a growing awareness of the need to address the mental health needs of prisoners. The Department of Health (1999) has published a strategy for mental health services, which includes a commitment to improve the mental health of prisoners. The Department of Health (1999) has also published a strategy for mental health services, which includes a commitment to improve the mental health of prisoners.

Imagine,
if

your
greatest
fear
were
spiders,
how
you
might
feel
meeting
an
Acromantula.
Jim
Kay's

image
of
the
horrific
spider
captures
every
creepy
detail
of
the
carnivorous
creature
that

Harry
and
Ron
encountered
in
the
Forbidden
Forest.

In
the
background,
hundreds
of
spiders'

legs
become
indistinguishable
from
the
spiky
trees
around
them.
Strands
of
cobwebs
gleam
white

in
Harry's
wandlight.
Aragog
is
the
originator
of
this
spider
colony—a
combination
of
too

many
eyes
and
too
many
horribly
hairy
legs.
This
painting
was
layered
with
a

watercolor
tone
and
edited
to
create
the
final
image.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million, and the number of people aged 75 and over has increased by 1 million (Office of National Statistics 1999). The number of people aged 65 and over is projected to increase to 6.5 million by 2011, and the number of people aged 75 and over to 3.5 million (Office of National Statistics 1999).

There is a growing awareness of the need to develop services to meet the needs of older people, and a number of initiatives have been developed to address this need. The Department of Health (1999) has published a strategy for older people, which sets out the government's commitment to improve the lives of older people. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity.

The strategy is based on three main principles: (1) to ensure that older people have the opportunity to live independently and actively; (2) to ensure that older people have access to the services and support they need; and (3) to ensure that older people are treated with respect and dignity. Maria
Sibylla
Merian
was
a

pioneering
naturalist
and
zoological
illustrator,
celebrated
for
her
groundbreaking
work
on
South
American
insects.

Between
1699
and
1701,
Merian
worked
in
the
Dutch
colony
of
Surinam,
where
she

made
the
drawings
of
these
arachnids
for
*Metamorphosis
insectorum
Surinamensium.*
Merian's
scientific
expedition
to

this
remote
location
was
reputedly
the
first
to
be
led
by
a
European
woman.

Like
Hagrid,
who
cared
for
Aragog
when
he
“was
only
a
boy,”
Merian's
fascination

with
insects
developed
in
childhood.
Many
of
the
species
first
encountered
by
Merian
in

Surinam
were
unknown
to
Western
science.

*“When
Merian
published
this
image
of
giant,*

*bird-eating
spiders,
she
was
denounced
as
a
fantasist
by
her
male
peers.
Her*

*hand-painted
books
nevertheless
sold
well,
but
it
was
not
until
1863
that
the*

*genuine
existence
of
this
bird-eating
spider
was
finally
accepted.”*

In

this

Jim
Kay
illustration,
Buckbeak
has
taken
over
his
beloved
owner's
bed,
a
snack
of

dead
ferrets
resting
under
his
claws.
Hagrid
received
orders
from
the
Ministry
of
Magic

to
tether
the
hippogriff,
but
he
could
not
bear
to
leave
“Beaky”
tied
up

outside,
alone
in
the
snow.

The
interior
of
Hagrid's
cabin
was
drawn
from
the

real-life
gardener's
hut
at
Calke
Abbey
in
Derbyshire,
England.
The
vibrant
blue
highlights
echo

the
famous
bluebells
that
grow
there.

The
word
“hippogriff”
is
derived
from
the
ancient

Greek
for
“horse”
and
the
Italian
for
“griffin.”
The
griffin,
with
its
eagle's
head

and
lion's
hindquarters,
is
said
to
be
the
hippogriff's
ancestor.

Ludovico

Ariosto

was

the

first

to

describe

the

hippogriff

in

1516

in

his

epic

poem

Orlando

Furioso.

He

was

inspired

by

the

Roman

author

Virgil,
who
used
the
union
of
a
horse
with
a
griffin
as
a
metaphor

for
ill
-
fated
love—a
central
theme
in
*Orlando
Furioso*.

In
this
18th-century
illustration,

the
knight,
Ruggiero,
has
tied
his
hippogriff
mount
to
a
tree.
Unbeknownst
to
him,

the
tree
was
actually
another
knight
who
had
been
transformed
by
an
evil
sorceress.

Her
monstrous
minions
can
be
seen
approaching
in
the
background.

*“This
luxur
y
edition*

of
Orlando
Furioso
was
printed
on
vellum
(calf
skin)
with
engravings
after
Pietro

*Antonio
Novelli.
It
once
belonged
to
King
George
III.”*

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990–2000) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2001). The number of people aged 65 and over is projected to increase from 10.5 million in 1990 to 12.5 million in 2020.

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (2000) has identified the need to develop a 'new paradigm' for the care of the elderly. This paradigm is based on the principle of 'active ageing', which is the process of maintaining and enhancing the ability of older people to participate in social, economic and cultural activities. The Department of Health (2000) has identified a number of key areas for action in order to achieve this paradigm, including: (1) promoting the health and well-being of older people; (2) ensuring that older people have access to the services and resources they need; and (3) ensuring that older people are able to participate in the decisions that affect their lives.

One of the key areas for action is the need to ensure that older people have access to the services and resources they need. This includes access to health care, social care, housing, and transport. The Department of Health (2000) has identified a number of key areas for action in order to ensure that older people have access to the services and resources they need, including: (1) ensuring that older people have access to health care; (2) ensuring that older people have access to social care; (3) ensuring that older people have access to housing; and (4) ensuring that older people have access to transport.

Another key area for action is the need to ensure that older people are able to participate in the decisions that affect their lives. This includes the need to ensure that older people are able to participate in the decisions that affect their health, social care, housing, and transport. The Department of Health (2000) has identified a number of key areas for action in order to ensure that older people are able to participate in the decisions that affect their lives, including: (1) ensuring that older people are able to participate in the decisions that affect their health; (2) ensuring that older people are able to participate in the decisions that affect their social care; (3) ensuring that older people are able to participate in the decisions that affect their housing; and (4) ensuring that older people are able to participate in the decisions that affect their transport.

Ever
since
the
Greek
physician
Ctesias

first
described
the
medicinal
properties
of
unicorns
around
400
B.C.E.,
these
elusive
animals
have

attracted
human
hunters.

This
image
of
the
killing
and
skinning
of
the
“pirassoipi,”
a

twin-horned
unicorn,
is
found
in
a
study
by
Ambroise
Paré,
surgeon
to
the
French

Crown.

Unsurprisingly,

the

hunters

in

the

scene

have

a

cruel

appearance.

As

Firenze

told

Harry
in
The
Sorcerer's
Stone,
“it
is
a
monstrous
thing,
to
slay
a
unicorn.”

?

The
mythical
unicorn
was
once
revered
for
its
ability
to
heal

and
to
purify.
In
*The
Sorcerer's
Stone,*
Voldemort
strengthens
himself
by
drinking
restorative
blood

from
slain
unicorns.
Harry
and
his
fellow
Hogwarts
students
use
powdered
unicorn
horn
as

a
potion
ingredient,
just
as
alchemists
and
apothecaries
did
during
the
Middle
Ages
and

early
modern
period.
Those
prized
horns,
however,
came
not
from
white,
horned
horses,
as

many
believed,
but
from
the
narwhal
or
“unicorn
of
the
sea,”
a
real
animal

that
still
inhabits
Arctic
waters.
Male
narwhals
grow
a
spiral
tusk

actually
an

elongated
tooth—up
to
ten
feet
long.
When
marketed
as
unicorn
horn,
the
tusks
could

command
very
high
prices
and
were
collected
by
royalty
across
Europe.
This
impressive
specimen

was
acquired
by
Arctic
explorer
John
Stanwell

-

Fletcher
in
the
first
half
of

the
20th
century
and
given
to
the
Explorers
Club
in
New
York
City.

The

*Histoire
générale*

des
Drogues
was
a
practical
manual
that
described
an
array
of
popular
17th-century
medicinal

ingredients.

It

was

written

by

Pierre

Pomet,

a

Parisian

pharmacist

and

chief

apothecary

to

King
Louis
XIV
of
France.

In
the
chapter
on
the
unicorn,
Pomet
would
not

confirm
the
animal's
existence,
conceding
that
“we
know
not
the
real
truth
of
the

matter,”
but
he
did
acknowledge
that
what
was
commonly
sold
as
unicorn's
horn
“is

the
horn
of
a
certain
fish
called
narwhal.”
According
to
Pomet,
whatever
its
origin,

the
horn
was
“well
used,
on
account
of
the
great
properties
attributed
to
it,

principally
against
poisons.”

This
unusual
unicorn
appears
in
a

16th-century
Greek
manuscript.
The
accompanying
text
is
a
poem
about
the
natural
world
composed

by
the
Byzantine
poet
Manuel
Philes.
According
to
the
poem,
the
unicorn
was
a

wild
beast
with
a
dangerous
bite—it
had
the
tail
of
a
boar
and
the

mouth
of
a
lion.

If
such
a
unicorn
was
encountered,
the
beast
could
only

be
snared
by
a
woman.
This
is
in
line
with
medieval
folklore
stipulating
that

unicorns
must
be
captured
by
female
virgins.
The
unicorn
would
place
its
head
in

the
virgin's
lap
and
then
fall
asleep,
allowing
the
hunter
to
sneak
up
on

it

unawares.

μονόκερως.

* πρὸς μονόκερως : *

μονόκερως θήρ παρ' ἰνδοῖς ὀρέθη.
 ἀγνός, ὡκυδαῖν, εἶδ' ἐλάτ' ἐπ' ἀστέροι,
 βάρεις μαχητὴς. ἦ δὲ κέλ' αἰνδάκοι,
 μέγας ἰσχυρὸν ἀφύης χειρουργία.
 πηθεῖ παρ' ἡδ' ἔφ' ὅραν ἑδ' ἡμιδαῖου.
 βῶν δὲ πυκνὰ τὸν κερυφαῖον λόφον,
 ὡς ἔτ' ὁ μακρὸν, κ' ὀδοῖας πλῆρες κλέας
 ὁ πρὸς ἀκμάων ἐκ πεφυκὸς ὀφρῶν,
 οὐκ ὄχλον ἐστίν, ὁ δὲ κούφον ὡς κλέας.
 ὁ δὲ ἐξ ὁμαλῶς ἰῆς φυῆς παρορηγμένον.
 ἔσχαττον δὲ κ' ἰσιδηρέας ἔλινης.
 ὡς ἔτ' ἰγίτωες παρ' ὅσους κεκλωσμένον.

Harry

Potter

first

met

Fawkes

the

phoenix

in

Dumbledore's
office
in
his
second
year.

It
happened
to
be
a
“Burning
Day,”
meaning

that
the
bird
burst
into
flames
and
was
reborn
from
the
ashes
before
Harry's

very
eyes.
Later,
the
fully
grown
Fawkes
came
to
Harry's
rescue
in
the
Chamber

of
Secrets.
Jim
Kay's
glorious
painting
of
the
bird
captures
the
brilliant
reds
and

golds
of
the
phoenix's
feathers.

The
image
seems
to
soar
across
the
surface
of

the
page,
almost
taking
off
at
the
edges.
Kay
has
also
painted
details
of

the
feathers,
the
egg,
and
the
eye,
which
were
used
in
the
final
composite

image.

HEFLAMES

This
13th-century
bestiary
describes

and
illustrates
the
phoenix
in
wonderful
detail.

The
bird's
most
remarkable
attribute
is
its

ability
to
resurrect
itself
in
old
age.

It
creates
its
own
funeral
pyre
from

branches
and
plants,
before
fanning
the
flames
with
its
wings,
in
order
to
be

consumed
by
the
fire.

After
the
ninth
day,
it
rises
again
from
the
ashes.

This
legendary
ability
has
often
been
compared
to
the
self-sacrifice
and
resurrection
of
Christ—in

some
traditions,
the
phoenix
signifies
the
eternal
life
of
the
faithful
Christian.

*“The
phoenix*

*is
a
semi-mythical
bird,
seldom
spotted
and,
according
to
Newt
Scamander,
rarely
domesticated*

*by
wizards.
This
bestiary
claims
that
the
phoenix
dwells
in
Arabia,
but
Newt*

*Scamander
extended
its
distribution
to
Egypt,
India,
and
China.”*

In

1550,

when

global

exploration

was

in

its

infancy

and

new
animals
were
being
constantly
discovered,
the
French
author
Guy
de
la
Garde
devoted

an
entire
study
to
the
phoenix.
This
fine
volume
features
a
hand
-
colored

picture
of
the
creature
emerging
from
a
burning
tree.
The
translated
caption
reads:
“A

description
of
the
phoenix
and
its
fortunate
place
of
residence,
of
its
long
life,

pure
conversation,
excellent
beauty,
diverse
colors,
and
of
its
end
and
remarkable
resurrection.”
De

la
Garde
dedicated
the
book
to
Princess
Marguerite,
a
patron
of
the
arts
and

sister
of
King
Henri
II
of
France,
probably
in
an
attempt
to
gain
her

favor
through
association
with
this
miraculous
bird.

*“Phoenixes
are
historically
associated
with
the*

*Sun.
The
crest
of
seven
feathers
on
the
bird's
head
cor
responds
to*

*the
seven
rays
which
traditionally
emit
from
the
head
of
Helios,
the
Greek*

*god
of
the
Sun.”*

Like
the
phoenix

or
the
thunderbird,
its
North
American
relative,
the
Iranian
simurgh's
exact
form
and
qualities

are
much
disputed.
It
was
traditionally
portrayed
in
pre-Islamic
Iran
as
a
composite
creature

with
a
snarling
canine
head,
forward-pointing
ears,
wings,
and
a
“peacock”
tail.

In
Persian

literature,
however,
the
simurgh
was
usually
depicted
in
flight
with
fantastic
swirling
tail
feathers.

It
is
best
known
in
this
culture
as
the
bird
who
reared
the
hero

Zal
on
a
mountaintop
and
healed
the
wounded
warrior
Rustam.
Subsequently,
as
king
of

the
birds,
the
simurgh
became
a
metaphor
for
God
in
Sufi
mysticism.

As

a

bookdealer,

apothecary,

and

spy,

Louis

Renard

could
have
very
well
kept
shop
in
Diagon
Alley.

In
1719
Renard
published
the

world's
first
book
illustrated
in
full
color
on
fishes
from
the
waters
of
the

East
Indies.
Renard
featured
the
artwork
of
Samuel
Fallours,
a
soldier
residing
on
the

Indonesian
Island
of
Ambon.
The
book
included
hand-colored
engravings
of
over
400
exotic
fishes

and

41

crustaceans,

along

with

2

stick

insects,

a

dugong,

and

a

mermaid.

Despite

the
inclusion
of
affidavits
attesting
to
the
accuracy
of
the
specimens,
the
scientific
credibility

of
the
work
quickly
came
under
scrutiny.
Fallours's
artistic
license
can
best
be
seen

at
work
in
the
depiction
and
description
of
a
mermaid
supposedly
caught
on
the

coast
of
Borné.
Measuring
59
inches
in
length,
she
reputedly
lived
in
a
tank

of
water
for
4
days
and
7
hours
and
occasionally
cried
like
a
mouse.

According
to
Renard
she
refused
to
eat
despite
being
offered
small
fishes.

This
merman
specimen
looks
very
different
from
the
stereotypical
images
familiar
to
us
today.

It
is
an
example
of
ningyo,
a
Japanese
supernatural
creature
of
a
type
that

had
been
displayed
in
Shinto
shrines
for
hundreds
of
years,
but
was
unknown
outside

Japan
until
the
19th
century.

In
1842,
showman
P.T.
Barnum
began
exhibiting
a
mermaid

specimen
not
unlike
this
one,
and
it
caused
a
sensation.
Barnum's
mermaid
is
now

lost,
but
in
the
second
half
of
the
nineteenth
century
many
more
of
these

creatures
appeared
in
collections
in
Europe
and
North
America.
This
example,
now
kept
at

the
Horniman
Museum
in
London,
is
one
of
several
formerly
owned
by
the
great

British
collector
Sir
Henry
Wellcome,
who
amassed
over
a
million
objects
over
the
course

of
his
lifetime.

Unfortunately,
this
particular
merman
is
not
real.

Extensive
scientific
testing
has

revealed
it
to
be
made
of
various
fish
parts—such
as
the
tail
from
a

carp,
and
the
teeth
of
a
wrasse—bound
together
with
wood,
metal,
cloth,
and
papier-mâché.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. This
deleted
scene
from
Harry

*Potter
and
the
Chamber
of
Secrets*
shows
Harry
and
Ron
crashing
their
enchanted
Ford

Anglia
into
the
lake
at
Hogwarts
instead
of
the
Whomping
Willow.
In
this
version

of
the
story,
the
boys
are
saved
by
the
merpeople,
who
flip
the
car

over
and
drag
it
to
the
safety
of
the
bank.

The
first
mermaid
that

Harry
saw
had
a
lower
body
that
was
“a
great,
scaly
fishtail
the
colour

of
gun-metal.”

We
are
told
that
the
creature's
eyes,
“flashing
in
the
headlights,
looked

dark
and
threatening.”

At
the
top
of

page
64

,
the
editor
has

written
a
note
questioning
this
scene,
perhaps
prompting
the
rewriting
of
the
chapter.
“In

*this
draft
chapter,
one
of
the
mermaids
speaks
to
Harry
and
Ron
in*

*English,
above
the
surface
of
the
water.*

*This
contrasts
with
the
later
published*

*texts
in
which
merpeople
can
only
speak
Mermish
above
water.”*

Harry thought happily of ice cold drinks in the best gold goblets, and platters piled high with delicious Hogwarts food. They flew over the edge of the great lake now, the castle right ahead of them.

"Why're you slowing down?" said Harry.

"I'm not," said Ron, stamping on the accelerator, "I don't understand -"

The car was definitely slowing. Now they were going at a walking pace.

"What's wrong with it?" said Ron, frowning at the dashboard, "Why isn't it -"

"Ron," said Harry suddenly, pointing at a dial beside the steering wheel, "We're out of petrol."

"What's petrol?" said Ron.

"It's what you need to make a car go," said Harry, irritably.

"Well, why didn't you say so before?" said Ron, as the car began to shudder alarmingly.

"I didn't know a bewitched car would need it," said Harry, grabbing the edges of his seat as the car began to vibrate madly on the spot.

"Oh no," said Ron weakly, his knuckles white on the steering wheel, "If the engine cuts out -"

The words were barely out of his mouth when the engine spluttered and died -

"NOOOOOOO!" Ron yelled.

The car dropped like a boulder; they hit the glassy surface of the lake with a deafening smash; Harry was thrown against a window, Hedwig was screaming again, Ron's foot hit Harry in the mouth; icy water was pouring in from somewhere and the car sank, slowly and steadily through the blackness. Scabbers ran across Harry's face. Water was sloshing about inside. Harry seemed to be sitting on the ceiling of the car.

"Harry?" came Ron's voice again through the dark.

"What?"

"How come we're not dead?"

OF F M A G I C A L C R E A T U R E S

"The windows have shut themselves..."

"Dad must've added safety spells..."

"Are you hurt?"

"Something's bleeding, but I think I'm OK. Are you all right?"

Harry felt the back of his head. "I've got a lump like an egg but nothing feels broken."

"How're we going to get out of this?"

"Dunno..."

There was a jolt and an ominous silence. The roof of the car had hit the bottom of the lake.

"Well, we can still breathe," said Ron, "But I don't know how long that's going to last..."

"Will anyone know we're here?"

"I don't know - you can't see the lake from the train station, can you?"

"Maybe someone from Hogwarts was looking out of the window."

"Yeah, maybe," said Ron bravely.

The headlights were still working. They could see a few feet of murky water and black rocks on the floor of the lake. Neither of them spoke for a while.

"We'll have to thank your Dad if we - when we get out," said Harry eventually, "Tell him his safety spells worked."

"Yeah... Harry..." Ron's voice was trembling, "Did you see something move out there?"

Harry stared out at the water illuminated by the headlights. There was nothing there, but a few specks of sand were swirling as though it had been disturbed.

"What did you think you saw?" Harry asked. It was hard to keep your voice calm and unconcerned when your mouth was so dry.

"It looked like an enormous fish-tail," whispered Ron.

I wondered whether the mer-people scene actually works?
After all, we don't see them again... What if,
as an alternative, the car suddenly develops under-
water hoses or something - and suddenly shoots out of the water? Right
"Oh, well - a fish -" said Harry, "A fish isn't going to do anything to us... I thought help for
it might be the giant squid." - too!

There was a pause in which Harry wished he hadn't thought about the giant squid.

"There's loads of them," said Ron, swivelling round and gazing out of the rear window.

Harry felt as though tiny spiders were crawling up his spine. Large dark shadows were circling the car.

"If it's just fish..." he repeated.

And then, into the light, swam something Harry had never expected to see as long as he lived.

It was a woman. A cloud of blackest hair, thick and tangled like seaweed, floated all around her. Her lower body was a great, scaly fishtail the colour of gun-metal; ropes of shells and pebbles hung about her neck; her skin was a pale, silvery grey and her eyes, flashing in the headlights, looked dark and threatening. She gave a powerful flick of her tail and sped into the darkness.

"Was that a mermaid?" said Harry.

"Well, it wasn't the giant squid," said Ron.

There was a crunching noise and the car suddenly shifted.

Harry scrambled about to press his face against the back window. About ten merpeople, bearded men as well as long haired women, were straining against the car, their tails swishing behind them.

"Where are they going to take us?" said Ron, pannicking.

The mermaid they had seen first rapped on the window next to Harry and made a circular motion with her silvery hand.

"I think they're going to flip us over," said Harry quickly, "Hold on -"

They grabbed the door hands and slowly, as the mer-people pushed and strained, the car turned right over onto its wheels, clouds of silt fogging the water. Hedwig was beating her wings furiously against the bars of her cage again.

The mer-people were now binding thick, slimy ropes of lakeweed around the car and tying the ends around their own waists. Then, with Harry and Ron sitting in the front seats hardly daring to breathe, they pulled... the car was lifted off the bottom and rose, towed by the mer-people, to the surface.

"Yes!" said Ron, as they saw the starry sky again through their drenched windows.

The mer-people in front looked like seals, their sleek heads just visible as they towed the car towards the bank. A few feet from the grassy bank, they felt the wheels touch the pebbly ground of the lake again. The mer-people sank out of sight. Then the first mermaid bobbed up at Harry's window and rapped on it. He unwound it quickly.

"We can take you no further," she said. She had a strange voice, it was both screechy and hoarse. "The rocks are sharp in the shallows, but legs are not so easily torn as fins..."

"No," said Harry, nervously, "Look, we can't thank you enough..."

The mermaid gave a little flick of her tail and was gone.

"Come on, I need food..." said Ron, who was shivering.

They opened the doors of the car with difficulty, picked up Hedwig and Scabbers, braced themselves and jumped down into the freezing water, which came up above Harry's thighs. They waded to the bank and climbed out.

"Not as pretty as they look in books, are they, mermaids?" said Ron, trying to wring out his jeans. "Of course, they were lake people... maybe in a warm sea..."

Harry didn't answer; he was having trouble with Hedwig, who had clearly had enough of wizard transport. He let her out of her cage and she soared off at once towards a high tower which housed all the school owls.

This

“game

book,”
dating
from
the
early
17th
century,
was
possibly
made
as
a
love
token.

The
parchment
has
been
folded
into
a
concertina,
with
each
section
depicting
an
animal.

A
series
of
flaps
overlays
each
portion
of
the
manuscript,
and
can
be
opened

or
closed
to
create
different
types
of
creature.
The
game
book
includes
mythical
beasts

such
as
dragons,
manticores,
and
griffins,
which
can
be
transformed
using
the
features
of

real
animals
such
as
monkeys,
snakes,
and
lions.

This
mermaid
can
be
given
legs

to
become
a
woman
or
a
man's
head
to
become
a
fish-man.
Although
she

appears
different
from
the
merpeople
at
Hogwarts,
she
is
not
to
be
trusted.
The

accompanying
poem
describes
how
the
mermaid
lured
sailors,
“Who
leaving
off
their
ship
were

found,
On
shore,
by
my
enchantments
drown'd.”

This
portrait
of
the
aggressive
Graphorn
shows
a
large
humped-back
creature,
with
two
horns

and
a
heavy
tail.

According
to
Newt
Scamander's
*Fantastic
Beasts
and
Where
to
Find*

Them,
the
creature
could
be
found
in
the
mountainous
regions
of
Europe.
Olivia
Lomenech

Gill's
evocative
illustration
shows
how
potentially
dangerous
J.K.

Rowling's
creation
could
be.

The
beast

is
shown
scraping
the
ground
with
its
“large,
four-thumbed
feet”
ready
to
take
on

anyone
foolish
enough
to
stray
too
close.

The
artist
has
skillfully
used
highlights
of

color
to
add
texture
to
the
Graphorn's
gnarled,
grayish-purple
skin.

The
Snallygaster
is
a
creature
of
North
American
origin,

said
to
have
been
named
by
Dutch
settlers
in
the
1730s.
The
creature
was

added
to
the
2017
edition
of
*Fantastic
Beasts
and
Where
to
Find
Them.*
Half

bird,
half
serpent,
the
Snallygaster's
name
is
derived
from
schnell
geiste,
a
Pennsylvania
Dutch

term
meaning
“quick
spirit.”
Despite
its
status
as
a
mythological
creature,
numerous
sightings
of

the
flying
beast
have
been
reported
in
Frederick
County,
Maryland.
*Valley
Register,*
a
newspaper

in
Middletown,
featured
several
stories
from
February
to
March
1909,
describing
the
Snallygaster's

enormous
wings,
long
sharp
beak,
and
fierce
claws.

The
next
recorded
sighting
occurred

years

later.

The

last

unsuccessful

search

for

the

Snallygaster

took

place

in

1976.

These
plans
for
the
fifth

book,
The
Order
of
the
Phoenix,
show
the
complexity
of
the
later
storylines,
and

how
they
were
carefully
intertwined.
Employing
the
“series”
method,
the
charts
acted
as
early

plotting
aids
for
the
author,
with
the
titles
and
ordering
of
the
chapters
varying

from
the
published
versions.

The
plans
also
noted
the
whereabouts
of
individual
characters—for
example,

Hagrid
is
“still
with
giants”
for
the
first
nine
chapters—and
the
discovery
of
new

information

[illegible]

This
is
an
original
handwritten
draft
of
one
of
the
stories
for
The

*Tales
of
Beedle
the
Bard.*

It
is
one
of
four
wizarding
fairy
stories
written

by
J.K.
Rowling
to
accompany
“The
Tale
of
the
Three
Brothers,”
which
Hermione
reads

aloud
to
Harry
and
Ron
in
Chapter
21
of
*Harry
Potter
and
the
Deathly*

Hallows.

This
draft
outlines
the
plot
and
captures
the
essence
of
the
story,
but

it
was
extended
for
the
published
version.

The
tale
is
another
example
of
a

wizard
attempting
to
use
Dark
Magic
to
protect
himself
from
human
vulnerability.
In
the

Harry
Potter
novels,
love
has
its
own
powerful
magic.

By
rejecting
his
heart
and

starving
it
of
love,
the
warlock's
heart
becomes
“savage”
and
leads
him
to
tragedy.

Professor
Dumbledore
notes
that
this
kind
of
Dark
Magic
would
not
be
possible
outside

of
fiction.

maiden ~~she~~ came to condole with the warlock's
mother ~~she was a most gifted~~ ~~this man's~~ ~~mother~~
^{up in her father's death.}

The young witch was beautiful, and gifted, ~~and~~ and her
family had much gold. The warlock had no heart to
feel, yet he ~~he~~ ~~could~~ could understand the man
who married such a maid, ~~for~~ whose beauty would
excite envy in other men, whose magic could
~~assist a~~ ~~enable a~~ ~~ensure a~~ ~~comfortable life for~~
~~secure~~ the comfort of her husband, and whose gold
~~was~~ assist her husband's ambitions, and whose gold
would ensure his comfort. / Coldly and deliberately,
he began to pay court to ~~her~~ ^{the maid}. She was both
fascinated and frightened.

'You seem not to feel,' she said wonderingly.
~~Have you a heart?~~ 'If I thought you truly had
a heart...'

The warlock understood that a show of feeling
was necessary to secure her hand, so he returned,
for the first time in ~~all~~ many years, to his place
where he had locked up his heart.

~~He had forgotten~~
The heart was smaller by far than he
remembered, and much hairier. Nevertheless he
removed it from its enchanted ~~box~~ box and
replaced it within her own breast.

But the heart had grown so much since his
long estrangement. ~~It had been desire without feeling,~~
~~the approach of a woman, the beat fast within him,~~
~~and though his veins there flowed but with~~
like poisoned wine spreading and what it spread
He returned to the maid

This
unique
first
edition
of

*Harry
Potter
and
the
Philosopher's
Stone,*
with
drawings
and
annotations
by
J.K.
Rowling,
was

sold
at
a
charity
auction
in
aid
of
English
PEN
and
Lumos
in
2013.

Forty-three
of
the
pages
have
annotations
or
illustrations,
among
them
reflections
on
and
references

to
the
Harry
Potter
series
and
films.

In
this
copy,
J.K.

Rowling
points
out

sections
of
text
she
refused
to
cut,
and
comments
on
an
anomaly
in
Chapter

4

relating
to
snapped
wands.

She
also
describes
the
circumstances
of
the
invention
of

Quidditch.

On

the

first

page,

under

the

typeset

title

Harry

Potter

and

the

Philosopher's

Stone,
the
author
has
written
the
simple
words,
“changed
my
life
forever.”
*“This
wonderful*

*treasure
contains
21
original
illustrations
by
the
author.
They
include
drawings
of
a*

*swaddled
Harry
Potter
on
the
Dursleys'
doorstep,
a
menacing
Professor
Snape,
an
annotated*

*sketch
of
the
Hogwarts
coat
of

corner he stopped and took out the silver Put-Outer. He clicked it once and twelve balls of light sped back to their street lamps so that Privet Drive glowed suddenly orange and he could make out a tabby cat slinking around the corner at the other end of the street. He could just see the bundle of blankets on the step of number four.

'Good luck, Harry,' he murmured. He turned on his heel and with a swish of his cloak he was gone.

A breeze ruffled the neat hedges of Privet Drive, which lay silent and tidy under the inky sky, the very last place you would expect astonishing things to happen. Harry Potter rolled over inside his blankets without waking up. One small hand closed on the letter beside him and he slept on, not knowing he was special, not knowing he was famous, not knowing he would be woken in a few hours' time by Mrs Dursley's scream as she opened the front door to put out the milk bottles, nor that he would spend the next few weeks being prodded and pinched by his cousin Dudley ... he couldn't know that at this very moment, people meeting in secret all over the country were holding up their glasses and saying in hushed voices: 'To Harry Potter - the boy who lived!'

Harry Potter rolled over inside his blankets without waking

Harry Potter and the Philosopher's Stone

changed my life forever.

Perhaps Hufflepuff house would have the respect it deserves from fans if I'd stayed with my original idea of a bear to represent it?

HARRY POTTER

Professor McGonagall turned to Harry and Ron. 'Well, I still say you were lucky, but not many first years could have taken on a full-grown mountain troll. You each win Gryffindor five points. Professor Dumbledore will be informed of this. You may go.'

They hurried out of the chamber and didn't speak at all until they had climbed two floors up. It was a relief to be away from the smell of the troll, quite apart from anything else.

'We should have got more than ten points,' Ron grumbled.

'Five, you mean, once she's taken off Hermione's.'

'Good of her to get us out of trouble like that,' Ron admitted.

'Mind you, we did save her.'

'She might not have needed saving if we hadn't locked the thing in with her,' Harry reminded him.

They had reached the portrait of the Fat Lady.

'Pig snout,' they said and entered.

The common-room was packed and noisy. Everyone was eating the food that had been sent up. Hermione, however, stood alone by the door, waiting for them. There was a very embarrassed pause. Then, none of them looking at each other, they all said 'Thanks,' and hurried off to get plates.

But from that moment on, Hermione Granger became their friend. There are some things you can't share without ending up liking each other, and knocking out a twelve-foot mountain troll is one of them.

This was the cut I refused to make - my editor wanted to lose the whole troll-fighting scene. I'm glad I resisted

HARRY POTTER

grubby little package. Had that been what the thieves were looking for?

Harry and Ron walked back to the castle for dinner, their pockets weighed down with rock cakes they'd been too polite to refuse. Harry thought that none of the lessons he'd had so far had given him as much to think about as tea with Hagrid. Had Hagrid collected that package just in time? Where was it now? And did Hagrid know something about Snape that he didn't want to tell Harry?

Snape, brooding on the unfairness of life

This
annotated

screenplay
of
*Fantastic
Beasts
and
Where
to
Find
Them*
contains
J.K.
Rowling's
additions
in

her
own
handwriting.
The
screenwriting
process
is
very
different
from
writing
a
novel—it
can

be
much
more
collaborative
and
require
edits
at
almost
any
stage
in
the
process

of
filming.
The
script
must
be
technically
filmable,
and
so
the
limits
of
imagination

are
potentially
more
restricted.
Although
*Fantastic
Beasts*
was
J.K.
Rowling's
first
screenplay,
she
did

not
appear
to
be
confined
by
this
new
format.
Filmmaker
David
Yates
has
talked

about
working
on
this
script
with
her,
describing
how
the
author
would
rewrite,
reinvent,

and
add
astonishing
detail
to
her
characters
and
world,
with
seemingly
no
limit
to

her
imagination.
This
draft
represents
the
skeleton
on
which
the
film
and
the
world

of
Newt
Scamander
were
based.

*“She
has
so
much
flowing
through
her
head.”*

**David
Yates,
on
working
with
J.K.
*Rowling***

TINA (CONT'D)
Maybe I'll be good at being a criminal. I can't be worse than I was as an investigator.

NEWT
Don't say that.
(off her hook)
I think you're onto something with these Second Salerners. I do.

QUEENIE
Hey, it's ~~his~~ Gnarlak.

The Dublin owner of the Blind Pig, Gnarlak, is moving through the bar, tea-towel over his shoulder, cigar in mouth, many of his long fingers bent back on themselves, unless.

QUEENIE (CONT'D)
Sir! Mr. Gnarlak, sir? Could we talk to you for a moment?

GNARLAK
(menacing)
I don't see your phizz on any posters, sweetheart.

QUEENIE
I'm on the run with these guys.

GNARLAK
Weeeelll... you oughta be illegal in that dress. And we gotta No-Nags with us, I see.

JACOB
Is that a - a problem?

GNARLAK
I'd keep it quiet. There's guys in here who'd kill ya just 'cause you're wandless. Me, I don't judge. So
(he sits down)
what d'you wanna know and how much you gonna pay?

The house-elf returns with another of TINA's smoking cocktails. She knocks it back.

NEWT
Mr Gnarlak, we're looking for -

GNARLAK
British, huh? Yeah, I'm from the old country myself. Yeah, my whole family's with Gringotts Wizarding Bank, yeah, dey's all in the treasure-and-course business.

(MORE)

for the record
Tina: You do?
Newt: I do.

JACOB
She's his brains the outfit.

Wise you're familiar with certain us among elements.

passage understood you're a jerk who has his ear to his ground

The
Woolworth
Building—the

setting
of
the
Magical
Congress
of
the
United
States
in
the
*Fantastic
Beasts*
movies—was

the
tallest
building
in
the
world
when
construction
was
finished
in
late
1912.
Cass

Gilbert,
the
architect,
designed
it
in
a
gothic
style
that
evokes
the
great
European

cathedrals.

Gothic
details

can

be

found

not

only

on

the

upper

reaches

of

the

skyscraper
where
gargoyles
tower
over
the
gables
but
also
in
the
lobby
where
sculptures

of
fantastic
creatures
adorn
the
walls.

The
official
opening
of
the
“Cathedral
of
Commerce,”

as
it
was
later
called,
occurred
in
April
1913
when
President
Woodrow
Wilson
flipped

a
switch
from
his
White
House
office
to
activate
the
lights
in
the
Woolworth

Building.
Electric
lighting
was
relatively
new
at
the
time
and
was
seen
as
a

magical
technological
wonder.

If
the
adventurous
and

eccentric
James
Gordon
Bennett
Jr.—editor
of
the
*New
York
Herald,*
America's
highest
circulating
newspaper

at
the
turn
of
the
20th
century

—

had
to
choose
between
bringing
an

owl,
a
toad,
or
a
cat
to
Hogwarts
he
would
have
surely
selected
the

first.
Bennett
was
so
obsessed
with
owls
that
he
allegedly
kept
live
ones
in

his
office
and
planned
his
own
mausoleum
in
the
shape
of
an
owl.
In

1893

he

commissioned

architects

McKim,

Mead

&

White

to

design

a

new

headquarters

in

the
style
of
a
15th
century
Venetian
palazzo.
Bennett
specified
that
the
roof
ledge

be
decorated
with
four-foot
bronze
owls,
symbols
of
the
wisdom
of
the
written
word.

The
owls
were
even
fitted
with
electric
green
glass
eyes
that
eerily
glowed
with

the
toll
of
the
building's
clocks.

Based

on

an

original

new

story

by
J.K.
Rowling,
Jack
Thorne,
and
John
Tiffany,
*Harry
Potter
and
the
Cursed
Child*

is
a
play
by
Jack
Thorne,
produced
by
Sonia
Friedman
Productions,
Colin
Callender,
and

Harry
Potter
Theatrical
Productions.

It
had
its
official
premiere
at
the
Palace
Theatre,
London,

on
July
30,
2016,
and
opened
on
Broadway
in
spring
2018
at
the
fully

renovated
Lyric
Theatre
on
43rd
Street.

In
addition
to
receiving
the
2017
Olivier
Award

for
Best
New
Play
and
the
2018
Tony®
Award
for
Best
Play,
set
designer

Christine
Jones
was
honored
with
both
the
Olivier
Award
for
Best
Set
Design
and

the
Tony
Award
for
Best
Scenic
Design
of
a
Play
for
her
work
on

the
production.
This
model
for
the
Broadway
production
shows
an
evocative
and
flexible
set

design,
which
is
integral
to
the
theatrical
magic
that
takes
place
onstage.
Models
such

as
this
one
help
the
creative
team
to
work
out
the
crucial
detail
of

staging
a
play—ultimately
making
Harry
Potter's
world
come
alive
before
the
audience's
eyes.
In

New
York,
designers
Christine
Jones
and
Brett
J.
Banakis
had
the
privilege
of
not

only
building
Cursed
Child's
world
on
stage,
but
also
the
opportunity
to
redesign
the

entire
Lyric
Theatre,
taking
inspiration
from
the
theater's
original
architecture
as
well
as
the

Palace
Theatre
in
London
and
elements
of
the
set
design
itself,
creating
an
entirely

immersive
experience
from
the
moment
the
audience
steps
through
the
doors.

N

G

J.K.

Rowling

is

the

author

of

the

record-breaking,

multi-award-winning
Harry
Potter
novels.
Loved
by
fans
around
the
world,
the
series
has
sold

over
500
million
copies,
been
translated
into
over
80
languages,
and
made
into
8

blockbuster
films.

She
has
written
three
companion
volumes
in
aid
of
charity:
Quidditch
Through

the
Ages
and
Fantastic
Beasts
and
Where
to
Find
Them
(in
aid
of
Comic

Relief
and
Lumos),
and
*The
Tales
of
Beedle
the
Bard*
(in
aid
of
Lumos),

as
well
as
a
screenplay
inspired
by
*Fantastic
Beasts
and
Where
to
Find
Them,*

which
marked
the
start
of
a
five-film
series
to
be
written
by
the
author.

She
has
also
collaborated
on
a
stage
play,
*Harry
Potter
and
the
Cursed
Child*

Parts
One
and
Two,
which
opened
in
London's
West
End
in
the
summer
of

2016
and
on
Broadway
in
spring
2018.

In
2012,
J.K.
Rowling's
digital
company
Pottermore

was
launched,
where
fans
can
enjoy
news,
features,
and
articles,
as
well
as
original

content
from
J.K.
Rowling.
She
is
also
the
author
of
*The
Casual
Vacancy,*
a

novel
for
adult
readers,
and
the
Strike
crime
series,
written
under
the
pseudonym
Robert

Galbraith.
She
has
received
many
awards
and
honors,
including
an
OBE
and
Companion
of

Honour,
France's
Légion
d'honneur,
and
the
Hans
Christian
Andersen
Award.

150
million
separate
items
representing
every

age
of
written
civilization.

Its
vast
archive
includes
books,
journals,
manuscripts,
maps,
stamps,
music,

patents,
photographs,
newspapers,
and
sound
recordings
in
all
written
and
spoken
languages.
Among
the

greatest
treasures
in
the
library's
collection
are
two
copies
of
Magna
Carta
from
1215,

the
Lindisfarne
Gospels,
Leonardo
da
Vinci's
notebook,
the
first
edition
of
*The
Times*
from

March
18,
1788,
manuscripts
of
the
Beatles'
song
lyrics,
and
the
recording
of
Nelson

Mandela's
speech
given
at
his
trial.

The
oldest
items
in
the
collection
are
Chinese

oracle
bones
that
date
back
over
3,000
years—the
most
recent
are
today's
newspapers
and

websites.

The
New-York
Historical
Society,
founded
in

1804,
is
dedicated
to
revealing
the
dynamism
of
American
history
and
its
influence
on

the
world
today
through
exhibitions,
public
programs,
online
outreach,
and
research.

As
New
York's

oldest
museum
and
an
internationally
renowned
research
library,
New-York
Historical
is
a
preeminent
center

for
new
humanities
scholarship
and
leading
provider
of
lifelong
history
education.
Its
holdings
include

14
million
documents,
works
of
art,
artifacts,
and
ephemera
that
span
four
centuries
of

American
history
and
comprise
one
of
the
world's
greatest
collections
documenting
the
history,
culture,

diversity,
and
continuing
evolution
of
New
York
and
the
nation.

Museum
collections
highlights

384

include:

John

James

Audubon's

435

unique

watercolors

for

The

Birds

of

America;

renowned

Hudson
River
School
landscapes;
and
one
of
the
most
comprehensive
collections
of
Tiffany
lamps

in
the
world.
Artifacts
relating
to
New
York's
participation
in
local
and
global
events,

among
them
the
slave
trade,
the
American
Revolution,
and
the
terrorist
attacks
on
the

World
Trade
Center,
chronicle
the
history
of
New
York
and
the
nation.
One
of

only
20
members
of
the
Independent
Research
Libraries
Association,
New-York
Historical's
Library
collections
are

strong
in
colonial
history;
the
Revolutionary
War;
American
military
and
naval
history;
the
Anglo-American

slave
trade
and
conditions
of
slavery
in
the
United
States;
the
Civil
War;
and

American
biography
and
genealogy.
In
2015,
New-York
Historical
dramatically
enhanced
its
holdings
with
the

acquisition
of
the
complete
institutional
archives
of
Time,
Inc.—an
extraordinary
record
of
the
20th

century.
